What Do We Owe Each Other? Howard Rosenthal, 2017-09-08 *What Do We Owe Each Other* includes essays by some of the finest social and political policy researchers in the United States. They address critical issues in contemporary American society. These range from the making of public opinion, the nature of the presumed social contract between government and its people, the special place of corporate governance and institutional investors with respect to social stability, the search for educational equality in a world of growing income disparities, the huge run up in prison populations and the decline of American citizenship and not least the ethical issues of selfless and selfish motivations with respect to organ transplants and the sale of body parts. Although the volume is clearly focused on the United States of the past and present, it offers a long view of how social trends take on distinctive moral characteristics. The opening essay by Katherine Newman of Princeton University and Elisabeth Jacobs of Harvard University carefully documents how the political and social goals of the New Deal era outstripped the public opinion views of the time. They rise to a special level of analysis on how the policy processes can be uneven in one era and yet translate into a general good in later periods. Economic recovery and ideological dispositions were not in sync during the New Deal. As the contributors show, such disparities remain true of the American political process as a whole. The contributors display a wide diversity of opinion, but the volume is unified by the belief that ethical concerns play as large a role in defining American society as do economic interests. The book should attract the attention of political scientists, sociologists, economists, and above all those people interested in how policy analysis is fused with moral considerations at the start as well as at the close of decision making, as such. Howard L. Rosenthal is a professor of politics at New York University. He is the author of many journal articles and coauthor with Alberto Alesina of *Partisan Politics, Divided Government, and the Economy* and coauthor with Keith T. Poole of *Ideology and Congress*, available from Transaction.

Corporate Power and Ownership in Contemporary Capitalism Susanne Soederberg, 2009-09-14 Despite the influence corporations wield over all aspects of everyday life, there has been a remarkable absence of critical inquiry into the social constitution of this power. In analysing the complex relationship between corporate power and the widespread phenomenon of share ownership, this book seeks to map and define the nature of resistance and domination in contemporary capitalism. Drawing on a Marxist-informed framework, this book reconnects the social constitution of corporate power and changing forms of shareholder activism. In contrast to other texts that deal with corporate governance, this study examines a diverse and comprehensive set of themes from socially responsible investing to labour-led shareholder activism and its limitations. Through this ambitious and critical study, author Susanne Soederberg demonstrates how the corporate governance doctrine represents an inherent feature of neoliberal rule, effectively disembedding and depoliticising relations of domination and resistance from the wider power and paradoxes of capitalism. Examining corporate governance and shareholder activism in a number of different contexts that include the United States and the global South, this important book will be of interest to students and scholars of international political economy, international relations, and development studies. It will also be of relevance to a wider range

Banking on Death Robin Blackburn,2020-05-05 Banking on Death offers a panoramic view of the history and future of pension provision A work of unique scope it traces the origins and development of the pension idea from the days of the French Revolution to the troubles of the modern welfare state As we live longer employers are closing their pension schemes and many claim that public treasuries will not be able to cope with the retirement of the babyboomers Banking on Death analyses the challenge facing public schemes and the malfunctioning of private retirement provision concluding with a bold proposal for how to pay for decent pensions for all Robin Blackburn argues that pension funds have been depleted by wasteful promotion and used as gambling chips by ruthless and overpaid top executives This is the world of grey capitalism where employees savings are sequestered from them and pressed into the service of corporate aggrandisement Even the best companies find it hard to run a business and a pension fund at the same time especially when the latter is larger than the former The fund managers notorious short termism and herd instinct and their failure to curb the greed and irresponsibility of the corporate elite lead to obscene inequalities and a blighted social landscape The pension privatisation lobby Blackburn shows has lost major battles in France and Germany the United States and Italy because of the popular fears it evokes And the case for privatisation looks intellectually threadbare after withering critiques from such notable theorists as Joseph Stiglitz and Pierre Bourdieu Banking on Death shows that pensions are political dynamite and have undone governments from France and Italy to Argentina Popular outcries led Reagan Clinton and Blair to change tack will this happen to George W Bush too Blackburn argues that the ageing society will generate increased costs but so long as the new life course is properly financed all age groups will gain He proposes a public regime of asset based welfare drawing on the ideas of John Maynard Keynes and Rudolf Meidner that could ensure secondary pensions for all and foster a more responsible egalitarian and humane pattern of economic development The Routledge Companion to Banking Regulation and Reform Ismail Ertürk,Daniela Gabor,2016-10-04 The Routledge Companion to Banking Regulation and Reform provides a prestigious cutting edge international reference work offering students researchers and policy makers a comprehensive guide to the paradigm shift in banking studies since the historic financial crisis in 2007 The transformation in banking over the last two decades has not been authoritatively and critically analysed by the mainstream academic literature This unique collection brings together a multi disciplinary group of leading authorities in the field to analyse and investigate post crisis regulation and reform Representing the wide spectrum of non mainstream economics and finance topics range widely from financial innovation to misconduct in banking varieties of Eurozone banking to reforming dysfunctional global banking as well as topical issues such as off shore financial centres Libor fixing corporate governance and the Dodd Frank Act Bringing together an authoritative range of international experts and perspectives this invaluable body of heterodox research work

provides a comprehensive compendium for researchers and academics of banking and finance as well as regulators and policy makers concerned with the global impact of financial institutions *Corporate Governance and Managerial Reform in Japan* D. Clark, Alicia H. Munnell, J. Michael Orszag, 2006-07-20 This handbook draws on research from a range of academic disciplines to reflect on the implications for provisions of pension and retirement income of demographic ageing it reviews the latest research policy related tools analytical methods and techniques and major theoretical frameworks **The Development of American Finance** Martijn Konings, 2011-09-30 Since the 1960s scholars and other commentators have frequently announced the imminent decline of American financial power excessive speculation and debt are believed to have undermined the long term basis of a stable US led financial order But the American financial system has repeatedly shown itself to be more resilient than such assessments suggest This book argues that there is considerable coherence to American finance far from being a house of cards it is a proper edifice built on institutional foundations with points of both strength and weakness The book examines these foundations through a historical account of their construction it shows how institutional transformations in the late nineteenth century created a distinctive infrastructure of financial relations and proceeds to trace the contradiction ridden expansion of this system during the twentieth century as well as its institutional consolidation during the neoliberal era It concludes with a discussion of the forces of instability that hit at the start of the twenty first century *The Everyday*
