This work looks at the problematic relationship between the Philippines and the US. It argues that when faced with a national crisis or a compelling need to reestablish its autonomy, each nation paradoxically turns to its history with the other to define its place in the world.     *Cassell's Natural History* Peter Martin Duncan, 1883     **A Treasury of Natural History Or a Popular Dictionary of Zoology in which the Characteristics that Distinguish the Different Classes...** by **Samuel Maunder** Samuel Maunder, 1870     The Treasury of Natural History: Or, A Popular Dictionary of Animated Nature Samuel Maunder, 1848     **The Treasury of Natural History ... First published in 1977. The volume of research on nonhuman primates has expanded tremendously during the past 20 years, and researchers' familiarity with them has increased correspondingly. This series of volumes deals with scientific studies of the behavior of nonhuman primates: apes, monkeys, and prosimians. The behavior of these animals is of course of interest in its own right. But then so is that of the many other orders of animals. Behavior of nonhuman primates is of special interest because these animals are more closely related to human beings structurally, physiologically, and beyond doubt behaviorally than are any other living animals.
