Monasteries Of Ireland:

The Monasteries of Ireland Daphne Desiree Charlotte Pochin Mould, 1976 *The Monasteries of Ireland* Daphne D. C. Pochin Mould, 1976 **A Monastic Landscape** Dr Breda Lynch, 2010-11-05 This publication is primarily a study of the various aspects of the use and situation of the land held by the Cistercian order in medieval Leinster. A number of key topics form the central elements of this study. These include an examination of the physical landscape into which the Cistercian order settled and the changes that occurred within that landscape during the later medieval era. The book examines whether the location of the monasteries indicated any underlying nuances or if the monks were happy to settle wherever they were given land. The involvement of the Cistercian order in the agricultural and economic life of Leinster is also examined. A breakdown of the acreage and land type that the monasteries possessed is presented and in the final section the state of the monasteries immediately prior to the dissolution of the religious houses in the period 1536-41 is determined. With regard to this final section the areas of interest are in relation to the physical remains of the monasteries, the productivity or otherwise of the associated lands, the organisation and location of that land and the general attitude of the Cistercian monks at that particular time in history. There are many different areas of study that were examined. These include the identification of the lands, the land type and trends or differences in this type when compared with other parts of the country. The organisation of the land and the uses of it in relation to the monastery are an essential aspect of the work and it is possible to identify economic and social change by discussing the uses of that land. The identification of granges and grange buildings was not originally intended as part of this work, however research has allowed some evidence to emerge in relation to these buildings and is included. In relation to the approach a short chapter outlining the origins of monasticism and the emergence of the Cistercian Order is included. A brief outline of the governing rules of the Cistercians is included in chapter one as is a short discussion on the spread of the order up to its arrival in Ireland. The second chapter is merely intended to give an idea of the pattern of the distribution of the Cistercian monasteries in Ireland. Most of the information is in table form giving the monastery, its location, date of foundation and founder. From this a number of observations can be made. The principal area of study is Leinster, therefore chapter three deals with this territory, discussing its boundaries, both internal and external, and the kingdoms that made up medieval Leinster. The fact that the monasteries of Leinster were situated in very well defined territories means that although the study is of Leinster as a whole, these smaller, somewhat independent units were still an important element in both the landscape and the social framework of the period. As such it was necessary to ensure that each of these units was represented in any category of study. The location of the monasteries is the focus of the second portion of chapter three. Both the natural and man-made features of the landscape are examined here. The proximity of road and route ways to the monasteries has been mapped and discussed and any trends or patterns commented upon. Chapter four deals with the monastic complex and the associated features. It discusses the way in which the monastery and its lands were

organised and the reasons for this This chapter deals more with the day to day requirements of the monks and indicates how both the land and the buildings within the complex were equally important and key elements in the functioning of the monasteries Following from chapter four and keeping earlier comments in mind the next portion of the work deals with other land that particular monasteries may have held at any time from foundation up to the time when the extents of the monastic possessions were drawn up Instead of looking *Early Irish Monasteries* Conleth Manning,1995-01-01 A succinct account of Ireland s medieval centers of learning **The Modern Traveller to the Early Irish Church** Kathleen Hughes,Ann Hamlin,1977 The monastic sites of early Christian Ireland have always been an attraction to visitors Now issued in a new edition this book is intended for use by those who wish to understand the religious and secular life of early Ireland The authors have used the site remains and historical source material to reconstruct the life of Irish monks and laymen from the fifth to the twelfth centuries Here the reader will find treatments of the function of monasteries in early Ireland the daily life of their inhabitants and the significance of their art and sculpture The appendices include a county by county guide to the most interesting early Christian sites **The Early Irish Monastic Schools** Hugh Graham,1923 *Monasteries and Religious Houses of Great Britain and Ireland* Darley Dale,Francesca Maria Steele,1903 **The Early Monastic Schools of Ireland: Their Missionaries, Saints and Scholars** W.
