Monkey-Puzzle Tree: A Memoir Kathryn Humes, 2007. When our worst fears come true, can there still be grace in the world? The setting for this collection of essays is the original garden of belonging and the journey back to a sense of home. This is a memoir of love, separation, trials of soul and body and freedom from simple definitions of care giving. Through linked meditations beginning with a child and her mother during the tumultuous 1960s, Monkey Puzzle Tree follows both the mother's and daughter's individual journeys: the mother's move to join her daughter on the west coast and the unexpected illness that irrevocably alters their relationship. This collection explores the circumstances in which a mother and daughter can teach each other at any age to turn chaos into blessing. *Dictionary of Plant Lore* D.C. Watts, 2007-05-02. Knowledge of plant names can give insight into largely forgotten beliefs. For example, the common red poppy is known as Blind Man due to an old superstitious belief that if the poppy were put to the eyes it would cause blindness. Many plant names derived from superstition, folk lore or primal beliefs. Other names are purely descriptive and can serve to explain the meaning of the botanical name. For example, Beauty Berry is the name given to the American shrub that belongs to the genus *Callicarpa*. *Callicarpa* is Greek for beautiful fruit. Still other names come from literary sources providing rich detail of the transmission of words through the ages. Conceived as part of the author's wider interest in plant and tree lore and ethnobotanical studies, this fully revised edition of Elsevier's *Dictionary of Plant Names and Their Origins* contains over 30,000 vernacular and literary English names of plants. Wild and cultivated plants alike are identified by the botanical name. Further detail provides a brief account of the meaning of the name and detailed commentary on common usage. Includes color images. Inclusive of all Latin terms with vernacular derivatives. The most comprehensive guide for plant scientists, linguists, botanists and historians.
