Capitalism and Its Uncertain Future Kristin Plys, Charles Lemert, 2021-10-26 For decades Charles Lemert has been the leading voice in social theory In Capitalism and its Uncertain Future he teams up with one of the most creative emerging social theorists Kristin Plys to

examine how social theory imagines capitalism This engaging and innovative book provides new perspectives on well known theorists from Adam Smith and Frantz Fanon to Gilles Deleuze while also introducing readers to lesser known theorists such as Lucia Sanchez Saornil Mohammad Ali El Hammi and many more The book examines theories of capitalism from four perspectives macro historical theories of the origins of capitalism postcolonial theories of capitalism that situate capitalism as seen from the Global South theories of capitalism from the perspective of labor and prospective theories of capitalism s uncertain future This provocative and ambitious yet accessible perspective on theories of capitalism will be of interest to anyone who wants to explore where we ve been and where we re headed Radical Perspectives on the Economic Crisis of Monopoly Capitalism ,1975 **Stalin's Economist** André Mommen,2011-04-06 This book analyses the contribution of Eugen Jen Varga 1879 1964 on Marxist Leninist economic theory as well as the influence he exercised on Stalin s foreign policy and through the Comintern on the international communist movement During the Hungarian Councils Republic of 1919 Varga was one of those chiefly responsible for transforming the economy into one big industrial and agrarian firm under state authority After the fall of the revolutionary regime that year Varga joined the Hungarian Communist Party soon after which he would become one of the Comintern s leading economists predicting the inevitable crisis of the capitalist system Varga became the Soviet Union s official propagandist As an economic specialist he would advise the Soviet government on German reparation payments and unlike Stalin believed that the capitalist state would be able to plan post war economic recovery which contradicted Stalin s foreign policy strategy and led to his disgrace Thus by the beginning of the Cold War in 1947 Varga was discredited but allowed to keep a minor academic position After Stalin s death in 1953 he reappeared as a well respected economist whose political influence had nonetheless waned In this study Mommen reveals how Stalin s view on international capitalism and inter imperialist rivalries was profoundly influenced by debates in the Comintern and by Varga s concept of the general crisis of capitalism Though Stalin appreciated Varga s cleverness he never trusted him when making his strategic foreign policy decisions This was clearly demonstrated in August 1939 with Stalin s pact with Hitler and in 1947 with his refusal to participate in Marshall s European Recovery Plan This book should be of interest to a wide variety of students and researchers including those concentrating on the history of economic thought Soviet studies international relations and European and Cold War history *Japanese Discourses on the Marxian Theory of Finance* Kei Ehara,2022-02-02 This edited volume traces the development of the Marxian theory of finance in Japan Japanese Marxists have long been engaged in this field of study yet their achievements are hardly known in other languages Japanese Discourses on the Marxian Theory of Finance brings together in English for the first time six core essays essential to the understanding of the history and development of Japanese Marxian economics Part I considers the so called Uno Miyake debate which shaped the direction of the research in postwar Japan Part II includes the three core essays influenced by Uno including an essay by Shigekatsu Yamaguchi who introduced a new method to systematically deal with credit creation which

must be duly taken into consideration if scholars are to analyze today's financialization. Finally, the last two essays follow from Yamaguchi's influential theory to consider the relation of banking with the capital market to complete the theory of finance in Marxian economics.

Stalin's Economic Advisors Kyung Deok Roh, 2018-02-09 Soviet foreign policy in the Stalin era is commonly assumed to have been a direct product of either Marxist ideology or the leader's whims. Both assumptions, however, oversimplify the complex and subtle factors involved in its creation and implementation. Kyung Deok Roh provides an alternative, more nuanced explanation and demonstrates the key role played by Stalin's economic advisors. The so-called Varga Institute, a think tank led by Evgenii Varga, developed a unique scholarly discourse on the capitalist economy and international politics based on an amalgam of Marxist economics and notably the work of American economist W. E. Mitchell. The institute's scholarship, which suggested the resilience, adaptability, and stability of the capitalist economy, created the discursive space within which decisions were made and influenced Stalin to move increasingly from aggressive strategies towards more cautious international policies. Roh's account, the first comprehensive study of this pivotal group, demonstrates the many complex ways that Soviet foreign policy was created and sheds new light onto the controversial relationship between Soviet academia and the party. Based on extensive archival research into previously untouched material, *Stalin's Economic Advisors* is essential reading for all researchers seeking to add nuance to their conception of Stalinist foreign policy, economic thought, and politics.

Economics of Disasters and Climate Change S. Mohammed Irshad, 2024-12-09 This book discusses the theory, method, and practice of risk economics and also examines climate change and disaster's theoretical and practical implications on capital formation and accumulation in the contemporary economic system. It explores the theoretical and practical challenges of engaging with climate and disaster risk in the changing context of capital investments and market expansion. It explains the emergence of an at-risk society and its interface with economic decision-making. The critical issue the book explores is the implication of certainty over the return period of risk and its influence on the economic behaviour of the state and market institutions. Risk sharing and governing economic risks in the context of financial capitalism is a major theoretical issue the book engages with. It offers a new conceptual framework to see how risk economics evolves out of increasing climate and disaster risks and a counter-discourse on the mainstream economic theoretical standpoint on capital and explains the economics of capital replacement in vulnerable social systems. These broader perspectives will be valuable to economists, researchers, experts in disaster and climate risk, corporate professionals, economics educators, specialists in financial economics, and those involved in development policy-making. This book offers a detailed discussion of risk mitigation and its interface with sustainable development goals, including climate action.

Neoliberalism and Imperialism: Dissecting the Dynamics of Global Oppression Tatah Mentan, 2016-08-06

Today's neoliberal imperialism crushes all unfavourable conditions through multiple forms of oppression to ensure the creation of a world in its own image. The systemic and structural oppression birthed by neoliberal imperialism once again reproduces and implements colonialism armed robbery on a global scale. The difference between the old form and the new form is the scale of destruction and the overt use of Weapons of Mass Destruction. Hence the militarization of the globe is a natural outcome. In this book Professor Tatah Mentan argues that United Fruit Company for instance could not have flourished without the strong support of the Marines the U S State Department and all of its resources. In fact the French the German the British and the Belgian financiers could not have been able to suck the blood out of their colonies without their legionnaires soldiers mercenaries preachers merchants and generals. Specifically the Western colonial empires in the nineteenth century presented their penetration pillage and rape of Africa Asia and Latin America as modernization and tutelage aided by the ideology of survival of the fittest. This conceit pervaded the entire Western bourgeois social science educational and religious institutions. And today there is the same clear symbiotic relationship between business and the military. Empirical realities demonstrate that companies like Microsoft could not enjoy its overwhelming prosperity without having the strong military that America has. This is precisely why neoliberal imperialism operates alongside oppressive militarism war and dictatorship and must be disrupted to liberate mankind from its death grip.
