

1980s - The appearance of microcomputers, that many educators and public officials became enthusiastic about computers.

By January 1983, computers were being used for instructional purposes in 40 percent of all elementary schools and 75 percent of all secondary schools in the United States

1985 - A single CD could store an entire encyclopedia plus video and audio. The CD-ROM and eventually the CD-RW paved the way for flash drives and easy personal storage.

Long, Leonard O. Nasman, 1983 **Computers, Children, and Classrooms** Hilda W. Carmichael, Ontario. Ministry of Education, 1985 This study examined the creative uses of computers in elementary schools and their impact on student s confidence and self esteem student student interaction student teacher interaction male and female students classroom management the role of the teacher special education teacher training teachers not involved in the study and curricular areas such as computer literacy learning Logo as a programming language problem solving and problem creation mathematics oral communication reading and writing the arts and values and the individual and society Findings are based on intensive examinations of real classrooms over a 2 year period A total of 433 students in 18 classrooms that involved 13 different teachers were studied of these 5 teachers and 40 students were involved in the study for 2 years Classrooms had 1

to 5 computers over the entire school year or students had access to a computer laboratory Logo and word processing were studied extensively the use of a graphics tablet and Musicland were explored for short periods Findings indicate that the creative use of computers fosters the development of independent and original thinking and that an environment that encourages exploration leads to extensive social interaction among students in addition students become more willing to express refine or revise their ideas A significantly greater proportion of students experienced an increase in their confidence and self esteem if their teacher was able to give them autonomy over their learning The impact on students attention span and cognitive development in the special education classes was also significant Appendices and selected references are provided Author JB **Resources in Education** ,1993 *Microcomputers and the Classroom Teacher* Gail A. Caissy,1987 This monograph for teachers addresses two emerging areas in the computing field providing inservice training in microcomputer use for the general teaching population and integrating the use of microcomputers into the overall curriculum A brief discussion of why computers should be used in the classroom introduces five chapters which provide overviews of the following topics 1 the use of computers in teaching and learning areas of computer use and using the computer as a teaching learning tool 2 types of software available for schools computer assisted instruction software applications software and databases 3 integrating computers into the classroom 4 developing a plan for using computers in the classroom setting up a classroom computer center and working with only one computer in the classroom and 5 evaluating educational software general questions questions about instructional design and questions about physical characteristics of the program A concluding statement argues that the key to continued growth and expansion in the educational computing field lies with classroom teachers and urges them to take an interest in computers and begin to use this important new tool in their classrooms A 71 item reference list concludes the document EW **Computers for Twenty-first Century Educators** James Lockard,Peter D. Abrams,2004 This book is for any pre or in service educator who needs to become a competent user of computer technologies to support effective learning and provide technological leadership This text provides a comprehensive discussion of electronic tools and related issues in educational technology Its emphasis on practical application makes it easy for students to understand how to use the information in the classroom New margin correlations to ISTE standards identify how the content relates to professional standards for educational technology A new emphasis on web page creation reflects one of the most popular and useful technological pursuits for teachers **Microcomputers in Education** Ian Christopher Howitt Smith,1982 *Microcomputers in Education* Duncan Sledge,1979 **Staff Development for Instructional Uses of Microcomputers** ,1984 The lack of adequately trained teachers presents a major obstacle to the effective instructional uses of microcomputers in schools For example a survey of all school districts in California revealed that over 60 percent of the teachers using computers were either unprepared or inadequately prepared Over three fourths of the districts not using computers reported that faculty had practically no preparation in instructional

computer use This shortage of trained teachers is clearly evidenced not only in California but in other states Moreover a few districts have the facilities resources staff and reward structure to offer a systematic training program for microcomputer based instruction A second factor is the number of teachers who require training Although the number of computer related courses offered at teacher training institutions is increasing the vast majority of teachers do not receive this preservice education in computer use For example in a national survey of 1200 teachers only 11 percent reported receiving some computer training in college or university
