Coronary Artery Disease: Therapeutics and Drug Discovery Miao Wang,2020-04-03 This book provides an overview of the etiology of coronary artery disease and focuses on the main therapies and drug interventions currently available It highlights drug pharmacology and therapeutic challenges with a special emphasis on the underlying principles of available therapeutics and the on going development of drugs for coronary artery disease The book is divided into eight chapters the first of which describes the classical mechanism of coronary artery disease and its clinical presentations Chapter 2 lists the principles of and related evidence on the prevention and treatment of coronary artery disease This includes diet and lifestyle management and guidelines for the treatment of acute coronary syndrome and stable coronary artery disease In turn Chapter 3 describes revascularization treatments covering percutaneous coronary interventions coronary artery bypass grafts and thrombolysis This chapter also addresses the main therapeutic challenges The following chapters provide an overview of three major categories of coronary artery disease drugs which target thrombosis Chapter 4 lipid metabolism Chapter 5 and hypertension Chapter 6 Heart failure constitutes the major health burden in the late stage of coronary artery disease accordingly current heart failure therapeutics and related drug pharmacology are described in Chapter 7 In closing Chapter 8 provides a summary of on going clinical trials for coronary artery disease drug development and discusses a number of promising areas in which intensive research into new therapeutics is being pursued Given its scope the book will be of interest to clinicians medical students and research scientists as well as to pharmaceutical professionals who are seeking new therapies and drugs for coronary artery disease and related disorders

The Role of Immune Mechanisms in Cardiovascular Disease Heinz-Peter Schultheiss,Peter Schwimmbeck,2012-12-06 An involvement of the immune system is suspected in various cardiovascular diseases Recent advances in the fields of molecular biology genetics cell biology and immunology have made it possible to identify several pathomechanisms However still more questions arise with regard to the pathophysiology diagnosis and treatment of immunologically mediated cardiovascular diseases In this book leading scientists and clinicians from different areas of cardiology present the state of the art knowledge on the involve ment of the immune system in myocardial and vascular diseases In the field of myocarditis both the virological and the immunological findings are presented and the interactions between the virus and the immune system are discussed Since the cellular immune system and its mediators play an important role in the inflammation by bacteria that cause endocarditis and septic shock studies investigating the underlying pathomechanisms are de scribed Another major topic in this volume is the involvement of the immune system in arteriosclerosis and coronary heart disease which represents an important problem in clinical cardiology The final chapter addresses the question of therapeutic options presenting new approaches for a specific and effective therapy based on the current knowledge of immunologically mediated cardiovascular diseases

Nikolaos Papageorgiou,2016-08-05 Cardiovascular Diseases Genetic Susceptibility Environmental Factors and Their Interaction covers the special heritability characteristics and identifying genetic and environmental contributions to cardiovascular health This important reference provides an overview of the genetic basis of cardiovascular disease and its risk factors Included are important topics ranging from lifestyle choices risk factors and exposure to pollutants and chemicals Also covered are the influences of Mendelian traits and familial aggregation and the interactions and interrelationships between genetics and environmental factors which when compared provide a sound understanding of the interplay between inherited and acquired risk factors The book provides a much needed reference for this rapidly growing field of study By combining the latest research within the structured chapters of this reference a better understanding of genetic and environmental contribution to cardiovascular disease is found helping to substantiate further investigations in the field and design prevention and treatment strategies Provides an overview of the genetic basis of cardiovascular disease and its risk factors Reviews several large population based studies which indicate that exposure to several environmental factors may increase CVD morbidity and mortality exploring the plausibility of this association by data from animal studies Reflects on future studies to help understanding the role of genes and environmental factors in the development and progression of cardiovascular disease

Applications And Engineering Of Monoclonal Antibodies David J. King,1998-11-27 A

valuable resource for researchers and workers in the fields of both pharmaceuticals and biotechnology as well as undergraduates in biochemistry applied biology biomedical sciences and pharmacy this book compares established techniques of antibody production with the new Antibody structure and the implications of antibody engineering are fully discussed and a case study approach illustrates how antibodies are finding increasing use in the diagnosis and treatment of disease The volume ends with commercial expression purification and large scale manufacture of antibodies and their future potential particularly as therapeutic agents

Pathophysiology of Cardiovascular Disease Naranjan S. Dhalla,Heinz Rupp,Aubie Angel,Grant N. Pierce,2012-12-06 Pathophysiology of Cardiovascular Disease has been divided into four sections that focus on heart dysfunction and its associated characteristics hypertrophy cardiomyopathy and failure vascular dysfunction and disease ischemic heart disease and novel therapeutic interventions This volume is a compendium of different approaches to understanding cardiovascular disease and identifying the proteins pathways and processes that impact it

