was a moonlit night at the rocket base For weeks the scientists had been preparing for the launching of a new rocket Reporters were standing by On this night everyone was asleep except the guard who carefully kept watch Suddenly there was a roar that grew louder and louder and the rocket began to lift off its pad Its going up shouted the guard Its blasting off yelled the scientists What Where called the reporters as they climbed out of their beds Who Why When and how Inside the capsule Sam the monkey was pulling switches and pushing buttons as he had been taught Everything was according to plan except that the rocket had not been launched by the scientists but by another monkey Sarah But this is only the beginning What happens is important to the whole world and makes a tale of a monkey that is full of fun Laika's Window Kurt Caswell,2018-09-18 Laika began her life as a stray dog on the streets of Moscow and died in 1957 aboard the Soviet satellite Sputnik II Initially the USSR reported that Laika the first animal to orbit the earth had survived in space for seven days providing valuable data that would make future manned space flight possible People believed that Laika died a painless death as her oxygen ran out Only in recent decades has the real story become public Laika died after only a few hours in orbit when her capsule overheated Laika s Window positions Laika as a long overdue hero for leading the way to human space exploration Kurt Caswell examines Laika s life and death and the speculation surrounding both Profiling the scientists behind Sputnik II he studies the political climate driven by the Cold War and the Space Race that expedited the satellite s development Through this intimate portrait of Laika we begin to understand what the dog experienced in the days and hours before the launch what she likely experienced during her last moments and what her flight means to history and to humanity While a few of the other space dog flights rival Laika s in endurance and technological advancements Caswell argues that Laika s flight serves as a tipping point in space exploration beyond which the dream of exploring nearby and distant planets opened into a kind of fever from which humanity has never recovered Examining the depth of human empathy what we are willing to risk and sacrifice in the name of scientific achievement and our exploration of the cosmos and how politics and marketing can influence it Laika s Window is also about our search to overcome loneliness and the role animals play in our drive to look far beyond the earth for answers *Albert II* Joeming Dunn,2011-08-01 Explores the history of human interest in space and early days of space exploration and introduces the first mammal to travel in space **The Day the Universe Exploded My Head** Allan Wolf,2019-03-05 Hang on tight for a raucous bounce through the solar system and back propelled by funny fanciful factually sound poems and exuberant illustrations The universe poured into me My brain was overloaded It smoked and glowed red hot And then it actually exploded Ever wonder what the sun has to say about being the closest star to Earth Or what Pluto has gotten up to since being demoted to a dwarf planet Or where rocket ships go when they retire Listen closely because maybe just maybe your head will explode too With poetry that is equal parts accurate and entertaining and illustrations that are positively out of this world this book will enthrall amateur stargazers and budding astrophysicists as it reveals many of the wonders our universe holds Space travelers in search of more information will find notes about the

poems a glossary and a list of resources at the end **Human Spaceflight** Joseph A. Angelo, 2014-05-14 Presents an introduction to human space exploration discussing the evolution of space technology that has allowed the human race to go from merely orbiting the Earth to landing on the Moon and living for months in a space station *The Greatest Adventure* Colin Burgess, 2021-08-12 The Greatest Adventure explores the past present and future of the space race The space race was perhaps the greatest technological contest of the twentieth century It was a thrilling era of innovation discovery and exploration as astronauts and cosmonauts were launched on space missions of increasing length complexity and danger The Greatest Adventure traces the events of this extraordinary period describing the initial string of Soviet achievements the first satellite in orbit the first animal man and woman in space the first spacewalk as well as the ultimate US victory in the race to land on the moon The book then takes the reader on a journey through the following decades of space exploration to the present time detailing the many successes tragedies risks and rewards of space exploration **Baseless** Nicholson Baker, 2020-07-21 Staggeringly good Counterpunch A major new work a hybrid of history journalism and memoir about the modern Freedom of Information Act FOIA and the horrifying decades old government misdeeds that it is unable to demystify from one of America's most celebrated writers Eight years ago while investigating the possibility that the United States had used biological weapons in the Korean War Nicholson Baker requested a series of Air Force documents from the early 1950s under the provisions of the Freedom of Information Act Years went by and he got no response Rather than wait forever Baker set out to keep a personal journal of what it feels like to try to write about major historical events in a world of pervasive redactions withheld records and glacially slow governmental responses The result is one of the most original and daring works of nonfiction in recent memory a singular and mesmerizing narrative that tunnels into the history of some of the darkest and most shameful plans and projects of the CIA the Air Force and the presidencies of Harry Truman and Dwight Eisenhower In his lucid and unassuming style Baker assembles what he learns piece by piece about Project Baseless a crash Pentagon program begun in the early fifties that aimed to achieve an Air Force wide combat capability in biological and chemical warfare at the earliest possible date Along the way he unearths stories of balloons carrying crop disease leaflet bombs filled with feathers suicidal scientists leaky centrifuges paranoid political warfare tacticians insane experiments on animals and humans weaponized ticks ferocious propaganda battles with China and cover and deception plans meant to trick the Kremlin into ramping up its germ warfare program At the same time Baker tells the stories of the heroic journalists and lawyers who have devoted their energies to wresting documentary evidence from government repositories and he shares anecdotes from his daily life in Maine feeding his dogs and watching the morning light gather on the horizon The result is an astonishing and utterly disarming story about waiting bureaucracy the horrors of war and above all the cruel secrets that the United States government seems determined to keep forever from its citizens Albert II: 1st Monkey in Space Joeming Dunn, 2011-09-01 Animals have been an influential part of science technology and travel throughout time Albert II The 1st Monkey in Space
