Wang,2006-03-30 The last decade of the 20th century has witnessed a surge of interest in numerical computation intensive approaches to information processing The lines that draw the boundaries among statistics optimization artificial intelligence and information processing are disappearing and it is not uncommon to find well founded and sophisticated mathematical approaches in applications traditionally associated with ad hoc programming Heuristics has come a branch of optimization and statistics Clustering is applied to analyze soft data and to provide fast indexing in the World Wide Web Non trivial matrix algebra is at the heart of the last advances in computer vision The breakthrough impulse was apparently due to the rise of the interest in artificial neural networks after its rediscovery in the late 1980s Disguised as ANN numerical and statistical methods made an appearance in the information processing scene and others followed A key component in many intelligent computational processing is the search for an optimal value of some function Sometimes this function is not evident and it must be made explicit in order to formulate the problem as an optimization problem The search then takes place in high dimensional spaces that can be either discrete or continuous or mixed The shape of the high dimensional surface that corresponds to the optimized function is usually very complex Evolutionary algorithms are increasingly being applied to information processing applications that require any kind of optimization Concise Encyclopedia of Mexico Michael Werner,2015-05-11 Concise Encyclopedia of Mexico includes approximately 250 articles on the people and topics most relevant to students seeking information about Mexico Although the Concise version is a unique single volume source of information on the entire sweep of Mexican history pre colonial colonial and moderns it will emphasize events that affecting Mexico today events students most need to understand *Supplement to the Handbook of Middle American Indians, Volume 1* Victoria Reifler Bricker,Jeremy A.
