## **Sex Roles In The State House:**

**Sex Roles in the State House** Irene Diamond, 1977      *Sisters in the Statehouse* Nadia E. Brown, 2014 Theories of descriptive representation among female legislators consistently document the ways in which women are marginalized in office. However, they tend to treat identity as constant over time and context and so fail to account for the substantive work of legislators. *Sisters in the Statehouse* looks at the situation from a different angle, taking an in-depth look at African American female state legislators to examine the impact of race and gender on Black women's political experiences, policy preferences, and legislative influence. Brown links personal narratives to the political behavior of her interview subjects to understand how their experiences with racism and sexism have influenced their legislative decision making and policy preferences. As such, this is the first study that empirically examines how difference is recognized and put into practice among Black women legislators. Brown demonstrates that identity influences political decision making in ways that distinguish the work of Black women from that of other state legislators. *Sisters in the Statehouse* is a groundbreaking inquiry into how an intersectional approach can enhance our understanding of political representation.

*Women Officeholders and the Role Models Who Pioneered the Way* Karen Owen, 2016-12-12 Recent electoral seasons in American politics demonstrate women's keen interest, involvement, and influence as candidates and officeholders. Women possess political ambition, albeit in varying degrees, and as such, women seek opportunities to be politically engaged and affect America's representative institutions. This book analyzes why American women run for political office and explores how political role models, identified as publicly elected officials and/or those who have served in the political arena, have greatly motivated women to run for higher political office, including seats in the U.S. Congress and state governorships. Evidence from personal interviews with ten congresswomen and fifty-five female state legislators reveals the ambitious nature of female politicians, the encouragement of political factors in their decisions to advance in politics, and their perceived responsibility to be role models to other women. Moreover, in studying thirty-five years of elections data, I find substantial support for how female political role models influence female state legislators' candidacies and electoral outcomes to higher office. This work highlights the importance of women as symbolic representatives; female politicians are instrumental in emboldening a new generation of women to engage in politics. Role models in politics indeed have a purpose and an influential nature.

**The Politics of Professionalism, Opportunity, Employment, and Gender** Sarah Slavin, 1987 This dynamic volume illustrates the expanded notion of political that has evolved as a result of the women's movement. Rich in analysis and description, the chapters offer clear-cut policy proposals and new conceptualizations of organizational frameworks and concepts that have consequence for the lives of women and men in such areas as the staging of careers, the division of labor in family and professional settings, and nepotism. Contributors focus on the interconnections between traditional political behavior and the larger social context in which it is played out. *The Politics of Professionalism, Opportunity, Employment, and Gender* presents a current and realistic

picture of the complexity of the political processes and a better sense of the less obvious elements that determine the political process

***Women as Candidates in American Politics*** Susan J. Carroll, 1994-05-22 In this second edition Susan Carroll updates her pioneering study of women candidates and their campaigns in the aftermath of the Year of the Woman Although in many regards the political climate has become vastly more favorable for female candidates opportunities are still limited by the political structure Carroll examines a number of possible reforms and actual developments which may eventually mean larger numbers of women being elected to public office

**Women and Congress** Karen O'Connor, 2012-11-12 Explore the effects women have had on Congress Containing vital insights into the role women play in Congress *Women and Congress Running Winning and Ruling* is a unique look into the political standing of female candidates and congresswomen Chapters written by noted political scientists consider the challenges of being a congresswoman in the male dominated political arena illustrate the fundamental and advanced techniques vital to winning an election and show how congresswomen have been most effective once in office *Women and Congress* brings you thoughtful discussions of how campaign finance speaking on the floor introducing new legislation and political action committees have contributed to the success of women politicians the effect of media on election outcomes including the media's portrayal of women and the ways female candidates present themselves to the media discrimination against women in media coverage differences in the ways Democratic and Republican women view political issues the political glass ceiling how incumbency gender and strategy play a role in elections and much more

