Faculty of Law,2003 **A History of the Modern Australian University** Hannah Forsyth,2014-10-01 In 1857 all of the Arts students at the University of Sydney could fit into a single photograph Now there are more than one million university students in Australia After World War II Australian universities became less elite but more important growing from six small institutions educating less than 0.2 per cent of the population to a system enrolling over a quarter of high school graduates And yet universities today are plagued with ingrained problems More than 50 per cent of the cost of universities goes to just running them They now have an explicit commercial focus They compete bitterly for students and funding an issue sharply underlined by the latest federal budget Scholars rarely feel their vice chancellors represent them and within their own ranks academics squabble for scraps Knowing Australia is a perceptive clear eyed account of Australian universities recounting their history from the 1850s to the present Investigating the changing nature of higher education it asks whether this success is likely to continue in the 21st century as the university s hold over knowledge grows ever more tenuous **First Principles** John Waugh,2007 History of Melbourne Law School within the University of Melbourne Provided by publisher *No End of a Lesson* Stuart Macintyre,André Brett,Gwilym Croucher,2017-10-02 A revolution swept through universities three decades ago transforming them from elite institutions into a mass system of higher education Teaching was aligned with occupational outcomes research was directed to practical results Campuses grew and universities became more entrepreneurial Students had to juggle their study requirements with paid work and were required to pay back part of the cost of their degrees The federal government directed this transformation through the creation of a Unified National System How did this happen What were the gains and the losses *No End of a Lesson* explores this radical

reconstruction and assesses its consequences      Higher Education Reform in China W. John Morgan,Bin Wu,2011-03-31 A major transformation of Chinese higher education HE has taken place over the past decade China has reshaped its higher education sector from elite to mass education with the number of graduates having quadrupled to three million a year over six years China is exceptional among lower income countries in using tertiary education as a development strategy on such a scale aiming to improve the quality of its graduates and make HE available to as many of its citizens as possible This book provides a critical examination the challenges to the development and sustainability of higher education in China Can its universities move from quantity to quality How will so many graduates find jobs in line with their expectations Can Britain and other western countries continue to benefit from China s education boom What are the prospects for collaboration in research This book evaluates the prospects for Chinese and foreign HE providers regulators and other stakeholders It introduces the key changes in China s HE programme since the Opening Up policy in 1978 and analyses the achievements and the challenges over the subsequent three decades Furthermore it sheds light on new reforms that are likely to take place in the future particularly as a result of the ongoing international financial crisis      **Cultural Diplomacy: Beyond the National Interest?** Ien Ang,Yudhishtir Isar,Phillip Mar,2018-02-02 Cultural Diplomacy Beyond the National Interest is the first book bringing together from the perspective of the cultural disciplines scholarship that locates contemporary cultural diplomacy practices within their social political and ideological contexts while examining the different forces that drive them The contributions to this book have two methodologies the first to deconstruct and demystify cultural diplomacy notably the hype that accompanies it especially when it is yoked to the notion of soft power the second to better understand how contemporary cultural diplomacy actually operates In applying a cultural lens to the question this book probes whether there can be such a thing as a cultural diplomacy beyond the national interest This book was originally published as a special issue of the International Journal of Cultural Policy      *The Enterprise University* Simon Marginson,Mark Considine,2000-10 Throughout the industrialised world universities have undergone remarkable changes since the mid 1980s In Australia interest has been intense and publication of *The Enterprise University* was very timely First published in 2001 it was the first systematic study of the Australian system since the momentous Dawkins reforms ten years earlier The book is grounded in case studies of most of the major Australian universities the authors interviewed a large number of senior managers They also have taken account of global trends and have prepared the book in the light of international research on the university as an institution The authors contend that the modern university can be understood as an enterprise university characterised by corporate style executive leadership In a hard hitting conclusion they propose novel policies and directions for Australia s higher education system      **Australian Economic History** Claire E. F. Wright,2022-06-02 In a time of pandemics war and climate change fostering knowledge that transcends disciplinary boundaries is more important than ever Economic history is one of the world s oldest interdisciplinary fields with its prosperity dependent on connection and relevance to disciplinary

