Macroeconomics L.N. Dutta, 2022-12-12 The book Modern Macroeconomics is adorned with illustrative examples drawing on data from Indian macroeconomy to help students relate the stark theory to the real world situations The book is the key reading for undergraduate students as there are new developments and complications in the world of macroeconomic over the past several years The book contains a number of mathematical derivations and conclusions As such the students are expected to have a grasp on the basic mathematical techniques even though they are supported by ample graphical illustrations The book includes business cycles which in most cases originate in the form of shocks of some kind or other thus posing challenges to macroeconomic management The book has dealt with at least one such shock in the form of COVID 19 pandemic with its fallout on the world economy It may be mentioned here that by the time the book was going to the print another shock of greater magnitude was brewing in the shape of Russia Ukraine war threatening to lead to World War III However this macroeconomic shock could not be taken up at its premature stage *Introductory Macroeconomics Based on*

Conquering Giants in Modern Times Darren Maracin, 2007-10 Maracin examines three specific giants found in the Old Testament the Hittites the Amorites and the Canaanites and reveals how the demonic forces behind them still operate today to oppose the New Testament believer from gaining his or her inheritance in Christ Practical Life

War, Resistance and Counter-Resistance in Modern Times Francis Feeley, 2010-08-11 These essays on war resistance and counter resistance represent an original approach to understanding how political constraints on human behavior and the resistance movements to which these restrictions give rise produce counter resistant forces which represent new constraints which in turn often generate new and innovative behaviors which sometimes create new crystallizations of cultural expression and occasionally influence institutions and traditions This new anthology offers a unique analysis of the important role political constraints play in the production of creative thinking and the development of systematic projects aimed at human liberation In the preface Francis Feeley clearly states the purpose of this book which is to demonstrate how resistance movements have often given birth to counter resistance measures employed mostly by state agencies aimed at stifling the self realization of certain groups and promoting the self realization of other organized interests The following essays are a composite of writings by political activists poets and academic scholars The introduction offers a brief description of major resistance movements in the United States This historical overview presents a context for the appearance of the 20th century resistance movements described in the following chapters We are alerted from the start that one of the unifying themes of these essays is the dialectical relationship between social movements and political institutions

producing democracy within American institutions another theme will be how these social contradictions which generate the growth of democracy have proven time and again to operate beyond the control of capitalist interests both in France and within the United States thereby giving rise to many species of democratic expression Gilles Vachon's description of his childhood impressions of Paris under the German occupation offers new insights into micro resistance at the level of alternative perceptions and subliminal communications George Brown's contribution to the thesis of this book although first published in 1978 is his self conscious description of one man entering into a dialectical relationship with prison reforms which pushed him into a deeper understanding of the injustices that he had suffered as a child and young adult growing up Black in the United States In the third chapter of this book Francis Feeley uncovers the economic interests behind the production of political repression His analysis of the Homeland Security Act and the growth of surveillance and security industry that it gave rise to supports the main thesis of this book namely that the contradictions which generate democracy exist beyond the control and very often beyond the apprehension of the society in which they are created Patrick Litsangou's essay in chapter 4 contributes to our understanding of the dialectical relationship between the mainstream media and the alternative media in the period of the U S military invasion of Iraq He illustrates in this essay how the demise of mainstream medias independence gave rise to the extraordinary success of the alternative media as large numbers of people living within the United States vigorously struggled to stay informed in order to understand the palpable contradictions in their lives In the fifth chapter Peterson Nnaji for recounts the histories of resistance and counter resistance around the aggressive activities of US petroleum companies in the Niger Delta where class warfare has produced strategies and counter tactics that have been evolving for decades in the relationships between the inhabitants of the region and the transnational corporations which control their political economy to the almost unimaginable detriment of the environment The last chapter of this book is an excerpt from Professor Anthony Wilden's classic work *Man and Woman War and Peace the Strategists Companion* New York 1987 Despite having been published more than two decades ago this theoretical study stands as a contemporary statement on the epistemology of strategic thought The indirect approach described here by Wilden complements Professor Feeley's thesis that the forces of resistance and the forces of counter resistance are intimately related that from this interrelationship new cultural expressions are created some of which have long term effects on the society in which they occur The formation of a revolutionary counterculture is but one example of the effects of this power interface As professor Wilden notes no confrontation occurs without some structural modification taking place The forces of order are never the same after they successfully repress the forces of change and guerrilla warfare tactics are constantly evolving adapting to new conditions Professor Feeley concludes this anthology by attempting to synthesize the main ideas presented in the seven essays in this book The main thread running through these chapters is the idea that cultural order cannot be reduced to the natural order This idea is clearly expressed in each of the essays found in this book and the conclusion convincingly states

the view that social science like all other cultural expressions exists beyond being in the realm of becoming
