Monet Deluxe 2004 Engagement Calendar:

Offshore Financial Centres and the Law Dominic Thomas-James, 2021-07-15 This book considers the ability of island jurisdictions with financial centres to meet the expectations of the international community in addressing the threats posed to themselves and others by their innocent or otherwise facilitation of the receipt of suspect wealth In the global financial architecture British Overseas Territories are of material significance Through their inalienable right to self determination many developed offshore financial centres to achieve sustainable economic development Focusing on Bermuda Turks and Caicos and Anguilla the book concerns suspect wealth emanating from financial crimes including corruption money laundering and tax evasion as well as controversial conduct like tax avoidance This work considers the viability of international standards on suspect wealth in the context of the territories how willing or able they are to comply with them and how their financial centres can better prevent receipt of suspect wealth While universalism is desirable in the modern approach to tackling suspect wealth a one size fits all approach is inappropriate for these jurisdictions On critically evaluating their legislative and regulatory regimes the book advances that they demonstrate willingness to comply with international standards However their abilities and levels of compliance vary In acknowledging the facilitatively harmful role the territories can play this work draws upon evidence of implication in transnational financial crime cases Notwithstanding this the book questions whether the degree of criticism that these offshore jurisdictions have encountered is warranted in light of apparent willingness to engage in the enactment and administration of internationally accepted laws and cooperate with international institutions
