Seventy Years Agrowing A History Of The:

An Introduction to International Institutional Law Jan Klabbers, 2009-05-14 International institutions are powerful players on the world stage and every student of international law requires a clear understanding of the forces that shape them For example with increasing global influence comes the need for internal control and accountability This thought provoking overview considers these and other forces that govern international institutions such as the UN EU and WTO and the complex relationship that exists between international organizations and their member states Covering recent scholarly developments such as the rise of constitutionalism and global administrative law and analysing the impact of important cases such as the ICJ s Genocide case 2007 and the Behrami judgment of the European Court of Human Rights 2007 its clarity of explanation and analytical approach allow students to understand and think critically about a complex subject **Global**

Marine Science and Carlsberg - The Golden Connections of Johannes Schmidt (1877-1933) Bo Poulsen, 2016-11-21

By accident the world famous brewery Carlsberg became a central force in global marine science during the first three decades of the 20th century Within a core group of scientists and managers Johannes Schmidt 1877 1933 was the key figure combining the efforts of the International Council for the Exploration of the Sea ICES the Danish state and several private companies Launching 26 oceangoing expeditions Schmidt made landmark discoveries such as the breeding ground for the Atlantic eel in the Sargasso Sea The scientific frontier was pushed literally kilometres into the deep sea and across the World s oceans While the formal North Atlantic Empire of the small state of Denmark was in decline an informal empire of science was erected instead Shortlisted for the Society for Nautical Research Anderson Medal for published works on Maritime History in 2016 **Science, Geopolitics and Culture in the Polar Region** Professor Sverker Sörlin, 2013-10-28

Throughout the twentieth century glaciologists and geophysicists from Denmark Norway and Sweden made important scientific contributions across the Arctic and Antarctic This research was of acute security and policy interest during the Cold War as knowledge of the polar regions assumed military importance But scientists also helped make the polar regions Nordic spaces in a cultural and political sense with scientists from Norden punching far above their weight in terms of population geographical size or economic activity This volume presents an image of Norden that stretches far beyond its conventional limits covering a vast area in the North Atlantic and the Arctic Sea as well as parts of Antarctica Rich in resources scarce in population but critically important in global and regional geopolitics these spaces were contested by major powers such as Russia the United States Canada and in the Antarctic Argentina Australia South Africa and others The empirical focus on Danish Norwegian and Swedish influence in the polar regions during the twentieth century embraces a diverse array of themes from the role of science in policy and diplomacy to the tensions between nationalism and internationalism with clear relevance to the important role science plays in contemporary discussions about Nordic engagement with the polar regions

North Sea Dynamics Jürgen Sündermann, W. Lenz, 2012-12-06 This volume contains the proceedings of the

International Symposium on North Sea Dynamics which was held in Hamburg August 31 September 4 1981 More than 150 participants from 10 countries were present at the Symposium Of the 58 lectures given 45 are printed in this book The manuscripts were reviewed by an international advisory board The main goal of the organizers was to bring together as many active researchers as possible in this very general field of North Sea dynamics transcending the boundaries of the countries and the various disciplines involved in order to discuss the main problems and future trends In the ten years since the last comparable meeting in Aviemore Scotland several large international experiments JONSDAP 73 and 76 JONSWAP 73 75 and 77 MARSEN 79 and new developments in modelling promised a rewarding exchange of ideas In addition to the physical disciplines biologists and geologists are increasingly able to present quantitative analyses Marine Chemical Monitoring

Philippe Quevauviller, 2016-01-07 Combining laboratory experience with research and policy developments this book provides an insight into the historical background of marine monitoring its regulatory frameworks and science policy interactions With experience in the European Commission the author draws from practical experience in research and policy implementation to present a concise review of marine monitoring on an international level The author deals with monitoring and related QA QC principles focusing on monitoring types while describing general features of analytical methods used in marine monitoring The book concludes with a discussion about how to achieve metrology principles measurement traceability in marine monitoring *The Fluid Envelope of our Planet* Eric L. Mills, 2011-04-23 Oceans have had a

mysterious allure for centuries inspiring fears myths and poetic imaginations By the early twentieth century however scientists began to see oceans as physical phenomena that could be understood through mathematical geophysics *The Fluid Envelope of Our Planet* explores the scientific developments from the early middle ages to the twentieth century that illuminated the once murky depths of oceanography Tracing the transition from descriptive to mathematical analyses of the oceans Eric Mills examines sailors and explorers observations of the oceans the influence of Scandinavian techniques on German speaking geographers and the eventual development of shared quantitative practices and ideas A detailed and beautifully written account of the history of oceanography *The Fluid Envelope of Our Planet* is also an engaging account of the emergence of a scientific discipline **An Introduction to International Organizations Law** Jan Klabbers, 2022-03-10

Provides a framework for understanding how organizations are set up and the logic behind international organizations law

Length-based Methods in Fisheries Research Daniel Pauly, G. R. Morgan, 1987 Specific aims of the conference were to identify the specific features of sampling schemes used to obtain length frequency data for stock assessment to review length based methodologies for stock assessment of fish and aquatic invertebrates with particular reference to their precision and accuracy to review and test computer programs implementing length based methods **Towards Principled**
