Sex Evolution And Behavior Biology Ser:

Sex, Evolution, and Behavior Martin Daly, Margo Wilson, 1983 This text provides an elementary level discussion of recent theory relating to the evolutionary and adaptive aspects of reproductive behaviour The relation between ultimate and proximate levels of explanation is the major theme of the book Two new chapters in this edition incorporate findings from recent research and there is also new material on humans physiology and development Sex and reproductive behaviour are examined from an evolutionary comparative perspective and numerous empirical studies and examples are cited

Sex, Evolution, and Behavior Martin Daly, 1978

Sociobiology Edward O. Wilson, 2000 When this work was first published it started a tumultuous round in the age old nature versus nurture debate It shows how research in human genetics and neuroscience has strengthened the case for biological understanding of human nature

The Oxford Handbook of Human Mating David M. Buss, 2023 The scientific study of human mating has mushroomed over the past three decades This handbook showcases the best and the brightest scientists in the field providing up to date summaries of theories and empirical evidence of the science of human mating strategies It includes major sections on theories of human mating mate selection and mate attraction mate competition sexual conflict in mating human pair bonding the endocrinology of mating and mating in the modern world

Characterizing Human Psychological Adaptations Gregory R. Bock, Gail Cardew, 2008-04-30 This book contains chapters by some of the leading figures in the field of evolutionary psychology The latest data are presented on evolutionary theories in perception information various aspects of social behaviour language learning and aggression A common theme running through the printed discussions in this book is the important problem of how we can develop and test rigorous characterizations of evolved mental adaptations

Sex and Evolution George Christopher Williams, 1975-03-21 This book explores the relationship between various types of reproduction and the evolutionary process Starting with the concept of meiosis George C Williams states the conditions under which an organism with both sexual and asexual reproductive capacities will employ each mode He argues that in low fecundity higher organisms sexual reproduction is generally maladaptive and persists because there is no ready means of developing an asexual alternative The book then considers the evolutionary development of diverse forms of sexuality such as anisogamy hermaphroditism and the evolution of differences between males and females in reproductive strategy The final two chapters examine the effect of genetic recombination on the evolutionary process itself
