Phan,2025-03-04 Among the world s languages Vietnamese provides unique insight into the cosmopolitan dynamism of premodern Asia Modern notions of language history are often constrained by nationalist narratives focused on bolstering a particular nation s social cultural or political identities A closer look at the Vietnamese language reveals a rich record of interaction and transformation that does not fit easily within modern nation state lines or boundaries By employing philological textual and comparative linguistic methodologies John D Phan uncovers the history of a Sinitic language rooted in the Red River Plain of northern Vietnam which he calls Annamese Middle Chinese The life and death of this language stimulated dramatic transformations in the speech of the region ultimately giving rise to a new and alloyed language over the early centuries of the second millennium Vietnamese Drawing connections among linguistic demographic intellectual and cultural realities over time Phan traces the story of the emergence of Vietnamese within the broader context of a cosmopolitan East and Southeast Asia Lost Tongues of the Red River demonstrates how language forms a surprisingly

intimate record of human interaction one with unique potential to enrich and expand our understanding of the distant past

Mon-Khmer: Peoples of the Mekong Region Ronald D. Renard, Kr. Anchalee Singhanetra Renard, 2015-03-01 The Mon Khmer project took a long journey before it was turned into a final product the first comprehensive collection of articles on Mon Khmer peoples of the Mekong Region The project was started in 2001 by the first editor of the book Dr Ronald D Renard who unfortunately did not see the final product of his valuable work During 1995 1996 Dr Ron Renard as the manager of the UNDP Highland People project and I travelled to Northeast Cambodia Vietnam and Laos to explain to representatives of ethnic communities the aim of the project and how the ethnic minorities many of whom are Mon Khmer could be involved and benefit from it It may well be that this encounter with these ethnic groups made him expand his intellectual interest to study them in addition to the Karen in Thailand whose history of integration into the Siamese state he had studied for his dissertation completed in 1980 According to my last conversation with Ron it was during the time when he worked for the Journal of Siam Society in the late 1990s that he decided to embark upon the Mon Khmer project which preoccupied the last part of his academic life

The Languages and Linguistics of South Asia Hans Henrich Hock, Elena Bashir, 2016-05-24 With nearly a quarter of the world's population members of at least five major language families plus several putative language isolates South Asia is a fascinating arena for linguistic investigations whether comparative historical linguistics studies of language contact and multilingualism or general linguistic theory This volume provides a state of the art survey of linguistic research on the

languages of South Asia with contributions by well known experts Focus is both on what has been accomplished so far and on what remains unresolved or controversial and hence offers challenges for future research In addition to covering the languages their histories and their genetic classification as well as phonetics phonology morphology syntax and sociolinguistics the volume provides special coverage of contact and convergence indigenous South Asian grammatical traditions applications of modern technology to South Asian languages and South Asian writing systems An appendix offers a classified listing of major sources and resources both digital online and printed

Case, Typology, and Grammar Anna Siewierska, Jae Jung Song, 1998-01-01 The present volume is a collection of fifteen original articles that include descriptive typological and or theoretical studies of a number of morphosyntactic phenomena such as case transitivity grammaticalization valency alternations etc in a variety of languages or language groups and discussions concerning theoretical issues in specific grammatical frameworks The collection written in honor of the Australian linguist Barry J Blake on his 60th birthday thematically reflects the field that Professor Blake has worked in over the past three decades The volume will be of special interest to researchers in morphosyntax and linguistic typology In addition scholars in discourse grammar historical linguistics theoretical syntax semantics language acquisition and language contact will find articles of interest in the book

A Guide to Austroasiatic Speakers and Their Languages Robert Parkin, 1991 **Ideophones** Erhard Friedrich Karl Voeltz, Christa Kilian-Hatz, 2001-01-01 The present volume represents a selection of papers presented at the International Symposium on Ideophones held in January 1999 in St Augustin Germany They center around the following hypotheses Ideophones are universal and constitute a grammatical category in all languages of the world ideophones and similar words have a special dramaturgic function that differs from all other word classes they simulate an event an emotion a perception through language In addition to this unique function a good number of formal parallels can be observed The languages dealt with here display strikingly similar patterns of derivational processes involving ideophones An equally widespread common feature is the introduction of ideophones via a verbum dicendi or complementizer Another observation concerns the sound symbolic behavior of ideophones Thus the word formation of ideophones differs from other words in their tendency for iconicity and sound symbolism Finally it is made clear that ideophones are part of spoken language the language register where gestures are used rather than written language

The Effects of Duration and Sonority on Countour Tone Distribution Jie Zhang, 2013-12-16 First Published in 2002 Part of the Outstanding Dissertations in Linguistics series this is an in depth investigation of the effects of duration and sonority on contour tone distribution The term tone language usually refers to languages in which the pitch of a syllable serves lexical or grammatical functions In some tone languages the contrastive functions of pitch are sometimes played by pitch changes within a syllable Pitch changes of this kind are called contour tones The distribution of contour tones in a language are when under what phonological contexts contour tones are more readily realized

Linguistics of Vietnamese Daniel Hole, Elisabeth Löbel, 2013-05-28 The present

collection of articles grew out of a workshop on Vietnamese linguistics in 2009 at the University of Stuttgart Germany To our knowledge no workshop with a comparable scope has been held outside of Vietnam for the past 20 years or even longer Given the important typological status of Vietnamese as a paradigm case of an isolating language the volume covers the most relevant fields in linguistics syntax semantics phonology and the lexicon A guiding principle in assembling the chapters for this volume has been to take an inclusive stance as far as the commitment to different frameworks and research methodologies is concerned All the contributors are proponents of recent developments in their individual areas of specialization The editors have taken special care to cater for a readership which should be as broad as possible This means that each contribution is self contained and does not presuppose any knowledge of Vietnamese The volume is recommended to general linguists comparative linguists typologists and to researchers specializing in languages of East and South East Asia
