integration the book is divided into three parts Part I a unifying analysis of crime and crime control does three things First the studies of criminology and criminal justice are reunited in the context of globalization Second the official and unofficial forms of crime and criminal behavior are examined domestically and globally Third unlike most criminology texts theories are also used to explain the administration of criminal justice the behavior of law enforcement and crime control as well as the policies of sentencing and punishment Part II explaining criminal behavior and crime outlines the changing historical conditions of criminological inquiry and provides detailed overviews of the various contributions made from economics and law biology psychology and sociology These criminological theories are also subject to a critique based on the partialities of most of these explanations and on the need for developing integrated explanations Part III integrating criminological strands is divided between presenting elaborations of contemporary criminological integrations that transcend disciplinary boundaries and elaborating on both domestic and international policies of crime reduction and justice enhancement in an age of globalization

Montana Crime in Perspective 2002 Kathleen O'Leary Morgan, 2002-04-01 *Revitalizing Victimization Theory* Travis C. Pratt, Jillian J. Turanovic, 2021-04-08

Revitalizing Victimization Theory Revisions Applications and New Directions revises some of the major perspectives in victimization theory applies theoretical perspectives to the victimization of vulnerable populations and carves out new theoretical territory that is clearly needed but has yet to be developed With the exception of a handful of isolated works in the mid twentieth century theory and research on victimization did not come into its own until the late 1970s with the articulation of lifestyle and routine activity theories Research conducted within this tradition continues to be an

important part of the overall criminological enterprise and a large body of empirical knowledge has been generated. Nevertheless, theoretical advances in the study of victimization have largely stalled within the field of criminology. Indeed, little in the way of new theoretical headway has been made in well over a decade. This is an ideal time to revitalize victimization theory, and this volume does just that. It is an ambitious project that will hopefully reignite the kinds of theoretical discussions that once held the attention of the field. The work included here will shape the future of victimization theory and research in years to come. This volume should be of interest to a wide range of criminologists and have the potential to be used in graduate seminars and upper level undergraduate courses.

DNA and Property Crime Scene Investigation David Makin, 2015-05-20. Traditionally, forensic investigation has not been fully utilized in the investigation of property crime. This ground-breaking book examines the experiences of patrol officers, command staff, detectives, and chiefs as they navigate the expectations of forensic evidence in criminal cases, specifically property crimes. *DNA and Property Crime Scene Investigation* looks at the current state of forensic technology and, using interviews with police officers, command staff, forensic technicians, and prosecutors, elucidates who is doing the work of forensic investigation. It explores how better training can decrease backlogs in forensic evidence processing and prevent mishandling of crucial evidence. Concluding with a police chief's perspective on the approach, *DNA and Property Crime Scene Investigation* provides insight into an emerging and important approach to property crime scene investigation.

Key Features: Provides practical information on implementing forensic investigation for property crimes; Examines the current state of forensic technology and points to future trends; Includes a police chief's perspective on the forensic approach to investigating property crimes; Utilizes interviews with professionals in the field to demonstrate the benefits of the approach.

Education,Committee on Law and Justice,Committee on Assessing Juvenile Justice Reform,2013-06-22 Adolescence is a distinct yet transient period of development between childhood and adulthood characterized by increased experimentation and risk taking a tendency to discount long term consequences and heightened sensitivity to peers and other social influences A key function of adolescence is developing an integrated sense of self including individualization separation from parents and personal identity Experimentation and novelty seeking behavior such as alcohol and drug use unsafe sex and reckless driving are thought to serve a number of adaptive functions despite their risks Research indicates that for most youth the period of risky experimentation does not extend beyond adolescence ceasing as identity becomes settled with maturity Much adolescent involvement in criminal activity is part of the normal developmental process of identity formation and most adolescents will mature out of these tendencies Evidence of significant changes in brain structure and function during adolescence strongly suggests that these cognitive tendencies characteristic of adolescents are associated with biological immaturity of the brain and with an imbalance among developing brain systems This imbalance model implies dual systems one involved in cognitive and behavioral control and one involved in socio emotional processes Accordingly adolescents lack mature capacity for self regulations because the brain system that influences pleasure seeking and emotional reactivity develops more rapidly than the brain system that supports self control This knowledge of adolescent development has underscored important differences between adults and adolescents with direct bearing on the design and operation of the justice system raising doubts about the core assumptions driving the criminalization of juvenile justice policy in the late decades of the 20th century It was in this context that the Office of Juvenile Justice and Delinquency Prevention OJJDP asked the National Research Council to convene a committee to conduct a study of juvenile justice reform The goal of

Reforming Juvenile Justice A Developmental Approach was to review recent advances in behavioral and neuroscience research and draw out the implications of this knowledge for juvenile justice reform to assess the new generation of reform activities occurring in the United States and to assess the performance of OJJDP in carrying out its statutory mission as well as its potential role in supporting scientifically based reform efforts