The Renin Angiotensin System in Cardiovascular Disease Naranjan S. Dhalla,Sukhwinder K. Bhullar,Anureet K. Shah,2023-01-01 This book on Renin Angiotensin System in Cardiovascular Disease includes 25 chapters which are organized in three sections namely i modulatory aspects ii pathophysiological aspects and iii pharmacotherapeutic aspects It includes an updated as well as comprehensive knowledge about molecular and cellular aspects for the role of the renin angiotensin system RAS in the pathophysiology and therapy of cardiovascular diseases such as hypertension atherosclerosis ischemic heart disease and heart failure This book emphasizes the molecular and cellular mechanisms signaling transduction

pathways involved in the development of different cardiovascular diseases due to the prolonged activation of RAS Furthermore biochemical mechanisms are outlined for the inhibition of this system by the blockade of angiotensin converting enzyme as well as angiotensin II type 1 receptors in patients suffering from cardiovascular abnormalities Since cardiovascular disease is the number one cause of death worldwide leading to approximately 17.9 million deaths each year there is a keen interest in understanding the pathogenesis and improving its therapy In this regard we can attest that this book provides ample information about essential components of RAS and their role in the development of cardiovascular disease From the selection of recognized global experts in their area of investigation this book can be seen to cover diverse cardiovascular aspects and molecular and cellular mechanisms of angiotensin II action for the development of different cardiovascular abnormalities It is our contention that this book will be most suitable for promoting knowledge in the field of RAS biology and will be of great interest to health professionals involved in both experimental and clinical cardiology as well as academic investigators and cardiovascular scientists graduate students and fellows worldwide

Immune and Autoimmune Mechanisms in Cardiovascular Disease Dennis Wolf, Holger Winkels, Norbert Gerdes, Florian Kahles, Partha Dutta, Chiara Giannarelli, 2023-02-08

Translational Research in Coronary Artery Disease Wilbert S. Aronow, John Arthur McClung, 2015-10-29 Translational Research in Coronary Artery Disease Pathophysiology to Treatment covers the entire spectrum of basic science genetics drug treatment and interventions for coronary artery disease With an emphasis on vascular biology this reference fully explains the fundamental aspects of coronary artery disease pathophysiology Included are important topics including endothelial function endothelial injury and endothelial repair in various disease states vascular smooth muscle function and its interaction with the endothelium and the interrelationship between inflammatory biology and vascular function By providing this synthesis of current research literature this reference allows the cardiovascular scientist and practitioner to access everything they need from one source Provides a concise summary of recent developments in coronary and vascular research including previously unpublished data Summarizes in depth discussions of the pathobiology and novel treatment strategies for coronary artery disease Provides access to an accompanying website that contains photos and videos of noninvasive diagnostic modalities for evaluation of coronary artery disease

Therapeutic Monoclonal Antibodies Zhiqiang An, 2011-09-20 70 chapter authoritative reference that covers therapeutic monoclonal antibody discovery development and clinical applications while incorporating principles experimental data and methodologies First book to address the discovery and development of antibody therapeutics in their entirety Most chapters contain experimental data to illustrate the principles described in them Authors provide detailed methodologies that readers can take away with them and use in their own laboratories

Biosimilars of Monoclonal Antibodies Cheng Liu, K. John Morrow, Jr., 2016-12-09 Addressing a significant need by describing the science and process involved to develop biosimilars of monoclonal antibody mAb drugs this book covers all aspects of biosimilar development preclinical clinical regulatory manufacturing Guides readers through

the complex landscape involved with developing biosimilar versions of monoclonal antibody mAb drugs Features flow charts tables and figures that clearly illustrate processes and makes the book comprehensible and accessible Includes a review of FDA approved mAb drugs as a quick reference to facts and useful information Examines new technologies and strategies for improving biosimilar mAbs **Braunwald's Heart Disease - E-Book** Peter Libby,2021-10-15 Current comprehensive and evidence based Braunwald's Heart Disease remains the most trusted reference in the field and the leading source of reliable cardiology information for practitioners and trainees worldwide The fully updated 12th Edition continues the tradition of excellence with dependable state of the art coverage of new drugs new guidelines more powerful imaging modalities and recent developments in precision medicine that continue to change and advance the practice of cardiovascular medicine Written and edited by global experts in the field this award winning text is an unparalleled multimedia reference for every aspect of this complex and fast changing area Offers balanced dependable content on rapidly changing clinical science clinical and translational research and evidence based medicine Includes 76 new contributing authors and 14 new chapters that cover Artificial intelligence in Cardiovascular Medicine Wearables Influenza Pandemics COVID 19 and Cardiovascular Disease Tobacco and Nicotine Products in Cardiovascular Disease Cardiac Amyloidosis Impact of the Environment on Cardiovascular Health and more Features a new introductory chapter Cardiovascular Disease Past Present and Future by Eugene Braunwald MD offering his unique visionary approach to the field of cardiology Dr Braunwald also curates the extensive bimonthly online updates that include Hot Off the Press with links to Practice Update and Late Breaking Clinical Trials Provides cutting edge coverage of key topics such as proteomics and metabolomics TAVR diabetocardiology and cardio oncology Contains 1 850 high quality illustrations radiographic images algorithms and charts and provides access to 215 videos called out with icons in the print version Highlights the latest AHA ACC and ESC guidelines to clearly summarize diagnostic criteria and clinical implications Provides tightly edited focused content for quick dependable reference Flexible format options include either one or two volumes in print as well as a searchable eBook with ongoing updates Enhanced eBook version included with purchase Your enhanced eBook allows you to access all of the text figures and references from the book on a variety of devices **Cancer Treatment-Related Cardiovascular Disease - Real World Data in Cardio-Oncology** Susan Dent,Arjun Ghosh,Avirup Guha,Purvish M. Parikh,2023-10-18 **Novel Pathogenesis and Treatments for Cardiovascular Disease** David C. Gaze,2023-08-23 This book provides a comprehensive overview of cardiovascular diseases CVDs and associated conditions It is organized into three sections on Cardiovascular Pathophysiology Cardiovascular Diagnostics and Cardiovascular Treatments Chapters address such topics as the role of obesity in CVD cardiotoxicity cardio oncology CVD in different disease states modalities for detecting CVD interventional strategies to prevent or treat CVD and much more **Nutrition and Biotechnology in Heart Disease and Cancer** John B. Longenecker,David Kritchevsky,Marc K. Drezner,2012-12-06 There is a unique nutritional commonality developing in research relating to coronary heart disease

