Monsters in the Woods RJ Smith,2018-05-01 THERE IS a war brewing and humanity is fighting for survival against the scourge of an alien reptilian race But only the pure blood of a teenager can save the people of Mother Earth In touch with a distant galaxy he must enlist the help of newly discovered friends in order to fight the creatures in another dimension Gaining special gifts in a distant and dangerous realm the boys are readied for the ultimate fight to save the universe Discovering magic and learning how to use their newly acquired superpowers the boys must unite with a band of giant Cyclops and small red skinned aliens during one of the worst blizzards to ever hit the northeast This novel tells of the fiends who stalk the darkness creatures who snatch the flesh from the living Monsters in the Woods is an unrelenting and ferocious tale of a monstrous race invading our planet and the all out war that follows Monsters is a heart stopping rollercoaster ride of suspense an adventure for those with enormous imaginations After all I want you uncomfortable biting the tips of your fingernails down to the bloody nubs grinding your teeth in a fit of vicious nerves afraid to look under the bed That s bliss for me watching as you shift your eyes from side to side a nervous glance a terrified expression planted on your face That s where I need you horrified at the thud outside the window a rustling in the back of your dark bedroom s closet a noise in the

next room I should explain this EPIC tale has roots in reality It sprouts from honest to God reports of green and scaly creatures documented throughout humanity s history This telling speaks of what if And oh my Not long ago I happened across a Hopi legend that warned of reptilian creatures who were said to have lived hundreds of feet below what is now downtown Hollywood Many claim it s the stuff of science fiction Yet could it really be true When I first heard of the lizard people and their alleged existence during my annual pilgrimage to the International UFO Congress Annual Symposium held at the We Ko Pa Resort and Conference Center in Fountain Hills Arizona I had to wonder could there really be something to this tale Keep in mind scientists believe there are one hundred billion stars in our galaxy and ten trillion galaxies in the observable universe That means there are about 1 000 000 000 000 000 000 000 000 a thousand quintillions or one sextillion stars out there It is believed that 7 6% of those are Class G stars like our own sun That s important because it is estimated that almost all Class G stars support at least one planet in which life must exist The Universe is believed to be teeming with life If that is such couldn t there be other life forms like E T out there somewhere And If so why is it so fundamentally insane to suppose they ve been coming to Earth since the beginning of mankind to manipulate our DNA hunt or live among us
