Migration Into Rural Areas:

Migration Into Rural Areas Paul Boyle, Keith Halfacree, 1998-06-29 The idea of escaping to the countryside has caused change in the population structures of western society This book reviews the theoretical concept of counterurbanization and through case study research explores the demographic social cultural and spatial aspects of people who move into rural areas This is a summary of state of the art research in this field of population geography Population and Community in Rural America Lorraine Garkovich, 1989-10-24 The American experience has been one of constant and accelerating change Against this background American cities have exerted a magnetic pull attracting streams of migration from rural to urban areas transforming a predominantly rural society into one in which 75 percent of the people live in urban areas Population and Community in Rural America focuses on migration as the primary force for population change in rural America Within smaller more dispersed rural populations any changes in the number of births or deaths or movement in or out of the area impact community and family structures In the last half century migration studies have been the single largest area of rural population research because the consequences of migration on both community population and socioeconomic structure are usually much greater than shifts in mortality and fertility Garkovich argues that migration streams exert a cohesive force binding American communities together and that such in out migrations have contributed to a national character based on intermingled rural and urban perspectives She presents a thorough investigation of the nature of migration and its effect on other population processes and characteristics and explains why particular patterns of migration and population change have occurred at certain points in the historical development of rural America The first two chapters describe various theoretical and methodological issues review major social economic and political events of the three historical eras of rural population change and consider the social environment within which the changes occurred Chapters three through six detail rural population changes including major migration streams and the factors and outcomes associated with or attributable to these movements Chapter seven analyses institutional forces that have effected both the study and interpretation of rural population change and offers provocative suggestions A final chapter summarizes major changes in rural America explains how migration continues to shape current rural populations and identifies critical issues for future migration research An important tool for students and scholars this volume will also be of particular interest to those readers studying population migration and rural communities **Migration in South and Southern Africa** Pieter Kok (Zuid-Afrika.), 2006 Covers three broad areas macro level migration trends in sub Saharan Africa micro level factors in South African migration and a synthesis of current migration theory **Research on Migration in Africa: Past, Present, and Future** Derek Byerlee, 1972 **Population Dynamics and Livelihood Changes of Small-Scale Societies in Laos** Satoshi Yokoyama, Takahito Niwa, Hongwei Jiang, 2025-05-06 This book examines various trends in small scale societies in Laos by linking population changes to livelihood changes The primary research issues addressed in the book are as follows How are

population dynamics and livelihood changes in small scale societies interrelated What are the current demographic trends in rural areas of Laos How are the livelihoods of small scale societies maintained How is the rapid population growth common in developing countries managed In order to investigate these issues in developing countries where statistical data are not well developed it was necessary to collect information through detailed and distinctive fieldwork To this end a multidisciplinary study of geography cultural anthropology human ecology and demography was conducted in three villages in Laos and compiled as an ethnography The study included a four generation retrospective survey of population and land use change a two year survey of food dairies and a survey of the spatiotemporal distribution of residents daily activities using GIS and GPS etc The book provides valuable information on the slowdown in the rate of population growth in contemporary rural Laos Livelihoods family planning and population migration are explored in the context of the decreasing population growth rate In addition the book describes the process of adopting modern contraceptive methods in rural areas as well as the Lao government s reproductive policies and villagers responses to them It also illustrates rural rural and rural urban population migration influenced by the government s resettlement policies which encourages people to move from the highlands to the lowlands

Migration in Africa Michiel de Haas, Ewout Frankema, 2022-03-30 This book introduces readers to the age of intra African migration a period from the mid 19th century onward in which the center of gravity of African migration moved decisively inward Most books tend to zoom in on Africa s external migration during the earlier intercontinental slave trades and the more recent outmigration to the Global North but this book argues that migration within the continent has been far more central to the lives of Africans over the course of the last two centuries The book demonstrates that only by taking a broad historical and continent wide perspective can we understand the distinctions between the more immediate drivers of migration and deeper patterns of change over time During the 19th century Africa s external slave trades gradually declined whilst Africa s expanding commodity export sectors drew in domestic labor This led to an era of heightened mobility within the region marked by rapidly rising and vanishing migratory flows increasingly diversified landscapes of migration systems and profound long term shifts in the wider patterns of migration This era of inward focused mobility reduced with a resurgence of outmigration after 1960 when Africans became more deliberate in search of extra continental destinations with new diaspora communities emerging specifically in the Global North Broad ranging in its temporal spatial and thematic coverage this book provides students and researchers with the perfect introduction to age of intra African migration

Migrations in the Mediterranean Ricard Zapata-Barrero, Ibrahim Awad, 2023-10-21 This open access Regional Reader describes population movement circulating within the Mediterranean area for any reason or from any region be them European African Asian or originating from any of the Mediterranean shores It showcases a plurality of approaches to and applications of Mediterranean migration contributing to a regional approach to migration studies thereby defending this regional approach by scaling Mediterranean migration issues This book covers a

large set of questions related Mediterranean migrations to the migration research agenda such as market and economy politics and policies super diversity and intersectionality media society welfare and the environment through five main parts Geo political Mediterranean Relations Governance Policies and Politics Mobility drivers and Agency Cities History and Social Transformations and Economy and Labour Markets This Regional Reader provides an interesting read to scholars researchers but also policy makers and civil society organizations high representatives international foundations and institutions interested in linking the Mediterranean and migration

