Mondrian Studies:

Mondrian Studies Kermit Swiler Champa, 1985 **Mondrian Flowers** David Shapiro, 1991 With 57 full color plates this book reveals a side of the great Dutch born abstract painter Piet Mondrian rarely seen In delicate portraits of roses lilies amaryllis chrysantheums and sunflowers Mondrian proves that he ranks with Georgia O Keeffe as one of this century s most gifted painters of flowers 75 illustrations 57 in full color Mondrian's Philosophy of Visual Rhythm Eiichi Tosaki, 2017-11-15 This volume investigates the meaning of visual rhythm through Piet Mondrian s unique approach to understanding rhythm in the compositional structure of painting drawing reference from philosophy aesthetics and Zen culture Its innovation lies in its reappraisal of a forgotten definition of rhythm as stasis or composition which can be traced back to ancient Greek thought This conception of rhythm the book argues can be demonstrated in terms of pictorial strategy through analysis of East Asian painting and calligraphy with which Greek thought on rhythm has identifiable commonalities The book demonstrates how these ideas about rhythm draw together various threads of intellectual development in the visual arts that cross disparate aesthetic cultural practices As an icon of early 20th Century Modernism Mondrian s neoplasticism is a serious painterly and philosophical achievement In his painting Mondrian was deeply influenced by Theosophy which took its influence from Eastern aesthetics particularly East Asian and Indian thought However Mondrian s approach to visual rhythm was so idiosyncratic that his contribution to studies of visual rhythm is often under recognized This volume shows that a close inspection of Mondrian s own writing thinking and painting has much to tell scholars about how to understand a long forgotten aspect of visual rhythm Rodin s famous criticism of photography athlete in motion is forever frozen can be applied to Muybridge s zoopraxiscope the Futurists rendition of stroboscopic images and Duchamp s *Nude Descending a Staircase* Through a comparative study between Mondrian s painting and these seminal works this volume initiates a new convention for the cognition of the surface of painting as visual rhythm Mondrian s simultaneous emphasis on the static and the rhythmic is hardly fodder for a publicist Eiichi Tosaki has taken on the challenge of elucidating Mondrian s theories of rhythm and particularly his conception of static rhythm The result is a tour de force that will forever alter the reader s encounter with the works of Mondrian Prof Kathleen Higgins The Truthful and the Good J.J. Drummond, J.G. Hart, 2013-12-11 This volume was occasioned by the desire of its contributors to honor Robert Sokolowski on his sixtieth birthday The desire first took form on the streets of an American metropolis when several of us while attending a philosophy conference were bemoaning the lack of passion for doing philosophy as we all conceived it In this expression of our discontent we all had a common exemplar in mind someone for whom the passion for the truthful and the good is embodied in every sentence of his rich writings Felicitously this very thinker was someone whom we can regard as manifesting in his person and life these same properties which his writings exhibit and pursue as luminous ideals As a result John Brough John Drummond and I came up with the idea that we hold our own conference and do philosophy as we envisage it and at the

same time honor its foremost exemplary practitioner whose sixtieth birthday was the following year Immediately the idea took wings among the handful of us and the dreariness of that philosophy congress receded The first task of thinking of possible speakers was easy The issue of the venue for our symposium what I like to call the Sokofest had to be decided as well as the details of its realization

Palmer, 2012-01-02 What do we do when we view a work of art What does it mean to have an aesthetic experience Are such experiences purely in the eye of the beholder This book addresses the nature of aesthetic experience from the perspectives of philosophy psychology and neuroscience

Naturalized Aesthetics Richard A. Richards, 2022-06-29 This book bridges the gap between the many insights into art provided by research in evolutionary theory psychology and neuroscience and those enduring normative issues best addressed by philosophy The sciences have helped us understand how art functions our art preferences and the neurological systems underlying our engagement with art But we continue to rely on philosophy to tell us what is truly good in art how we should engage with art and the conceptual basis for this engagement Naturalized Aesthetics A Scientific Framework for the Philosophy of Art integrates a systematic and comprehensive naturalism grounded in the sciences with an ecology of art It shows how the environments in which we make and experience art our engineered art niches affect the practice and experience of art and generate normativity the goods and the shoulds in our engagement with art There are in effect two streams of normativity according to this book a niche dependent social impersonal and objective stream and a niche independent individual personal and subjective stream Recognition of these two streams allows us to make progress in long standing and unresolved philosophical disputes about how to interpret evaluate and conceive art

