Money Laundering and Financial Intermediaries Sandeep Savla, 2001-01-17 This book offers a critical examination of the criminal anti money laundering provisions and their impact on financial intermediaries which may play a facilitating role in the money laundering process It further considers the efficacy of the criminal law in reducing the incidence of money laundering when used in conjunction with civil liability and financial market regulation The crucial issues relating to financial intermediaries concern the interaction between procedural norms and equitable or criminal liability the conflicts between disclosure and client confidentiality the privilege against self incrimination and the procedural aspects of imposing corporate criminal liability The author analyses these in detail and considers to what extent the present provisions may need modification particularly in light of the demands of procedural fairness laid down in the European Convention on Human Rights Finally the book considers the impact of the international nature of money laundering on United Kingdom financial intermediaries in terms of enforcement and the extra territorial application of laws and disclosure orders BACK COVER

Bribery and Corruption in International Commercial Arbitration Emmanuel Obiora Igbokwe, 2023-01-10 International Arbitration Law Library Volume 65 International commercial arbitration is by no means free from bribery and corruption Although a plethora of legal scholarship clearly affirms this contention a thorough study on the particularly important

question of the authority and duty of international commercial arbitrators to investigate a suspicion or indication of bribery or corruption sua sponte that is on their own initiative has been surprisingly lacking This important book fills this gap inter alia by locating sua sponte authority in the position of arbitral tribunals in establishing the facts of a case and ascertaining and applying the applicable normative standards In addition to providing a comprehensive examination of how the issue of bribery and corruption is dealt with in contemporary international commercial arbitration the book also highlights the role of arbitrators in global efforts to combat transnational commercial bribery and corruption Among others the following critical issues are thoroughly investigated arbitrability of issues of public interests intermediary contracts role of arbitrators in the fact finding process party autonomy versus overriding mandatory rules iura novit curia in international commercial arbitration in the context of bribery and corruption notion of transnational or truly international public policy arbitrators duty to act as guardians of international commerce investigative tools available to arbitrators dealing with manifestly recalcitrant parties possible consequences of violating the obligation to sua sponte investigate and the view from developing countries The analysis leans primarily on Swiss law as Switzerland is one of the most important jurisdictions in international commercial arbitration Switzerland has also been involved in some of the most famous and controversial arbitration cases wherein bribery and corruption became an issue However the study also includes a comparative analysis of the relevant laws jurisprudence and doctrine of other major arbitration venues particularly England France and Germany Not only in the light it sheds on how and whether international commercial arbitrators have hitherto justified the trust States have placed in them regarding the protection of the public interests but also in the practical solutions it offers arbitrators faced with issues of bribery and corruption this deeply researched book equips arbitration practitioners and arbitration institutions with a hitherto lacking in depth analysis on the question of sua sponte investigation It also provides invaluable insights on how this issue might affect the future legitimacy and expansion of this dispute settlement mechanism Outside the field of arbitration the book also provides jurists legal scholars in house counsel for companies doing transnational business and public officials with highly enlightening perspectives on the interaction between international commercial arbitration and public interests

between tax evasion and money laundering identifying best practices omissions and areas for reform The work will be a valuable resource for researchers academics and policy makers working in the areas of financial crime financial law accountancy and criminal justice *Anti-Money Laundering and the Law* Engin Erken,Umut Turksen,2024-08-27 This book provides a distinctive and critical analysis of the anti money laundering AML measures that have been put in place in T rkiye and the United Kingdom The work presents a comparative analysis of if and to what extent the AML regimes in these jurisdictions are fit for purpose in countering some of the most pressing predicate crimes It investigates the AML regimes relating to tackling the riskiest most prevalent predicate crimes that is drug trafficking and tax crimes thereby filling a significant gap within the current literature The study provides insights into the effectiveness and efficiency of national AML frameworks adopted by T rkiye and the UK in addressing distinct crimes thereby identifying essential features of an optimum AML ecosystem that could effectively address predicate crimes regardless of their nature This novel approach offers a detailed analysis of the law in books and law in practice elements of the AML regimes in T rkiye and the United Kingdom which will set the tone for conducting similar studies in other jurisdictions The book will be of interest to academics researchers and policy makers working in the areas of Financial Crime Law Enforcement and Comparative Law Illicit Finance and the Law in the Commonwealth Caribbean Rohan D. Clarke,2022-11-18 This book provokes fresh ways of thinking about small developing States within the transnational legal order for combating money laundering and the financing of terrorism and proliferation TAMLO From the global wars on drugs and terror to journalistic expos s such as the Paradise Panama and Pandora Papers the Commonwealth Caribbean has been discursively stigmatised as a mythical island paradise of rogue States Not infrequently their exercise of regulatory self determination has been presented as the selling of their economic sovereignty to facilitate shady business deals and illicit finance from high net worth individuals kleptocrats tax dodgers organised crime networks and terrorist financiers This book challenges conventional wisdom that Commonwealth Caribbean States are among the weakest links within the global ecosystem to counter illicit finance It achieves this by unmasking latent interests and problematising coercive extraterritorial regulatory and surveillance practices along the onshore offshore and Global North South axes Interdisciplinary in its outlook the book will appeal to policymakers regulatory and supervisory authorities academics and students concerned with better understanding legal and development policy issues related to risk based regulatory governance of illicit finance The book also provides an interesting exposition of substantive legal and policy issues arising from money laundering related to corruption and politically exposed persons offshore finance and offshore Internet gambling services Ownership, Financial Accountability and the Law Paul Beckett,2019-05-08 There is something visceral about ownership This is mine you can t have it This is mine you can share it This is ours Try to find it Contemporary literature and investigative journalism are showing that the scale of the problem of tax evasion money laundering organised crime terrorism bribery corruption and gross human rights abuses is vast

Ownership specifically the quest to identify beneficial owners has been chosen by national and international regulators as the touchstone the litmus test in the fight back An owner by definition must possess something for which they are financially accountable But what is meant by ownership This book explains why ownership is pivotal to accountability and what ownership means in common law civil law and Shariah law terms It looks in detail at State regional and international transparency strategies and at an equally powerful global private counter initiative to promote beneficial ownership avoidance through the use of so called orphan structures Where there is no owner there is no accountability The distinction between privacy and legitimate confidentiality on the one hand and concealment on the other is explained with reference to commercial and trade law and practice principles of corporate governance and applicable business human rights This book introduces one further counter initiative the phenomenon of transient ownership made possible through the use of cryptocurrency and the blockchain The study concludes with a blueprint for action with recommendations addressed to states international organisations practitioners and other stakeholders