**Women and American Politics** Susan J. Carroll, 2003 *Women and American Politics* brings together leading scholars in the field of women and politics to provide an account of recent developments and the challenges that the future brings for the study of gender and American Politics The book examines women's participation in the electoral arena and the emerging scholarship on the relationship between the media and women in politics the participation of women of colour and women's activism outside the electoral arena This volume demonstrates both the wealth of knowledge about women and American politics by the current generation of scholars and the vast number and range of important research questions which pose a challenge for the next generation

**Breaking the Political Glass Ceiling** Barbara Palmer, Dennis Simon, 2010-11-01 Why has the integration of women into Congress been so slow Is there a political glass ceiling for women Although women use the same strategic calculations as men to decide when to run the decision regarding where to run is something else While redistricting has increasingly protected incumbents it also has the unintended consequence of shaping the opportunities for female candidates The political geography and socio economic profile of districts that elect women differ substantially from districts that elect men With data on over 10 000 elections and 30 000 candidates from 1916 to the present Palmer and Simon explore how strategy and the power of incumbency affect women's decisions to run for office *Breaking the Political Glass Ceiling* is the most comprehensive analysis of women in congressional elections available The Second Edition is fully updated to reflect the pivotal 2006 mid term elections including

Nancy Pelosi's rise to Speaker of the House, Hillary Clinton's bid for the presidency and a record number of women serving as committee chairs. Additionally, the authors have created a website found at [politicsandwomen.com](http://politicsandwomen.com) to highlight key features of the book and provide updates throughout the election cycle. **Women's Political Voice** Janet A. Flammang, 1997

**Oxford Handbook of Political Behavior** Russell J. Dalton, Hans-Dieter Klingemann, 2007 Assembles the world's leading scholars on public opinion and political behaviour to describe the state of the art research on the beliefs, values and behaviours of contemporary politics. **Gender Consciousness and Politics** Sue Tolleson Rinehart, 2013-10-31 This book

examines the emergence of gender consciousness among women as a significant force in American politics. The author bases her argument on an in-depth empirical analysis of data derived from the U.S. biennial National Election studies of 1974 to 1984, the year of the emergence of the so-called gender gap. The author discusses the fact that while feminism is central to women's political orientation, the simple awareness of gender differences and group consciousness is a powerful force of change. Library, 1979 *Local Politics and Mayoral Elections in 21st Century America* Sean D. Foreman, Marcia L. Godwin, 2014-11-20 Some of the most populated and storied American cities had mayoral elections in 2013. Open contests in New York City, Los Angeles and Boston, for example, offer laboratories to examine electoral trends in urban politics. Cities are facing varied predicaments: Boston was rocked by the bombing of the marathon on April 15; Detroit is roiled by being the largest U.S. city to declare bankruptcy; and Chicago, which had an open competitive election in 2011, is dealing with significant gun violence. San Diego's mayor resigned in August 2013 due to sexual harassment charges, and other mayors are surrounded by corruption scandals. Houston and St. Louis had non-competitive elections recently, but their mayors are notable for their tenure in office and emphasis will be on public policy outcomes in those cases. Leaders in most cities face dramatic changes and challenges due to economic and social realities. *The Keys to City Hall* offers a complete and succinct review and analysis of the top mayoral campaigns in major American cities in recent years, as well as the politics and public policy management of those urban areas. Emerging theories of urban governance, demographic changes and economic conditions are examined in introductory chapters; the introduction will provide a unique and comprehensive focus on major trends in advertisement, changes in campaign strategies, fundraising and the use of social media at the local level. In Part Two, scholars with expertise in local politics, urban public policy and the governance explore some of the largest and most noteworthy U.S. cities, each of which has a recent competitive mayoral election. They will also provide updated data on mayoral powers and problems faced by local executives. Written as lively narratives in a highly readable style, this book advances theory on urban politics by reviewing developments in the field and aligning theoretical approaches with realities on the ground based on the most recent elections and governance structures. As such, it will be a much needed resource to

