Settlement In Roman Southwark:

Settlement in Roman Southwark James Drummond-Murray, Peter Thompson, Carrie Cowan, 2002 The latest in a series of reports on the archaeological excavations near London Bridge Station this volume focuses on important discoveries relating to the origins and development of Roman Southwark From the prehistoric period on this area formed the northernmost end of a series of sandy islands in the tidal reaches of the Thames The earliest Roman features were drainage ditches and quarry pits associated with the construction of a road to the Thames bridgehead Eight buildings were recorded along the eastern side of the road including a blacksmiths workshop All of these buildings were destroyed by fire in the Boudican revolt of AD 60-61 New timber and masonry buildings were constructed in the area during the late 1st and 2nd centuries These included shops a market hall and a warehouse Excavations revealed that extensive land reclamation took place on the marginal eastern fringes of the island before the construction of 2nd and 3rd century houses One of these houses contained a mosaic and painted wall plaster was recorded to the west of the road with part of a large building interpreted as a mansio

The Origin of Roman London Lacey M. Wallace, 2015-01-08 In this book Dr Wallace makes a fundamental contribution to the study of urbanism in the Roman provinces She attempts for the first time to present a detailed archaeological account of the first decade of one of the best excavated cities in the Roman Empire Delving into the artefact and structural reports from all excavations of pre Boudican levels in London she brings together vast quantities of data which are discussed and illustrated according to a novel methodology that address both the difficulties and complexity of grey literature and urban excavation

London in the Roman World Dominic Perring, 2022-01-27 incAn original authoritative survey of the archaeology and history of Roman London London in the Roman World draws on the results of latest archaeological discoveries to describe London s Roman origins It presents a wealth of new information from one of the world s richest and most intensively studied archaeological sites and a host of original ideas concerning its economic and political history This original study follows a narrative approach setting archaeological data firmly within its historical context London was perhaps converted from a fort built at the time of the Roman conquest where the emperor Claudius arrived to celebrate his victory in AD 43 to become the commanding city from which Rome supported its military occupation of Britain London grew to support Rome s campaigning forces and the book makes a close study of the political and economic consequences of London s role as a supply base Rapid growth generated a new urban landscape and this study provides a comprehensive guide to the industry and architecture of the city The story traced from new archaeological research shows how the city was twice destroyed in war and suffered more lastingly from plagues of the second and third centuries These events had a critical bearing on the reforms of late antiquity from which London emerged as a defended administrative enclave only to be deserted when Rome failed to maintain political control This ground breaking study brings new information and arguments to our study of the way in which Rome ruled and how the empire failed

Roman Southwark,

Settlement and Economy Carrie Cowan, 2009 Accompanying CD ROM contains selected tables CD ROM label Water and Roman Urbanism Adam Rogers, 2013-04-15 Water and Roman Urbanism Towns Waterscapes Land Transformation and Experience in Roman Britain offers a new perspective for investigating Roman settlement and how urban spaces were created and experienced by focusing on the relationship between settlement and water and the meanings attributed to these places Rather than a descriptive approach to the urban fabric it emphasises social context and cultural meaning through interpretative frameworks of analysis Central are the cultural and experiential implications of water forming part of towns rather than economic and practical arguments and the way in which these places were used and altered over time The book emphasises a social approach and has considerable implications for our understanding of life in the Roman period as a whole

Burial and Memorial in Late Antiquity, 2024-10-02 Burial and Memorial explores funerary and commemorative archaeology A D 284 650 across the late antique world This second volume includes papers exploring all aspects of funerary archaeology from scientific samples in graves to grave goods and tomb robbing and a bibliographic essay It brings into focus neglected regions not usually considered by funerary archaeologists in NW Europe such as the Levant where burial archaeology is rich in grave good to Sicily and Sardinia where post mortem offerings and burial manipulations are well attested We also hear from excavations in Britain from Canterbury and London and see astonishing fruits from the application of science to graves recently excavated in Trier

Agriculture and Industry in South-Eastern Roman Britain David Bird, 2016-12-31 The ancient counties surrounding the Weald in the SE corner of England have a strongly marked character of their own that has survived remarkably well in the face of ever increasing population pressure The area is however comparatively neglected in discussion of Roman Britain where it is often subsumed into a generalised treatment of the civilian part of Britannia that is based largely on other parts of the country This book aims to redress the balance The focus is particularly on Kent Surrey and Sussex account is taken of information from neighboring counties particularly when the difficult subsoils affect the availability of evidence An overview of the environment and a consideration of themes relevant to the South East as a whole accompany 14 papers covering the topics of rural settlement in each county crops querns and millstones animal exploitation salt production leatherworking the working of bone and similar materials the production of iron and iron objects non ferrous metalworking pottery production and the supply of tile to Roman London Agriculture and industry provides an up to date assessment of our knowledge of the southern hinterland of Roman London and an area that was particularly open to influences from the Continent

Colchester, Fortress of the War God David Radford, Adrian Gascoyne, 2013-07-19 This volume is a critical assessment of the current state of archaeological knowledge of the settlement originally called Camulodunon and now known as Colchester The town has been the subject of antiquarian interest since the late 16th century and the first modern archaeological excavations occurred in 1845 close to Colchester Castle the towns most prominent historic site The earliest significant human occupation recorded from Colchester dates to the late Neolithic but it

was only towards the end of the 1st century BC that an oppidum was established in the area This was superseded initially by a Roman legionary fortress and then the colonia of Camulodunum on a hilltop bounded on the north and east by the river Colne There is little evidence for continuing occupation here in the early post Roman period but in 917 the town was re established as a burgh and gradually grew in importance After the Norman Conquest a castle was built on the foundations of the ruined Roman Temple of Claudius and a priory and an abbey were established just to the south of the walled town Although the town as elsewhere was affected by the Dissolution of the Monasteries and the English Civil War it remained essentially medieval in character until the 18th century During the 19th century this process of change was accelerated by the arrival of the railway industrialisation and the establishment of the military garrison Since the 1960s Colchester has been subject to recurring phases of re development the most recent having ended only in 2007 which have had a significant impact on the historic environment Fortunately the town is one of the best studied in the country

Empire State Simon Elliott,2017-08-31 The armed forces of Rome particularly those of the later Republic and Principate are rightly regarded as some of the finest military formations ever to engage in warfare Less well known however is their use by the State as tools for such nonmilitary activities in political economic and social contexts In this capacity they were central instruments for the Emperor to ensure the smooth running of the Empire In this book the use of the military for such non conflict related duties is considered in detail for the first time The first and best known is running the great construction projects of the Empire in their capacity as engineers Next the role of the Roman military in the running of industry across the Roman Empire is examined particularly the mining and quarrying industries but also others They also took part in agriculture administered and policed the Empire provided a firefighting resource and organized games in the arena The soldiers of Rome really were the foundations on which the Roman Empire was constructed they literally built an empire Simon Elliott lifts the lid on this less well known side to the Roman army in an accessible narrative designed for a wide readership