Key Features Provides a structured and critical introduction to the scientific accounts of art based on evolutionary thinking psychology and neuroscience Develops an ecology of art based on the insight that we engage with art in engineered niches Presents a naturalistic account of normativity based on the recognition of two streams a niche dependent social impersonal and objective stream and a niche independent individual personal and subjective stream Serves as an introduction and critical analysis of the debates about the interpretation evaluation and definitions of art

Koopmans,Arend H. Huussen Jr.,2007-05-22 The Netherlands frequently but erroneously called Holland is one of the most densely populated countries in the world In the past few decades it has been undergoing many transformations made possible by its dynamic and fast moving political landscape It has shifted from fierce nationalism toward a self image of tolerance and permissiveness the national identity and self consciousness has slowly eroded through decolonization and immigration Unfortunately several murders of prominent controversial politicians have started yet another shift away from tolerance and economic stagnation has bred pessimism Nonetheless despite many trials and tribulations there has been real progress and the Dutch have perhaps done a better job of coming to terms with their limitations than many others in the world The second edition of the Historical Dictionary of the Netherlands contains more than 700 cross referenced dictionary entries on individual topics spanning the Netherlands political economic and social system along with short biographies on important figures who have shaped the Netherlands history Supplementing the entries are a list of acronyms and abbreviations a chronology an introduction appendixes and a bibliography making this a superb quick reference on the Netherlands **Seeing Through Paintings** Andrea Kirsh,Rustin S. faith with the initiators of abstract painting Joseph Masheck reveals how an underlying religiosity informed some of our most important abstract painters Covering Wassily Kandinsky Kazimir Malevich Piet Mondrian and El Lissitzky Masheck shows how revealed religion has been an underlying but fundamental determinant of the thinking and practice of abstract painting from its very originators He contextualizes their art within some of the historical moments of the early 20th century including the Russian revolution and the Stalinist period and explores the appeal of certain themes such as the Passion of Christ A radical new theorization of the influence of religion over visual art Faith in Art asks why metaphysics has been eliminated from the discussion where it might have something to say This is a new way of thinking about a hundred years of abstract painting

The Language of Displayed Art Michael O'Toole, 1994 Drawing on his background as a linguist O Toole analyses in detail a number of major works of art to show how the semiotic approach relates a work's immediate impact to other aspects of our response to it to the scene portrayed to the social intellectual and economic world within which the artist and his or her patrons worked and to our own world It further provides ways of talking about and interrelating aspects of composition technique and the

Invisible, but how? The depth of unconscious processing as inferred from different suppression techniques. Julien Dubois, Nathan Faivre, 2015-02-09 To what level are invisible stimuli processed by the brain in the absence of conscious awareness It is widely accepted that simple visual properties of invisible stimuli are processed however the existence of higher level unconscious processing e g involving semantic or executive functions remains a matter of debate Several methodological factors may underlie the discrepancies found in the literature such as different levels of conservativeness in the definition of unconscious or different dependent measures of unconscious processing In this research topic we are particularly interested in yet another factor inherent differences in the amount of information let through by different suppression techniques In the same conditions of well controlled conservatively established invisibility can we show that some of the techniques in the psychophysical magic arsenal e g masking but also visual crowding attentional blink etc reliably lead to higher level unconscious processing than others e g interocular suppression Some authors have started investigating this question using

multiple techniques in similar settings We argue that this approach should be extended and refined Indeed in order to delineate the frontiers of the unconscious mind using a contrastive method one has to disentangle the limits attributable to unawareness itself and those attributable to the technique inducing unawareness The scope of this research topic is to provide a platform for scientists to contribute insights and further experiments addressing this fundamental question
