Investors are increasingly frustrated by poor investment returns particularly in the last decade It seems the financial world wrenches from one crisis to another in a boom bust bubble and crash sequence rising to unpredictable heights and falling to unfathomable depths The old investing rules do not seem to work Something has changed This book recommends that the reader take an alternative mindset to investing It guides the reader to this mindset through a series of educational and hopefully entertaining lessons It uses various tools such as newspaper headlines at critical points in the history of the markets as well as insightful anecdotes gathered over the years It also employs often amusing research from outside the industry to shed light on how investors make decisions This book examines the origins of accepted investment methodology provides a critical review of mutual funds and presents alternative solutions for these turbulent times Along the way it also touches on the future of the investment industry how to select an investment advisor and an alternative way to plan for the future In Short Many books tell you about what investments are This book is an attempt to teach you about how to drive your investment returns higher *Sexing the Body* Anne Fausto-Sterling, 2020-06-30 Now updated with groundbreaking research this award winning classic examines the construction of sexual identity in biology society and history Why do some people

prefer heterosexual love while others fancy the same sex Is sexual identity biologically determined or a product of convention In this brilliant and provocative book the acclaimed author of *Myths of Gender* argues that even the most fundamental knowledge about sex is shaped by the culture in which scientific knowledge is produced Drawing on astonishing real life cases and a probing analysis of centuries of scientific research Fausto Sterling demonstrates how scientists have historically politicized the body In lively and impassioned prose she breaks down three key dualisms sex gender nature nurture and real constructed and asserts that individuals born as mixtures of male and female exist as one of five natural human variants and as such should not be forced to compromise their differences to fit a flawed societal definition of normality **Occupational**
