*Monetary Policy in Europe after Maastricht* Wilhelm Noelling, trans Brian Rasmussen, 1993-05-11 What shape will Europe's future take Can the full economic and monetary union envisaged for the end of the century be achieved Is Maastricht the right way forward In this book Nolling subjects the Treaty to a dispassionate and searching scrutiny He concludes that the attempt to achieve monetary union within such a short space of time is fraught with dangers and unlikely to advance Europe's economic and political fortunes Maastricht could well fail And what then Nolling argues that there are other ways forward and in this book he suggests a number of realistic alternatives **European Monetary Integration** Paul J.J.

Welfens, 2012-12-06 EU monetary integration was reinforced in the 1980s when macroeconomic convergence and a dominant role of the German Bundesbank created the basis for relatively stable exchange rates and increasing EU trade volumes The analysis here focuses on the EMS crisis of 1992-93 the topic of optimum currency areas and the problem of fiscal policies and regional stabilization in Europe the US and Canada This book gives an assessment of the EMS developments and shows how financial market liberalization as well as the EU single market project affect the process of economic and monetary union The role of currency substitution and problems of the Bundesbank's monetary policy control in a changing international system are evaluated *The Single European Currency in National Perspective* B. Moss, 2019-06-12 This is the first book to look at the European Union and single currency from the perspective of member states It offers a systematic critique of the project from the viewpoint of labor and employment

**Economic Aspects of German Unification** Paul J.J. Welfens, 2012-12-06 Paul J.J. Welfens The editor is pleased to present a second edition of *Economic Aspects of German Unification* which includes new chapters and several postscripts Almost five years after unification output in the ex GDR is back to its 1989 level Due to a massive intra German resource transfer consumption per capita in eastern Germany has not fallen as much as output and employment which reduced by one fifth within three years Given high West German transfers which represented about 5% of West German GDP and more than 50% of East German GDP the fall of industrial output could have been much stronger than had politically been feasible Hence structural change necessary for productivity growth was dramatic in the ex GDR where the goods producing sector manufacturing mining energy and construction strongly changed its proportions within four years construction almost doubled and the share of investment goods production reduced by 10 percentage points between 1990 and 1994 and is now down to 21.1% Mining lost two thirds of its share in the producing sector which itself was reduced relative to GDP The share of the services industry increased by 5 percentage points between 1991 and 1994 but with a share of 27.7% in East Germany's GDP it was still about 9 percentage points lower than in western Germany By contrast government accounted for 20.9% of GDP in eastern Germany but for only 13.2% in western Germany *The Road to Monetary Union in Europe* Tommaso Padoa-Schioppa, 2000 This insider's guide to a topical issue is designed to be of use to students academics policymakers and commentators alike It contains extracts from documents and a chronology The

Flight of Icarus Yiannis Drossos, 2020-12-10 This book provides a detailed analysis of the institutional transformations brought about by the financial crisis focusing on the institution building course of Europe and the Constitution bending course in several Member States It discusses the seemingly contradictory interplay between national and European institutions and the law resulting from the crisis arguing that the anti crisis exceptionality constitutes the matrix of the new normality of the reformed European economic governance The author carries out a critical analysis of the new economic governance and its case law with regular reference to relevant political episodes key economic figures and to the hitherto lax modes and rules The author also offers deep insights into the Greek adjustment programme and the crisis related Greek and Portuguese constitutional case law presented in comparison with the German and French case law The book concludes with a critical overview of the profound mutations in the role of national Constitutions instigated by the new European economic governance and the emergence of a democratically deficient meta constitutional mode of functioning of both the European institutions and national Constitutions      *Nouvelles universitaires européennes* ,1997      **European Monetary Union and Exchange Rate Dynamics** Paul J.
