Hulten, Edwin R. Dean, Michael Harper, 2007-11-01 The productivity slowdown of the 1970s and 1980s and the resumption of productivity growth in the 1990s have provoked controversy among policymakers and researchers Economists have been forced to reexamine fundamental questions of measurement technique Some researchers argue that econometric approaches to productivity measurement usefully address shortcomings of the

dominant index number techniques while others maintain that current productivity statistics underreport damage to the environment In this book the contributors propose innovative approaches to these issues The result is a state of the art exposition of contemporary productivity analysis Charles R Hulten is professor of economics at the University of Maryland He has been a senior research associate at the Urban Institute and is chair of the Conference on Research in Income and Wealth of the National Bureau of Economic Research Michael Harper is chief of the Division of Productivity Research at the Bureau of Labor Statistics Edwin R Dean formerly associate commissioner for Productivity and Technology at the Bureau of Labor Statistics is adjunct professor of economics at The George Washington University **James Tobin** Willem H. Buiter, 2003 Jim Tobin who died on March 11 2002 at the age of 84 was one of giants of economics of the second half of the twentieth century and the greatest macroeconomist of his generation Tobin s influence on macroeconomic theory is so pervasive so much part of our professional acquis that many younger economists often are not even aware that it is his ideas they are elaborating testing criticising refuting or re inventing In this Appreciation I consider Tobin s scholarly contributions made over a period of more than 50 years Tobin received the 1981 Nobel Memorial Prize for his analysis of financial markets and their relations to expenditure decisions employment production and prices I consider his contributions to mean variance portfolio demand and asset pricing theory especially the Portfolio Separation Theorem pitfalls in financial model building portfolio balance and flow of funds models and the credit channel the life cycle model and social security econometric methodology including the Tobit estimator and his pioneering work using both time series and cross sectional data to estimate food demand functions economic growth Tobin s the Tobin Tax the monetary and fiscal policy effectiveness debate first with Milton Friedman and then with the New Classical Macroeconomics and Real Business Cycle schools and Tobin s approach to methodological questions including microfoundations and aggregation Working Paper Series ,2003