behemoths economics and history Australian Economic History is the first history of an interdisciplinary field in Australia and the first to set the field's progress within the structures of Australian universities It highlights the lived experience of doing interdisciplinary research and how scholars have navigated the opportunities and challenges of this form of knowledge These lessons are vital for those seeking to develop robust interdisciplinary conversations now and in the future This previously untold story of economic history in Australia exposes the centrality of economic thought and scholarship to Australian intellectual and political life Deftly positioning economic history in an innovative institutional place based and person focused narrative Claire Wright entangles economics with the history of education to produce a tale of university interdisciplinarity influence and impact Written with vitality and bursting with both data and anecdote this book makes an exceptional contribution to the intersecting fields of history economics and higher education studies Hannah Forsyth author of A History of the Modern Australian University Few readers would expect to find a classical tragedy in the story of an academic field Yet that is what Claire Wright shows us in this study of Economic History as it has been practiced in Australia She traces the field from legendary beginnings to triumphant growth to organisational collapse and renaissance on other terms Carefully researched and vigorously written this book raises questions about disciplines and interdisciplinary fields universities and markets and social bases of intellectual work that are relevant to all fields today Raewyn Connell author of The Good University Australia proved a pioneer in the study of economic history nurturing a discipline with innovative data and understanding of material trends Yet by the 1990s economic history departments closed as senior scholars retired and the field was subsumed by conventional economics In this absorbing study Dr Claire Wright challenges the conventional account She is tough minded about financial and institutional pressures on the field but cautiously optimistic about the future It is a mistake she argues to see institutional representation as the benchmark of influence Instead the interdisciplinary nature of economic history has encouraged new research and teaching across the humanities and social sciences With close attention to individual scholars and their university departments and a deep sense of the trajectory of the field Australian Economic History Transformations of an Interdisciplinary Field is an original and important contribution to Australian intellectual history Glyn Davis Distinguished Professor of Political Science in the Crawford School of Public Policy The Australian National University

**Multi-Level Governance in Universities** Jetta Frost, Fabian Hattke, Markus Reihlen, 2016-06-03

Governing universities is a multi level as well as a highly paradoxical endeavor The featured studies in this book examine critically the multifaceted repercussions of changing governance logics and show how contradictory demands for scholarly peer control market responsiveness public policy control and democratization create governance paradoxes While a large body of academic literature has been focusing on the external governance of universities this book shifts the focus on organizations internal characteristics thus contributing to a deeper understanding of the changing governance in universities The book follows exigent calls for getting back to the heart of organization theory when studying organizational change and

turns attention to strategies structures and control mechanisms as distinctive but interrelated elements of organizational designs We take a multi level approach to explore how universities develop strategies in order to cope with changes in their institutional environment macro level how universities implement these strategies in their structures and processes meso level and how universities design mechanisms to control the behavior of their members micro level As universities are highly complex knowledge based organizations their modus operandi i e governing strategies structures and controls needs to be responsive to the multiplicity of demands coming from both inside and outside the organization **Hollywood Remaking**

Kathleen Loock,2024-03-26 From the inception of cinema to today s franchise era remaking has always been a motor of ongoing film production Hollywood Remaking challenges the categorical dismissal in film criticism of remakes sequels and franchises by probing what these formats really do when they revisit familiar stories Kathleen Loock argues that movies from Hollywood s large scale system of remaking use serial repetition and variation to constantly negotiate past and present explore stability and change and actively shape how the film industry cinema and audiences imagine themselves Far from a simple profit making exercise remaking is an inherently dynamic practice situated between the film industry s economic logic and the cultural imagination Although remaking developed as a business practice in the United States this book shows that it also shapes cinematic aesthetics and cultural debates fosters film historical knowledge and promotes feelings of generational belonging among audiences Knowledge Production in European Universities Kwiek Marek,2012-11-23 The book studies transformations of European universities in the context of globalization and Europeanization the questioning of the foundations of the Golden Age of the Keynesian welfare state public sector reforms demographic changes the massification and diversification of higher education and the emergence of knowledge economies Such phenomena as academic entrepreneurialism and diversified channels of knowledge exchange in European universities are linked to transformations of the state and changes in public sector services The first contextual part of the book studies the changing state university relationships and the second empirically informed part draws from several recent large scale comparative European research projects **Facing North Volume 2** David Goldsworthy,Peter Edwards,2015-03-02 Facing North is the first substantial history of Australia s relations with Asia since Federation Volume 1 2001 chronicles Australian Asian relations from 1901 to the 1970s Volume 2 now carries the story through the last decades of the century Both make extensive use of official government sources and of the private collections of ministers and public servants This volume discusses the changing relations between Australia and Asia in the period from the 1970s to 2000 Over this time integration became a dominant theme as Australia looked increasingly to its near neighbours to form political social and economic alliances An important driving force behind this direction was the economic opportunities presented by Asia At the same time Australia championed the rights of Asian countries to self determination economic development and an independent role in international affairs The book combines the discussion of broad policy themes with detailed analysis of policy making in relation to particular issues

such as human rights and episodes such as the crisis in East Timor At home a key concern was the question of difference between Australian and Asian values As Australia began accepting significant numbers of immigrants from the region the country's national identity and the extent to which it identified with Asia became matters of intense debate Australian society itself has changed as a result Facing North is essential reading for anyone who wants to better understand Australia's present relations with Asian countries and our future choices *Film Reboots* Daniel Herbert,2020-08-18 No detailed description available for Film Reboots Film Remakes, Adaptations and Fan Productions K.