and cancer The primary aim of this conference was to provide a forum for the leading researchers clinicians educators and administrators in these two fields to present a program on heart disease and cancer which included a the major historical milestones b the present areas of greatest interest in research and therapy c the latest nutritional molecular and biotechnological advances and d a perspective on the most promising areas for future research and therapy Scientists have long contended that research marches on the feet of methodology Thus there are numerous examples of research fields opening secondary to methodological advances Some examples are 1 thin layer and gas liquid chromatography which along with high pressure liquid chromatography have broadened the line of advances in lipid research and 2 peR and the resultant impact on molecular biological approaches to several fields of science The organizers of this conference thought the time was propitious for bringing together knowledge on newer aspects of molecular biological research with current advances in the two major areas of degenerative disease coronary heart disease and cancer Our knowledge of these killer diseases has expanded greatly in the past few years and the advance has been catalyzed by use of an array of molecular biological techniques Thanks to these medical thinking in these areas is changing from considerations of treatment to strategies for prevention

Cardiovascular Diseases Y. Robert Li, 2015-02-25 Written in an accessible style and consistent format the book covers both the fundamentals and advances in the pharmacology of cardiovascular drugs as well as their integrated applications in the management of individual cardiovascular diseases Integrates fundamentals and recent advances regarding cardiovascular drugs blending basic and clinical sciences needed to effectively understand and treat cardiovascular diseases Facilitates understanding of drug action and mechanism by covering physiology pathophysiology and pharmacology Includes guidelines and algorithms for pharmacotherapeutic management of cardiovascular diseases Uses case presentations and study questions to enhance understanding of the material Serves as a resource for pharmaceutical and medical students and researchers interested in cardiovascular issues

Risk Factors for Cardiovascular Disease Johnny Chahine, 2022-04-06 Risk Factors for Cardiovascular Disease raises awareness about the importance of early recognition and prevention of modifiable cardiovascular risk factors Some non modifiable factors like diabetes can even be impacted by lifestyle modification like weight loss early in the disease This book also describes cardiovascular risk factors in different patient populations and work settings

Cardiovascular Disease, An Issue of Primary Care: Clinics in Office Practice Mark B. Stephens, 2018-02-09 This issue of Primary Care Clinics in Office Practice Guest Edited by Dr Mark B Stephens is devoted to Cardiovascular Disease Articles in this issue include State of the Heart Overview of disease burden of cardiovascular disease from an epidemiologic perspective Heavy Heart Economic burden of heart disease with projections implications for impact on the health care system Prevention of Heart Disease Coronary Artery Disease Congestive Heart Failure Valvular Heart Disease Peripheral Vascular Disease The Athlete s Heart and Sudden Death Metabolic Syndrome systems thinking in heart disease Women and Heart Disease Heart Disease in Children and Cardiac Imaging

Atherosclerosis and Cardiovascular Disease G.C. Descovich, 2013-12-01 The advances in the field of atherosclerosis and cardiovascular disease continue at an increasingly rapid pace and it is an arduous task for those not directly involved to keep up with the latest developments The papers presented at the 7th Meeting on Atherosclerosis and Cardiovascular Disease held in Bologna as part of the Ninth Centenary of the foundation of the University of Bologna have been collected together here with the aim of providing all the latest information for doctors and research workers concerned with this important branch of medicine We are pleased to be able to thank all those who joined us in celebrating the oldest university in the world The scientific contributions of the highest level are valid proof of the tradition of exchanging experiences and of the continual updating of knowledge in the different sectors of lipid metabolism genetics physiopathology pathological anatomy bio chemical and clinical diagnosis diet pharmacological and non pharmacological therapy The numerous contributions made by authors in the field of epidemiology and the prevention of atherosclerosis were also fundamental since not only research centres but also doctors all over the world are engaged in the battle which was defined by the WHO twenty five years ago as the most important epidemic of the modern age **Insights in Lipids in Cardiovascular Disease: 2021** Irena Levitan, Tomas Vaisar, 2022-08-11
