## **Monocultures Of The Mind Perspectives On Biodiversity And Biotechnology:**

**Monocultures of the Mind** Vandana Shiva, 1993-02 Vandana Shiva has established herself as a leading independent thinker and voice for the South in that critically important nexus where questions of development strategy the environment and the position of women in society coincide In this new volume she brings together her thinking on the protection of biodiversity the implications of biotechnology and the consequences for agriculture of the global pre eminence of Western style scientific knowledge In lucid and accessible fashion she examines the current threats to the planet s biodiversity and the environmental and human consequences of its erosion and replacement by monocultural production She shows how the new Biodiversity Convention has been gravely undermined by a mixture of diplomatic dilution during the process of negotiation and Northern hi tech interests making money out of the new biotechnologies She explains what these technologies involve and gives examples of their impact in practice She questions their claims to improving natural species for the good of all and highlights the ethical and environmental problems posed Underlying her arguments is the view that the North s particular approach to scientific understanding has led to a system of monoculture in agriculture a model that is not being foisted on the South displacing its societies ecologically sounder indigenous and age old experiences of truly sustainable food cultivation forest management and animal husbandry This rapidly accelerating process of technology and system transfer is impoverishing huge numbers of people disrupting the social systems that provide them with security and dignity and will ultimately result in a sterile planet in both North and South In a policy intervention of potentially great significance she calls instead for a halt at international as well as local level to the aid and market incentives to both large scale destruction of habitats where biodiversity thrives and the introduction of centralised homogenous systems of cultivation

*Monocultures of the Mind* Vandana Shiva, 1993 Monocultures of the mind Biodiversity a third perspective Biodiversity and the environment The seed and spinning wheel technology development and biodiversity conservation The biodiversity convention an evaluation from the third world perspective *Monocultures of the Mind* Vandana Shiva, 1993 **Food**

**Biotechnology in Ethical Perspective** Paul B. Thompson, 2007-05-05 Agrifood biotechnology the genetic transformation of plants and animals through recombinant means has created controversy in the food system for more than twenty years This thoroughly revised and amended edition of Paul B Thompson s path breaking study of ethical and philosophical issues raised by this technology up to date The original 1997 edition was the first book length treatment by a philosopher to focus on food and agricultural biotechnology covering ethical issues associated with risk assessment labelling animal transformation patents and the impact of biotechnology on traditional farming communities in both the developed and developing world The new edition reflects lessons from the hotly contested debates over those issues in the intervening decade and includes wholly new discussions on ethical issues associated with livestock cloning the Precautionary Principle and the transatlantic debate between United States and European perspectives on biotechnology Thompson s unique and insightful approach to

addressing the risks and questions of public acceptability associated with novel technology stands as a model for anyone interested in technological innovation and social change The book should be of interest to scholars and citizens interested in the Internet or nanotechnology while it remains an essential resource for understanding the twists and turns of debate over the role of molecular genetics in the transformation of the global food system Food and Agricultural Biotechnology in Ethical Perspective Paul B. Thompson,2020-11-09 This 3rd edition of Food and Agricultural Biotechnology in Ethical Perspective updates Thompson s analysis to reflect the next generation of biotechnology including synthetic biology gene editing and gene drives The first two editions of this book published as Food Biotechnology in Ethical Perspective in 1997 and 2007 were the first comprehensive philosophical studies of genetic engineering applied to food systems The book is structured with chapter length treatments of risk in four categories food safety to animals to the environment and socio economic risks These chapters are preceded by two chapters providing orientation to the uses of gene technology in food and agriculture and to the goals methods and background assumptions of technological ethics There is also a chapter covering all four types of risk as applied to the first US technology recombinant bovine somatotropin The last four chapters take up 1 intellectual property debates 2 religious metaphysical and intrinsic objections to biotechnology 3 issues in risk and trust and 4 a review of ethical issues in synthetic biology gene editing and gene drives the three key technologies that have emerged since the book was last revised **Agrobiodiversity Management for Food Security** Jillian M. Lenné,David Wood,2011 Agrobiodiversity provides most of our food through our interaction with crops and domestic animals Future global food security is firmly anchored in sound science based management of agrobiodiversity This book presents key concepts of agrobiodiversity management critically reviewing important current and emerging issues including agricultural development crop introduction practical diversity in farming systems impact of modern crop varieties and GM crops conservation climate change food sovereignty and policies It will also address claims and misinformation in the subject based on sound scientific principles Education for Sustainability through Internationalisation Neera Handa,2018-08-20 This book suggests how the internationalisation of teaching and learning for sustainability can be a vehicle for a two way flow of knowledge across national cultural and theoretical boundaries Establishing links between the internationalisation of education and the ideal of global sustainability the author presents innovative alternative solutions to address the pressing social environmental and ethical problems of our age a global priority demanding an educational response By engaging with the Hindi concept of tri vid the three in one unification of knowledge the author reassesses the very nature of knowledge through the intellectual agency of both students and educators Once opportunities for alternatives not available in dominant Western knowledge traditions are recognised the development of an innovative alternative perspective becomes possible This pioneering book will be of interest to students and scholars of international education sustainability education and globalisation

