disappointment why Argentina persistently failed to achieve sustained economic stability during the twentieth century is an issue that has mystified scholars for decades In *Straining the Anchor* Gerardo della Paolera and Alan M Taylor provide many of the missing links that help explain this important historical episode Written chronologically this book follows the various fluctuations of the Argentine economy from its postrevolutionary volatility to a period of unprecedented prosperity to a dramatic decline from which the country has never fully recovered The authors examine in depth the solutions that Argentina has tried to implement such as the Caja de Conversi n the nation s first currency board which favored a strict gold standard monetary regime the forerunner of the convertibility plan the nation has recently adopted With many countries now using or seriously contemplating monetary arrangements similar to Argentina s this important and persuasive study maps out one of history s most interesting monetary experiments to show what works and what doesn t

Economics and Regulation in China Michael Faure,Guangdong Xu,2013-10-15 This book from a top international group of scholars explores the ways in which economic tools can be used to improve the quality of regulation in general and legislative tools in particular As the role of law becomes increasingly important in China the question arises of how effective regulatory and legislative tools can be developed to accompany the Chinese evolution towards a welfare state China therefore provides a unique case study for scholars and policymakers interested in examining how regulation can play a role in promoting sustainable development Economics and Regulation in China goes beyond traditional economic analysis of law by focusing specifically on the question of how economic tools can guide the quality of legislation To this end the book centres in on three areas regulation as a tool of economic growth competition policy and environmental policy Not only are these three domains of great importance for China but they are also relevant for a broad scholarship interested in the economic analysis of law This volume contributes to discussions on how ex ante evaluation of legislative proposals and ex post analysis can increase the effectiveness and efficiency of regulation using economic tools offering insights that go beyond the particular case of China The analysis offered by this book makes it an invaluable resource for academics and policymakers alike

Adjustment in Africa World Bank,1994 This the second title in the World Bank Policy Research Reports the first was the headline making The East Asian Miracle discusses the economic situation in Africa as it has evolved over the past several decades To reverse the economic decline that began in the 1970s many sub Saharan African countries have undertaken efforts to restructure their economies This has included liberalizing trade deregulating markets and prices privatizing public enterprises and strengthening management of the financial and public sectors Implementation has been uneven in different countries and even those countries that have attempted major reforms have not achieved policies that are considered sound by international standards A key finding is that improving policies paid off in higher GDR and sectoral growth rates which are vital to reducing poverty but in countries where policies deteriorated economic performance worsened The report also shows that despite the importance of reforming economic policies countries need to invest more in human capital and infrastructure expand their

institutional capacity and develop better governance

Informal Credit Markets And The New Institutional

Economics Sagrario L Floro, 2019-03-07 The conventional wisdom about credit markets has been radically altered in recent years through the introduction of elements of moral hazard, adverse selection, of risk and quality price relationships. Important empirical studies have been published which are leading to vastly different policy implications. This analysis has not been explicitly extended to informal credit markets so far, although it is widely recognized that credit transacted outside the banking circuit is quantitatively huge and qualitatively critical, especially in developing countries. This book combines the new theoretical approach to credit markets with certain precepts of the New Institutional Economics in order to analyze informal credit markets. While the formal financial institutions in developing countries carry out credit transactions within the limits set by the market environment and by government policies, informal institutions evolve by a particular selection of modes of economic behavior which are responses to intrinsic imperfections of the market. The informal sector enhances trust by making existing ties an integral component of credit contracts; the contractual component of informal credit capitalizes on the personalistic social and economic relationships between the transacting parties.

Monetary Policy, Capital Flows and

Exchange Rates William Allen, David Dickinson, 2002-02-21 Maxwell Fry was known internationally for his research into international and domestic financial issues. Rural Poverty in Latin America

R. López, A. Valdés, 2000-09-28 This book provides fresh insight into rural poverty in Latin America. It draws on six case studies of recent rural household surveys for Chile, Colombia, El Salvador, Honduras, Paraguay and Peru, and several thematic studies examining land, labour, rural financial markets, the environments and disadvantaged groups. Recognizing the heterogeneity within the rural economy, the studies characterize three important groups: small farmers, landless farm workers and rural non-farm workers, and provide quantitative and qualitative analyses of the determinants of household income.

Taxation in Modern China

Donald J. S. Brean, 2013-10-23 Taxation in Modern China is concerned with tax and public financial issues arising in China's economic transition. The contributors, among the leading authorities on public finance, transitional economics and policy reform in China, direct attention to the largest and most comprehensive fiscal reform program in modern history. The essays collected here cover the main institutional, intergovernmental and industrial issues and address the long-term challenges facing China as well as transitional changes.
