Shaping and Reshaping the Caribbean Martin Munro, 2000 The current drive in Caribbean literary studies stresses similarities and points of convergence between the various islands of the archipelago and their authors the fundamental aim of which is to move closer to an all encompassing theory of Caribbeanness Martin Munro challenges this movement and through a study of the work of Aime Cesaire and Rene Depestre proposes an alternative vision of the present and future of Caribbean literature The main areas of inquiry are how these two Caribbean writers construct their sense of themselves how they relate to the Caribbean and to the wider world and how they have been influenced by the historical and cultural particularities of their respective islands Aime Cesaire's sense of self and of the Caribbean is essentially shaped around the circuit triangulaire the model of Africa Europe Caribbean interdependencies ultimately inherited from the time of the slave trade Munro shows how Cesaire views the Caribbean as a deeply traumatic insubstantial space how he looks to Africa for his lost sense of self and how Europe is seen at once as the malevolent colonial power and also the home of poetry and learning

Rene Depestre's Caribbean shape is quite different. Africa is relatively absent in Depestre's work. Europe is not presented as a threat and Depestre, unlike Césaire, sees in the Caribbean an energy and a creativity brought about by the historical fusion of disparate cultures. An important factor in shaping Depestre's model of Caribbeaness is his long exile from Haiti and Depestre's experience of exile is analysed in detail. The combination of broad contextualization, diverse theoretical approaches and close analysis of these important writers' work produces a strong argument against attempts to view and read writing from the Caribbean as one literature. Difference and diversity, it is argued, predominate as Caribbean writing embraces the new century and the whole notion of Caribbeaness undergoes further processes of highly creative splintering and reshaping.

Characteristics and Challenges of High Achieving Second-Generation Nigerian Youths in the United States Patricia Ngozi Anekwe, 2009-09-11. This study investigated the characteristics and challenges of high-achieving second-generation Nigerian youths in the United States. An increasing

number of youths in America's schools are from immigrant backgrounds due to the flow of immigration from Latin America, Asia, and Africa. Given the local and national mandates to improve the academic achievement of all children, we cannot afford to leave any group behind. Although research on immigrant children from Asia and Latin America and their adaptation and schooling has increased in the last two decades, the educational experiences of Black immigrant children from Africa and the Caribbean have been understudied. The scant research on African immigrants lumps all Africans into a homogeneous group despite the different experiences and obvious diversity found within Africa and among African immigrants. Using theoretical triangulation from Educational Anthropology, cultural ecological theory, Sociology, social capital, and Psychology, social cognitive theory, the researcher examined the role of parents, personal traits, and social contexts on the academic experiences of high-achieving second-generation Nigerian youths. The study used surveys, in-depth interviews of Nigerian youths and parents, mothers, and a focus group interview of high-achieving second-generation Nigerian youths to explore the academic experiences of high-achieving second-generation Nigerian youths to identify factors that determine their educational outcomes. It is anticipated that the results of this study will contribute to the literature on immigrant minority and Black students' education in the United States. High-achieving second-generation Nigerian youths credited their parents, extended family, the Nigerian community, and their upbringing for their motivation and academic success. Nigerian parents were actively engaged with the education of their children both in the traditional realms of school involvement and in the non-traditional school engagement. Although youths faced the challenges of peer teasing, underpreparation for college, and parental pressure, they devised coping strategies through code-switching, reevaluating their definition of academic success, and increasing determination and effort. They also were involved in several extracurricular activities that helped them to create social networks with peers and adults and to break social barriers.

US Army Psychiatry in the Vietnam War: New Challenges in Extended Counterinsurgency Warfare Norman M. Camp, 2015-03-15
NOTE: NO FURTHER DISCOUNT FOR THIS PRODUCT OVERSTOCK SALE. Significantly reduced list price. During Vietnam War 1965-1973, the US Army suffered a severe breakdown in soldier morale and discipline in Vietnam, matters that are not only at the heart of military leadership but also ones that overlap with the mission of Army psychiatry. The psychosocial strain on deployed soldiers and their leaders in Vietnam, especially during the second half of the war, produced a wide array of individual and group symptoms that thoroughly tested Army psychiatrists and mental health colleagues there. This book seeks to consolidate a history of the military psychiatric experience in Vietnam through assembling and synthesizing extant information from a wide variety of sources documenting the success and failure of Army's psychiatry in responding to the psychiatric and behavioral problems that changed and expanded as the war became protracted and bitterly controversial. Mental health professionals, especially psychiatrists in both military and civilian professions, as well as military historians researching the Vietnam era, may be interested in this volume. Gendered Mobilizations and

Intersectional Challenges Jill Irvine, Sabine Lang, Celeste Montoya, 2019-07-27 A long and ongoing challenge for social justice movements has been how to address difference. Traditional strategies have often emphasized universalizing messages and common identities as means of facilitating collective action. Feminist movements, gay liberation movements, racial justice movements, and even labour movements have all focused predominantly on respective singular dimensions of oppression. Each has called on diverse groups of people to mobilize but without necessarily acknowledging or grappling with other relevant dimensions of identity and oppression. While focusing on commonality can be an effective means of mobilization, universalist messages can also obscure difference and can serve to exclude and marginalize groups in already precarious positions. Scholars and activists, particularly those located at the intersection of these movements, have long advocated for more inclusive approaches that acknowledge the significance and complexity of different social locations with mixed success. *Gendered Mobilizations and Intersectional Challenges* provides a much needed intersectional analysis of social movements in Europe and North America. With an emphasis on gendered mobilization, it looks at movements traditionally understood and/or classified as singularly gendered as well as those organized around other dimensions of identity and oppression or at the intersection of multiple dimensions. **Instruction papers** International correspondence schools, 1903 **Policy**

Challenges in Modern Health Care Lynn B. Rogut, James R. Knickman, David Mechanic, David Colby, 2005-04-08 Health care delivery in the United States is an enormously complex enterprise and its 1.6 trillion annual expenditures involve a host of competing interests. While arguably the nation offers among the most technologically advanced medical care in the world, the American system consistently underperforms relative to its resources. Gaps in financing and service delivery pose major barriers to improving health, reducing disparities, achieving universal insurance coverage, enhancing quality, controlling costs, and meeting the needs of patients and families. Bringing together twenty-five of the nation's leading experts in health care policy and public health, this book provides a much needed perspective on how our health care system evolved, why we face the challenges that we do, and why reform is so difficult to achieve. The essays tackle tough issues including socioeconomic disadvantage, tobacco, obesity, gun violence, insurance gaps, the rationing of services, the power of special interests, medical errors, and the nursing shortage. Linking the nation's health problems to larger political, cultural, and philosophical contexts, *Policy Challenges in Modern Health Care* offers a compelling look at where we stand and where we need to be headed.