**Accessing and Sharing the Benefits of the Genomics Revolution** Peter W.B. Phillips,Chika B.

Onwuekwe,2007-05-09 There is a veritable gold rush mentality in the life science world as scientists entrepreneurs and multinationals are staking claims to the code of life embodied in the world s current stock of plants animals microbes and human populations This edited volume explores the legal economic and political context for the debate about intellectual property rights for traditional knowledge and genetic resources and critically analyses the theory and practice of access and benefits sharing efforts around the world The book also investigates the current flashpoints the David and Goliath battle between Monsanto and Percy Schmeiser over farmers rights the dispute over coexistence of GM and organic production and the ownership and control of human genetic materials stored in human gene banks around the world **People, Plants, and Justice**

Charles Zerner,2000 In an era of market triumphalism this book probes the social and environmental consequences of market linked nature conservation schemes Rather than supporting a new anti market orthodoxy Charles Zerner and colleagues assert that there is no universal entity the market Analysis and remedies must be based on broader considerations of history culture and geography in order to establish meaningful and lasting changes in policy and practice Original case studies from Asia Latin America Africa and the South Pacific focus on topics as diverse as ecotourism bioprospecting oil extraction cyanide fishing timber extraction and property rights The cases position concerns about biodiversity conservation and resource management within social justice and legal perspectives providing new insights for students scholars policy professionals and donor foundations engaged in international conservation and social justice

Heirloom Seeds and Their Keepers Virginia D. Nazarea,2014-11-21 Through characters and stories that offer a wealth of insights about human nature and society Heirloom Seeds and Their Keepers helps readers more fully understand why biodiversity persists when there are so many pressures for it not to The key Nazarea explains is in the sovereign spaces seedsavers inhabit and create where memories counter a culture of forgetting and abandonment engendered by modernity A book about theory as much as practice it profiles these individuals who march to their own beat in a world where diversity is increasingly devalued as the predictability of mass production becomes the norm Environmental Management for Sustainable Development

Chris Barrow,2006-09-27 Environmental management is a wide expanding and rapidly evolving field affecting everyone from individual citizens to businesses governments to international agencies Indisputably it plays a crucial role in the quest for sustainable development This comprehensively updated second edition explores the nature and role of environmental management covering key principles practices tools strategies and policies offers a thorough yet understandable introduction and points to further in depth coverage Among the key themes covered are sustainable development proactive approaches the precautionary principle the polluter pays principle the need for humans to be less vulnerable and more adaptable Reflecting the expansion and evolution of the field this revised edition focuses strongly on sustainable development There has been extensive restructuring to ensure the book is accessible to those unfamiliar with environmental management and it now includes greater coverage of topics including key resources under stress

environmental management tools climate change and urban environmental management With rapid expansion and development of the subject it is easy for those embarking on a course of study to become disorientated but with its well structured coverage effective illustrations and foundation for further more focused interest this book is easily accessible to all

**From Polarisation to Multispecies Relationships** Janet J. McIntyre-Mills, Yvonne Corcoran-Nantes, 2021-08-05 This book explores the concept of multi species relationships and suggests critical systemic pathways to protect shared habitats This book discusses how the eradication of species as a result of rapid urbanisation places humanity at risk This book demonstrates how narrow anthropocentrism has focused on the rights of human beings at the expense of other species and the environment This book explores a priori norms and a posteriori measures and indicators to include and protect multiple species This book aims to strengthen institutional capacity and powers to address and extend the UN 2030 Sustainable Development Agenda by drawing on local wisdom but also the need to implement laws to prevent ecocide This book highlights that our fragile interdependence requires a recognition of our hybridity and interconnectedness within the web of life and suggests ways to reframe policy within and beyond the nation state to support living systems of which we are a strand

