Redefining Families Adele Eskeles Gottfried, Allen W. Gottfried, 2013-06-29 Families are undergoing dramatic changes in our society Our traditional views are being challenged by new family arrangements These new family arrangements are forcing redefinitions of what constitutes a family and raising significant issues regarding the potential developmental consequences for children in these families if such exist Moreover the ramifications of redefined families and their bearing on children's development extend into the legal political and societal arenas This book focuses on the relationships between diverse family arrangements and children's development as well as on legal and social implications Our interest in this area emanates from our experience in directing the Fullerton Longitudinal Study In the course of this investigation we observed families undergoing transformation most commonly in maternal employment and marital status Our initial research on the role of maternal employment in children's development provided the scientific foundation for our interest Just as we feel that maternal employment and dual earner families should be comprehensively researched regarding their relationships to children's development we also believe that

other contemporary family arrangements should receive extensive attention in the developmental literature Hence the idea for this book emerged

La Nueva California David Hayes-Bautista, 2004-11-01 Since late 2001 more than fifty percent of the babies born in California have been Latino When these babies reach adulthood they will by sheer force of numbers influence the course of the Golden State This essential study based on decades of data paints a vivid and energetic portrait of Latino society in California by providing a wealth of details about work ethic family strengths business establishments and the surprisingly robust health profile that yields an average life expectancy for Latinos five years longer than that of the general population Spanning one hundred years this complex fascinating analysis suggests that the future of Latinos in California will be neither complete assimilation nor unyielding separatism Instead the development of a distinctive regional identity will be based on Latino definitions of what it means to be American

Multicultural Challenges and Redefining Identity in East Asia Nam-Kook Kim, 2016-04-15 Globalization and increased migration have brought both new opportunities and new tensions to traditional East Asian societies Multicultural Challenges and Redefining Identity in East Asia draws together a wide range of distinguished local scholars to discuss multiculturalism and the changing nature of social identity in East Asia Regional specialists review specific events and situations in China Korea Japan Thailand Vietnam Singapore Taiwan Malaysia Indonesia and the Philippines to provide a focus on life as it is lived at the local level whilst also tracing macro discourses on the national issues affected by multiculturalism and identity The contributors look at the uneven multicultural development across these different countries and how to bridge the gap between locality and universality They examine how ethnic

majorities and minorities can achieve individual rights exert civic responsibility and explain how to construct a deliberative framework to make sustainable democracy possible This book considers the emergence of a new cross national network designed to address multicultural challenges and imagines an East Asian community with shared values of individual dignity and multicultural diversity With strong empirical support it puts forward a regulative ideal by which a new paradigm for multicultural coexistence and regional cooperation can be realized *An Empire Wilderness* Robert D. Kaplan, 2014-11-12 Having reported on some of the world's most violent least understood regions in his bestsellers *Balkan Ghosts* and *The Ends of the Earth* Robert Kaplan now returns to his native land the United States of America Traveling like Tocqueville and John Gunther before him through a political and cultural landscape in transition Kaplan reveals a nation shedding a familiar identity as it assumes a radically new one An *Empire Wilderness* opens in Fort Leavenworth Kansas where the first white settlers moved into Indian country and where Manifest Destiny was born In a world whose future conflicts can barely be imagined it is also the place where the army trains its men to fight the next war A nostalgic view of the United States is deliberately cultivated here Kaplan writes as if to bind the uncertain future to a reliable past From Fort Leavenworth Kaplan travels west to the great cities of the heartland to St Louis once a glorious shipping center expected to outshine imperial Rome and now touted with its desolate inner city and miles of suburban gated communities as the most average American city Kaplan continues west to Omaha down through California north from Mexico across Arizona New Mexico and Texas up to Montana and Canada and back through Oregon He visits Mexican border settlements and dust blown county sheriffs offices Indian reservations and nuclear bomb plants cattle ranches in the Oklahoma Panhandle glacier mantled forests in the Pacific Northwest swanky postsuburban sprawls and grim bus terminals and comes at last to the great battlefield at Vicksburg Mississippi where an earlier generation of Americans gave their lives for their vision of an American future But what if anything he asks will today's Americans fight and die for At Vicksburg Kaplan contemplates the new America through which he has just traveled an America of sharply polarized communities that draws its population from pools of talent far beyond its borders an America where the distance between winners and losers grows exponentially as corporations assume government functions and the wealthy find themselves more closely linked to their business associates in India and China than to their poorer neighbors a few miles away an America where old loyalties and allegiances are vanishing and new ones are only beginning to emerge The new America he found is in the pages of this book Kaplan gives a precise and chilling vision of how the most successful nation the world has ever known is entering the final and highly uncertain phase of its history *Shaping the Future of Work* Thomas Kochan, Lee Dyer, 2020-11-24 This book provides a clear roadmap for the roles workers and leaders in business labor education and government must play in building a new social contract for all to prosper It is a call to action for a collaborative effort to develop both high quality jobs and strong successful businesses while simultaneously overcoming the deep social and economic divisions that are all too apparent in society today Written by two
