The Open Sea J. G. Manning,2018-04-03 A major new economic history of the ancient Mediterranean world In *The Open Sea* J G Manning offers a major new history of economic life in the Mediterranean world in the Iron Age from Phoenician trading down to the Hellenistic era and the beginning of Rome s imperial supremacy Drawing on a wide range of ancient sources and the latest social theory Manning suggests that a search for an illusory single ancient economy has obscured the diversity of lived experience in the Mediterranean world including both changes in political economies over time and differences in cultural conceptions of property and money At the same time he shows how the region s economies became increasingly interconnected during this period *The Open Sea* argues that the keys to understanding the region s rapid social and economic change during the Iron Age are the variety of economic and political solutions its different cultures devised the patterns of cross cultural exchange and the sharp environmental contrasts between Egypt the Near East and Greece and Rome The book examines long run drivers of change such as climate together with the most important economic institutions of the premodern Mediterranean coinage money agriculture and private property It also explores the role of economic growth states and legal institutions in the region s various economies A

The Story of Work Jan Lucassen, 2021-07-27 The first truly global history of work an upbeat assessment from the age of the hunter gatherer to the present day We work because we have to but also because we like it from hunting gathering over 700 000 years ago to the present era of zoom meetings humans have always worked to make the world around them serve their needs Jan Lucassen provides an inclusive history of humanity s busy labor throughout the ages Spanning China India Africa the Americas and Europe Lucassen looks at the ways in which humanity organizes work in the household the tribe the city and the state He examines how labor is split between men women and children the watershed moment of the invention of money the collective action of workers and at the impact of migration slavery and the idea of leisure From peasant farmers in the first agrarian societies to the precarious existence of today s gig workers this surprising account of both cooperation and subordination at work throws essential light on the opportunities we face today

A History of the Archaic Greek World Jonathan M. Hall, 2007 Chronicles the history of ancient Greece from 1200 to 479 BCE describing the rise of the city state and citizen militias and examining the origins of egalitarianism

The Oxford History of the Archaic Greek World Robin Osborne, 2023 This book introduces the history and archaeology of ancient Athens in the period from 800 500 BCE Following the standard arrangement of the Oxford History of the Archaic Greek World series author Robin Osborne deals successively with the sources environmental setting material culture settlement pattern burial customs ceramic production political legal and diplomatic history economy and demography social and religious customs and cultural history including history of sculpture of archaic Athens He provides not only a full and up to date guide to all these various aspects of Athenian history and archaeology but also an integrated history which shows how all the different aspects intersect Osborne guides the reader through an exciting story of the way in which the territory of Attica was re occupied after the collapse of Bronze Age civilization how Athens emerged as the dominant settlement how the claims of family place and wealth were played out against one another and how the Athenians came to place themselves both in relation to the wider Greek world and in relation to the gods

The Dynamics of Ancient Empires Ian Morris, Walter Scheidel, 2009-01-13 The world s first known empires took shape in Mesopotamia between the eastern shores of the Mediterranean Sea and the Persian Gulf beginning around 2350 BCE The next 2 500 years witnessed sustained imperial growth bringing a growing share of humanity under the control of ever fewer states Two thousand years ago just four major powers the Roman Parthian Kushan and Han empires ruled perhaps two thirds of the earth s entire population Yet despite empires prominence in the early history of civilization there have been surprisingly few attempts to study the dynamics of ancient empires in the western Old World comparatively Such grand comparisons were popular in the eighteenth century but scholars then had only Greek and Latin literature and the Hebrew Bible as evidence and necessarily framed the problem in different more limited terms Near Eastern texts and knowledge of their languages only appeared in large amounts in the

later nineteenth century Neither Karl Marx nor Max Weber could make much use of this material and not until the 1920s were there enough archaeological data to make syntheses of early European and west Asian history possible But one consequence of the increase in empirical knowledge was that twentieth century scholars generally defined the disciplinary and geographical boundaries of their specialties more narrowly than their Enlightenment predecessors had done shying away from large questions and cross cultural comparisons As a result Greek and Roman empires have largely been studied in isolation from those of the Near East This volume is designed to address these deficits and encourage dialogue across disciplinary boundaries by examining the fundamental features of the successive and partly overlapping imperial states that dominated much of the Near East and the Mediterranean in the first millennia BCE and CE A substantial introductory discussion of recent thought on the mechanisms of imperial state formation prefaces the five newly commissioned case studies of the Neo Assyrian Achaemenid Persian Athenian Roman and Byzantine empires A final chapter draws on the findings of evolutionary psychology to improve our understanding of ultimate causation in imperial predation and exploitation in a wide range of historical systems from all over the globe Contributors include John Haldon Jack Goldstone Peter Bedford Josef Wieseh fer Ian Morris Walter Scheidel and Keith Hopkins whose essay on Roman political economy was completed just before his death in 2004

The Origins of Money in the Iron Age Mediterranean World Elon D. Heymans, 2021-08-26 Color versions of select print images available on the Resources tab or here www.cambridge.org/heymans This book shows how money emerged and spread in the eastern Mediterranean centuries before the invention of coinage While the invention of coinage in Ancient Lydia around 630 BCE is widely regarded as one of the defining innovations of the ancient world money itself was never invented It gained critical weight in the Iron Age ca 1200-600 BCE as a social and economic tool most dominantly in the form of precious metal bullion This book is the first study to comprehensively engage with the early history of money in the Iron Age Mediterranean tracing its development in the Levant and the Aegean Building on a detailed study of precious metal hoards Elon D Heymans deploys a wide range of sources both textual and material to rethink money's role and origins in the history of the eastern Mediterranean

Creating a Common Polity Emily Mackil, 2016-04-05 In the ancient Greece of Pericles and Plato the polis or city state reigned supreme but by the time of Alexander nearly half of the mainland Greek city states had surrendered part of their autonomy to join the larger political entities called koina In the first book in fifty years to tackle the rise of these so called Greek federal states Emily Mackil charts a complex fascinating map of how shared religious practices and long standing economic interactions facilitated political cooperation and the emergence of a new kind of state Mackil provides a detailed historical narrative spanning five centuries to contextualize her analyses which focus on the three best attested areas of mainland Greece Boiotia Achaia and Aitolia The analysis is supported by a dossier of Greek inscriptions each text accompanied by an English translation and commentary