The Economics of Migration in the Volta Basin of Ghana Daniel Tsegai,2005 **Farmworkers in Rural America, 1971-1972** United States. Congress. Senate. Committee on Labor and Public Welfare. Subcommittee on Migratory Labor,1972 Tourism, Mobilities, and Development in Sparsely Populated Areas Doris Carson,Dean Carson,Linda Lundmark,2017-10-02

Tourism mobilities are not restricted to the movement of tourists between places of origin and destinations Particularly in more peripheral remote or sparsely populated destinations workers and residents are also likely to be frequently moving between locations Such destinations attract seasonal or temporary residents sometimes with only loose ties to the tourism industry These flows of mobile populations are accompanied by flows of other resources money knowledge ideas and innovations which can be used to help the economic and social development of the destination This book examines key aspects of the human mobilities associated with tourism in sparsely populated areas and investigates how new mobility patterns inspired by technological economic political and social change provide both opportunities and risks for those areas Examples are drawn from the northern peripheries of Europe and the north of Australia and the book provides a framework for continuing research into the role that tourism and new mobilities can play in regional development in these locations This book was originally published as a special issue of the *Scandinavian Journal of Hospitality and Tourism*

Migration and Development in India Amrita Datta,2022-09-30 This book deals with a wide range of issues related to rural urban migration in the context of neoliberal economic development in India Focusing on three core areas first it traces state discourses on rural urban migration in India since the 1930s critically analysing its industrial labour rural and urban programmes and policies Second through data on longitudinal surveys undertaken in rural Bihar in 1999 2011 and 2016 it examines changes in patterns of migration and sources of income estimates determinants and impacts of migration Third based on fieldwork in the village and the city it presents an in depth account of a rural urban migration stream in contemporary India It shows how contrary to the results of conventional data sources such as the Census and NSSO that mobility is high in rural Bihar and has significantly increased over time as a result of rising labour demand in distant urban markets elsewhere in India Further it also provides evidence of decoupling of agriculture from the rural in India Combining quantitative and qualitative methods in development research this book will be of great interest to scholars and researchers of development studies migration studies development economics sociology demography public policy and South Asian studies

Sexual Cultures and Migration in the Era of AIDS Gilbert Herdt, 1997-05-29 Sexual Cultures and Migration in the Era of AIDS is the first demographic anthropological study of what happens to sexual behaviour and the rules of risk taking in sexual encounters when people migrate from countryside to city from one city to another or from one country to another culture It represents a milestone in the study of cross cultural sexuality and sexually transmitted diseases At the foreground of the study are commercial sex and prostitution sexual tourism heterosexual marriage and social pressure and homosexuality and bisexuality in emerging sexual cultures The volume brings together quantitative and qualitative case studies by an international panel of anthropologists demographers and sociologists aimed at better understanding the impact of human movement and mobility on sexual change and fertility Migration in the Service of African Development John O. Oucho, 2012-12-19 Fifteen chapters are included here in this compendium in honour of the Nigerian migration scholar Professor Aderanti Adepoju Though the authors come from diverse disciplinary backgrounds geography demography sociology and law they all work within the fields of internal and international migration in Africa Chapters on Uganda Kenya Botswana Nigeria and Mali are devoted to aspects of internal migration while those on African emigration to Mexico and migration between Burkina Faso and Cote d'Ivoire address various aspects of international migration Migration issues in relation to women students and climate change are also discussed World Development Report 2008 World Bank, 2007-10-15 The world's demand for food is expected to double within the next 50 years while the natural resources that sustain agriculture will become increasingly scarce degraded and vulnerable to the effects of climate change In many poor countries agriculture accounts for at least 40 percent of GDP and 80 percent of employment At the same time about 70 percent of the world's poor live in rural areas and most depend on agriculture for their livelihoods World Development Report 2008 seeks to assess where when and how agriculture can be an effective instrument for economic development especially development that favors the poor It examines several broad questions How has agriculture changed in developing countries in the past 20 years What are the important new challenges and opportunities for agriculture Which new sources of agricultural growth can be captured cost effectively in particular in poor countries with large agricultural sectors as in Africa How can agricultural growth be made more effective for poverty reduction How can governments facilitate the transition of large populations out of agriculture without simply transferring the burden of rural poverty to urban areas How can the natural resource endowment for agriculture be protected How can agriculture's negative environmental effects be contained This year's report marks the 30th year the World Bank has been publishing the World Development Report Modern Migrations in Western Africa Samir Amin, 2018-08-16 Originally published in 1974 this volume deals with studies of migration from census and other data variations in scale distance and duration of various types of migration social relations of migrant populations with their home areas and their host communities and expectations and valuation of migrants concerning rural and urban life It also examines interrelations between levels of migration labour supply wage rates and unemployment in

urban centres the impact of different types of migration on the national economy and economic planning and government measures and conflicting interests of the labour supplying and receiving countries The introduction analyses the main economic and political factors and the socio economic consequences and problems brought about by migrations in and between territories **CBSE Geography Class 12** Dr. Chaturbhuj Mamoria, Dr. Abha Singh, 2025-10-17 Part A