scholars interested in local politics and the public policy debates of specific major urban and metropolitan areas Women, Elections, and Representation Robert Darcy, 1994-01-01 The first women representatives in the United States were elected in 1894 when Colorado voters sent three women to the state legislature Now a century later women almost everywhere are the majority of voters but a distinct minority of elected officials This discrepancy is a puzzle for those who thought democratic institutions would incorporate newly enfranchised women and a problem for those working to expand democratic representation Darcy Welch and Clark examine women candidates and candidacies in the United States and several other democratic nations Their careful analysis reveals that male voters and political elites are not the barriers to women's election that common wisdom suggests Instead they find that a party's ability to determine candidate selection along with election procedures that benefit incumbents produces slow turnover of elected officials and few opportunities for new women candidates In addition the authors analyze nomination procedures and election systems to document both the conditions that lead political parties to nominate more women and the mechanisms that yield more victories by women candidates Women Elections and Representation is an extensively revised and expanded edition of a successful text that provides a thorough and up to date account of research on women and politics

**Gender Dynamics in Congressional Elections** Richard Logan Fox, 1997 What happens in an electoral environment involving female candidates Do women face different challenges during the electoral process How do gender dynamics alter the conventional norms of electoral politics Do women campaign differently from men Do male candidates pay more attention to women's issues or make other strategic and behavioral changes when opposed by a female candidate Author Richard Logan Fox answers these questions and many others with compelling evidence that suggests that women candidates are having a profound impact on the electoral process In Gender Dynamics in Congressional Elections Fox studies the congressional races of 1992 and 1994 in California in which a record 19 women were candidates for House seats He contrasts the experiences of both the male and female candidates and sheds new light on the different challenges women face during political campaigns Providing a groundbreaking examination of an understudied topic Gender Dynamics in Congressional Elections will be essential for students and professionals in political science

**The Careers of Councillors: Gender, Party and Politics** Catherine Bochel, 2018-02-06 This title was first published in 2000 Drawing on a variety of research including two surveys of councillors undertaken in Scotland England and Wales qualitative interviews and the re analysis of existing data this book aims to contribute towards research on local government councillors by exploring and developing the idea of careers of elected councillors and by examining their ambitions and the types of posts held during their period of office In particular the book examines the career experiences of men and women councillors including the differential rates of participation and progression to senior posts in elected local government Developments including a growth in the number of full time councillors and the Labour government's proposals for the modernization of local government make the consideration of career a prominent area These and other issues such as

recruitment party and gender differences are explored in the context of this book      Women in Presidential Cabinets Maria C. Escobar-Lemmon, Michelle M. Taylor-Robinson, 2016-07-01 Are women in presidential cabinets new political players or do they adopt the same strategies as the men who traditionally run government Once in office are they treated equally and are they as effective as their male counterparts Using data from Argentina Chile Colombia Costa Rica and the US Women in Presidential Cabinets provides evidence of gender integration      A Woman's Place Is in the House Barbara Burrell, 2010-05-07 In this first comprehensive examination of women candidates for the U S House of Representatives Barbara Burrell argues that women are as successful at winning elections as men Why then are there still so few women members of Congress Compared to other democratically elected national parliaments the U S Congress ranks very low in its proportion of women members During the past decade even though more and more women have participated in state and local governments they have not made the same gains at the national level A Woman's Place Is in the House examines the experiences of the women who have run for a seat in the U S House of Representatives from 1968 through 1992 and compares their presence and performance with that of male candidates The longitudinal study examines both general and primary elections and refutes many myths associated with women candidates including their ability to raise money and garner support from both interest groups and political parties According to Burrell election year 1992 was correctly dubbed the Year of the Woman in American politics not so much because women overcame perceived barriers to being elected but because for the first time a significant number of women chose to run in primaries Burrell's study examines the effects women are having on the congressional agenda and offers insight on how such issues as term limitations and campaign finance reform will impact on the election of women to Congress Barbara Burrell Ph D University of Michigan is professor and director of graduate studies in the Political Science Department at Northern Illinois University where she teaches courses in public opinion political behavior and women and politics
