No Uncertain Future:

Uncertain Futures Jens Beckert, Richard Bronk, 2018-07-11 *Uncertain Futures* considers how economic actors visualize the future and decide how to act in conditions of radical uncertainty. It starts from the premise that dynamic capitalist economies are characterized by relentless innovation and novelty and hence exhibit an indeterminacy that cannot be reduced to measurable risk. The organizing question then becomes how economic actors form expectations and make decisions despite the uncertainty they face. This edited volume lays the foundations for a new model of economic reasoning by showing how in conditions of uncertainty economic actors combine calculation with imaginaries and narratives to form fictional expectations that coordinate action and provide the confidence to act. It draws on groundbreaking research in economic sociology, economics, anthropology, and psychology to present theoretically grounded empirical case studies. These demonstrate how grand narratives, central bank forward guidance, economic forecasts, finance models, business plans, visions of technological futures, and new era stories influence behaviour and become instruments of power in markets and societies. The market impact of shared calculative devices, social narratives, and contingent imaginaries underlines the rationale for a new form of narrative economics.

Uncertain Futures Ignasi Clemente, 2015-07-29 This book examines children and young people's attempts to participate in conversations about their own treatment throughout uncertain cancer trajectories, including the events leading up to diagnosis, treatment, remission, relapse, and cure or death. Clearly and compellingly written, Clemente relies on a new multi-layered method to identify six cancer communication strategies. Illustrates that communication is central to how children, parents, and healthcare professionals constitute influence and make sense of the social worlds they inhabit or that they want to inhabit. Provides ethnographic case studies of childhood cancer patients in Spain using children's own words. Examines the challenges of how to talk to and how to encourage patients' involvement in treatment discussions. In his critique of the telling versus not telling debates, Clemente argues that communication should be adjusted to the children's own needs and that children's own questions can indicate how much or little they want to be involved. *Uncertain Futures* is the winner of the 15th Annual Modest Reixach Prize.

The Emperor's New Mind Roger Penrose, 1999-03-04 Winner of the Wolf Prize for his contribution to our understanding of the universe, Penrose takes on the question of whether artificial intelligence will ever approach the intricacy of the human mind. 144 illustrations.

A Husband for All Seasons Irene Brand, 2010-12-27 His faith was being tested for the first time. Chad Reece's promising pro football career was cut short by a devastating accident, and then a kidney transplant revealed his biological parents were a couple he'd considered family friends. Shaken, Chad was determined to recover on his own when he met Vicky Lanham, a pretty hospital volunteer. Vicky's passion for mission work impressed Chad, who felt a call of his own to assist others. Perhaps it was the start of God's new plan.
