Sex Research New England Psychological Association, 1965 See Chapter 2 on Male Homosexuals by Evelyn Hooker as well as Male Homosexuals in the index Sex Research, New Developments, 1965 New Developments in Eating Disorders Research Pamela I. Swain, 2006 The abundance of food in the developed countries of the world has seemingly spawned an epidemic of disorders connected to the food Extremes such as intensive concern about one's body image and total disregard for it have resulted in countries which contain enormous segments of the population who are either obese and proud of it or bordering on anorexia nervosa This new book gathers state of the art research from leading scientists throughout the world which offers important information on understanding the underlying causes and discovering the most effective treatments for eating disorders *Sex Research and Sex Therapy* Ross Morrow, 2013-06-17 Exploring the theoretical conceptual and historical issues surrounding the topic of sex research and sex therapy this book examines the influential scientific sex research completed by Masters and Johnson and its implications for sex therapy and the study of human sexuality **Sex Research**, 1965 **Sex, Gender and Society** Ann Oakley, 2016-12-05 What are the differences between the sexes That is the question that Ann Oakley set out to answer in this pioneering study now established as a classic in the field To answer it she draws on the evidence of biology anthropology sociology and the study of animal behaviour to cut through popular myths and reach the underlying truth She demonstrates conclusively that men and women are not two separate groups rather each individual takes his or her place on a continuous scale She shows how different societies define masculinity and femininity in different and even opposite ways and discusses how far observable differences are based on biology and psychology and how far on cultural conditioning Many books have discussed these vital issues None however have drawn on such an impressively wide range of evidence or discussed it with such clarity and authority Now newly reissued with a substantial introduction which highlights its continuing relevance this work will continue to inform and shape dialogues around sex and gender for a new generation of scholars and students Sex, Gender and Society Professor Ann Oakley, 2015-03-28 What are the differences between the sexes That is the question that Ann Oakley set out to answer in this pioneering study now established as a classic in the field Now newly reissued with a substantial introduction which highlights its continuing relevance this work will continue to inform and shape dialogues around sex and gender for a new generation of scholars and students **Intersexualization** Lena Eckert, 2016-12-08 Since the 1970s research into Intersex has been a central fascination for feminist theorists seeking to make arguments about how men and women are created as social gender categories Intersexualization The Clinic and the Colony takes the case of Olympic runner Caster Semenya as a starting point to explore the issue of determining sex and the ways in which intersexuality is a threat to the distinction between men women homosexuality heterosexuality and white black By focusing on the 1950s and the 40 years after Eckert shows how what she calls intersexualization began in psycho medical research at the Johns Hopkins Hospital in Baltimore

and UCLA and has from there spread into cross cultural anthropological accounts conducted in Papua New Guinea and the Dominican Republic With cross cultural intersexualization having been largely neglected in recent literature on intersex this timely volume describes how such intersexualization derives from the combination of medicalization and pathologization through two crucial parts The first part The Clinic describes historical psycho medical material engaging with hermaphroditism ranging from Greek Mythology up to today This is followed by The Colony which analyzes in several close readings cross cultural anthropological sexological and psychoanalytical accounts contributing to cross cultural intersexualization Enclosing a wide range of inter and transdisciplinary approaches to heteronormative and dichotomously organized frames of knowledge and organization this volume is essential reading for upper undergraduate and post graduate students within the fields of gender studies social studies of medicine anthropology science and technology studies cultural studies sociology and history of medicine

The Science Question in Feminism Sandra G. Harding,1986 Can science steeped in Western masculine bourgeois endeavors nevertheless be used for emancipatory ends In this major contribution to the debate over the role gender plays in the scientific enterprise Sandra Harding pursues that question challenging the intellectual and social foundations of scientific thought Harding provides the first comprehensive and critical survey of the feminist science critiques and examines inquiries into the androcentricism that has endured since the birth of modern science Harding critiques three epistemological approaches feminist empiricism which identifies only bad science as the problem the feminist standpoint which holds that women s social experience provides a unique starting point for discovering masculine bias in science and feminist postmodernism which disputes the most basic scientific assumptions She points out the tensions among these stances and the inadequate concepts that inform their analyses yet maintains that the critical discourse they foster is vital to the quest for a science informed by emancipatory morals and politics

Brain Storm Rebecca M. Jordan-Young,2011-10-15 Female and male brains are different thanks to hormones coursing through the brain before birth That s taught as fact in psychology textbooks academic journals and bestselling books And

these hardwired differences explain everything from sexual orientation to gender identity to why there aren't more women physicists or more stay at home dads In this compelling book Rebecca Jordan Young takes on the evidence that sex differences are hardwired into the brain Analyzing virtually all published research that supports the claims of human brain organization theory Jordan Young reveals how often these studies fail the standards of science Even if careful researchers point out the limits of their own studies other researchers and journalists can easily ignore them because brain organization theory just sounds so right But if a series of methodological weaknesses questionable assumptions inconsistent definitions and enormous gaps between ambiguous findings and grand conclusions have accumulated through the years then science isn't scientific at all Elegantly written this book argues passionately that the analysis of gender differences deserves far more rigorous biologically sophisticated science The evidence for hormonal sex differentiation of the human brain better resembles a hodge podge pile than a solid structure Once we have cleared the rubble we can begin to build newer more scientific stories about human development