**From Field to Fork** Paul B. Thompson, 2015 Paul B Thompson covers diet and health issues livestock welfare world hunger food justice environmental ethics Green Revolution technology and GMOs in this concise but comprehensive study He shows how food can be a nexus for integrating larger social issues in social inequality scientific reductionism and the eclipse of morality

**The Global Food Economy** Tony Weis, 2008-12-08 The Global Food Economy examines the human and ecological cost of what we eat The current food economy is characterized by immense contradictions Surplus food mountains bountiful supermarkets and rising levels of obesity stand in stark contrast to widespread hunger and malnutrition Transnational companies dominate the market in food and benefit from subsidies whilst farmers in developing countries remain impoverished Food miles mounting toxicity and the ecological hoofprint of livestock mean that the global food economy rests on increasingly shaky environmental foundations This book looks at how such a system came about and how it is being enforced by the WTO Ultimately Weis considers how we can find a way of building socially just ecologically rational and humane food economies

**Culture and Society** Nuala C. Johnson, 2018-01-18 Human geographers have been at the forefront of research that examines the relationships between space culture and society This volume contains twenty one essays published over the past thirty years that are iconic instances of this investigative field With a focus on four broad themes landscape identity colonialism nature these essays represent some of the best and most innovative interventions that geographers have made on these topics From the visual to the corporeal from rural Ceylon to urban America and from the sixteenth century to the twenty first this volume brings together a set of theoretically sophisticated and empirically grounded works

*Food Utopias* Paul V. Stock, Michael Carolan, Christopher Rosin, 2015-01-09 Food is a contentious and emotive issue subject to critiques from multiple perspectives Alternative food movements including the different articulations of local food miles seasonality food justice food knowledge and food sovereignty consistently invoke themes around autonomy sufficiency cooperation mutual aid freedom and responsibility In this stimulating and provocative book the authors link these issues to utopias and intentional communities Using a food utopias framework presented in the introduction they examine food stories in three interrelated and complementary ways utopias as critique of existing systems utopias as engagement with experimentation of the novel the forgotten and the hopeful in the future of the food system and utopias as process that recognizes the time and difficulty inherent in changing the status quo The chapters address theoretical aspects of food utopias and also present case studies from a range of contexts and regions including Argentina Italy Switzerland and USA These focus on key issues in contemporary food studies including equity locality the sacred citizenship community and food sovereignty Food utopias offers ways forward to imagine a creative and convivial food system

The Color of Creatorship Anjali Vats, 2020-09-29 The Color of Creatorship examines how copyright trademark and patent discourses work together to form American ideals around race citizenship and property Working through key moments in intellectual property history since 1790 Anjali Vats reveals that even as they have seemingly evolved American understandings of who is a creator and who is an infringer have remained remarkably racially conservative and consistent over time Vats examines archival legal

political and popular culture texts to demonstrate how intellectual properties developed alongside definitions of the good citizen bad citizen and intellectual labor in racialized ways Offering readers a theory of critical race intellectual property Vats historicizes the figure of the citizen creator the white male maker who was incorporated into the national ideology as a key contributor to the nation s moral and economic development She also traces the emergence of racial panics around infringement arguing that the post racial creator exists in opposition to the figure of the hyper racial infringer a national enemy who is the opposite of the hardworking innovative American creator The Color of Creatorship contributes to a rapidly developing conversation in critical race intellectual property Vats argues that once anti racist activists grapple with the underlying racial structures of intellectual property law they can better advocate for strategies that resist the underlying drivers of racially disparate copyright patent and trademark policy      *Beyond Western Economics* Trent Schroyer,2009-05-08 This book combines intellectual history with contemporary events to offer a critique of mainstream economic thought and its neoliberal policy incarnation in global capitalism The critique operates both theoretically at the level of metaphysics and the philosophy of science and concretely in case studies of globalization and world events Trent Schroyer provides a moral and cultural interpretation of modernity and scientism highlighting their political and economic consequences but the book s main purpose is not to criticize The author moves beyond this to offer alternative economic cultures again combining abstract theoretical analysis with concrete case studies of alternative economic formations from local self sufficiency movements to cooperatives and other anti capitalist institutional experiments These case studies exhibit an impressive range of variation from first world to third world from reformist to utopian transformative Finally Schroyer links the project to the global justice movement that opposes corporate globalization and eventually links participatory economics and democratic politics to a new image of science as participatory social learning
