Alaska's Children's House Verna Euwer, 2015-04-07 Preschool is a time in a child's life when adults can stimulate a child's brain to grow as they pass through the various stages of childhood. These changes should involve their motor and sensory functions through experiences in their environment. The purpose of a preschool should be to lay the groundwork to build on for the future. Certainly it should not be to make little academic wizards of the children. Instead, there should be devices to help children refine the needed essential skills in life. Opportunity to improve their motor skills be introduced to some of the basics of the academic world, learn about the community in which they live and yet remain a young child in heart and soul. Alaska's Children's House gives you ideas for all these.
