Redesigning Humans Choosing Our Children's Genes:

Redesigning Humans Gregory Stock, 2002 Cloning and genetic engineering are here now and cannot be stopped Far from being terrified we should celebrate these new technologies for making a better future argues Gregory Stock

Redesigning Humans Gregory Stock, 2002 Examines potential uses for genetic technology including the ability to identify and manipulate genes and the social and moral consequences of such decisions **Redesigning Humans** Gregory Stock, 2003 Writing for the lay reader Stock the director of the Program on Medicine Technology and Society at the School of Public Health at UCLA discusses the science potential impact and many controversies surrounding the development of germline engineering which involves selectively altering human g

Theology and the Body Stephen Garner, 2011-12-31 The human body is the primary lens through which we view encounter and engage the world around us It is no surprise then to find a wide range of theological reflection upon the human body from those that affirm the human body as something very good through to other more negative views where the body is something to be marginalised or escaped from The body and theology also meet in conversations over body mind and soul gender disability eschatology race and culture sexuality Christology and medicine and technology to name but a few Each of the authors in this volume pick up the theme of embodiment as the lens through which they look at an aspect of theology and body providing an engaging window onto some of these discussions **Science and Religion in Education** Berry Billingsley, Keith Chappell, Michael J. Reiss, 2019-11-06

This book brings together the latest research in education in relation to science and religion Leading international scholars and practitioners provide vital insights into the underlying debates and present a range of practical approaches for teaching Key themes include the origin of the universe the theory of evolution the nature of the human person the nature of science and Artificial Intelligence These are explored in a range of international contexts The book provides a valuable resource for teachers students and researchers in the fields of education science religious education and the growing specialist field of science and religion Science and Religion in Education is a compelling read for current and future generations of academic researchers and teachers who wish to explore the fascinating intersect between science education and religious studies The research findings and insights presented by these international scholars offer new dimensions on contemporary practice Vaille Dawson Professor of Science Education University of Western Australia Science and Religion in Education offers a fascinating and diverse collection of chapters surveying the current state of thinking about how science and religion can be understood in education The book offers a wealth of thought provoking material for anyone interested in the natures of science and religion their relationships or their representation within the curriculum Professor Keith Taber University of Cambridge Science education and religious education are uncomfortable bedfellows This book written in part as a response to the perhaps too clear accounts of Ian Barbour provides suitably nuanced pictures of how science and religion are dealt with in schools Whatever the views of specialists young people receive an education in both science and religion hearing

their voices is refreshing in such a serious academic account Julian Stern Professor of Education and Religion York St John University Humans have long endeavored to make sense of the world often using science and religion Yet these two great traditions are frequently seen as incompatible This useful volume features thoughtful contributions from experts whose work straddles the divide and provides educators with arguments engaging strategies and historical perspectives to help build a bridge and allow a fruitful discussion in schools William F McComas Distinguished Professor of Science Education University of Arkansas Equal parts critical examination of existing models for the relationship between science and religion scholarly exposition of newer models and insights toward practical application in classrooms this book is an invaluable resource for science and religion educators If you have been thinking it is time we looked beyond Barbour s taxonomy you will want to read this book If you have not I implore you to read this book Jason Wiles Associate Professor of Biology and Science Education Syracuse University

Ferocious Minds Damien Broderick, 2005-01-01 Two centuries ago the first Enlightenment failed when its dream of reason smashed into the passions and fury of stubborn humans Without a deep broad understanding of the world the emerging Enlightenment was left floundering its best impulses perverted into the bloody excess of the French Revolution Arguably its idealism and noble goals led directly and shockingly to the 20th century s totalitarian nightmares Now the 21st century is learning anew the Faustian hunger to know everything that can be known But Enlightenment values of reason and tolerance enriched by new knowledge face a complex world no less eager to embrace medieval terrorism and ancient superstitions a world bizarrely denying itself many of the fresh opportunities and insights availed by science Can we find cures for poverty unhappiness ignorance the ruination of the planet aging and perhaps for death itself If so should we Damien Broderick s own ferocious mind invites you to explore today s unexpected treasure house of understanding and provides enticing glimpses of tomorrow s

The Politics of Life Itself Nikolas Rose, 2009-02-09 For centuries medicine aimed to treat abnormalities But today normality itself is open to medical modification Equipped with a new molecular understanding of bodies and minds and new techniques for manipulating basic life processes at the level of molecules cells and genes medicine now seeks to

manage human vital processes The Politics of Life Itself offers a much needed examination of recent developments in the life sciences and biomedicine that have led to the widespread politicization of medicine human life and biotechnology Avoiding the hype of popular science and the pessimism of most social science Nikolas Rose analyzes contemporary molecular biopolitics examining developments in genomics neuroscience pharmacology and psychopharmacology and the ways they have affected racial politics crime control and psychiatry Rose analyzes the transformation of biomedicine from the practice of healing to the government of life the new emphasis on treating disease susceptibilities rather than disease the shift in our understanding of the patient the emergence of new forms of medical activism the rise of biocapital and the mutations in biopower He concludes that these developments have profound consequences for who we think we are and who we want to be

Biotechnology, Education and Life Politics Pádraig Murphy, 2014-04-24 What should individuals and society do when genetic screening becomes widely available and with its impact on current and future generations still uncertain How can our education systems around the world respond to these developments Reproductive and genetic technologies RGTs are increasingly controversial and political We are entering an era where we can design future humans firstly by genetic screening of undesirable traits or indeed embryos but perhaps later by more radical genetic engineering This has a profound effect on what we see as normal acceptable and responsible This book argues that these urgent and biopolitical issues should be central to how biology is taught as a subject Debate about life itself has always been at the forefront of connected molecular genetic and social personal identity levels and each of these levels requires processes of communication and debate what Anthony Giddens called in passing life politics In this book P draig Murphy opens the term up with examples from field research in schools student responses to educational films exploring the future of RGTs and science studies of strategic biotechnology and the lab practices of genetic screening Life political debate is thoroughly examined and is identified as a way of connecting mainstream education of biology with future generations Biotechnology Education and Life Politics will appeal to post graduates and academics involved with science education science communication communication studies and the sociology of education

The Posthuman Imagination Tanmoy Kundu, Saikat Sarkar, 2021-02-08 This volume including an extended interview with noted philosopher of posthumanism Francesca Ferrando explores the contemporary philosophical literary and cultural landscapes that have emerged as a response to the unavoidable crisis faced by humans in the Anthropocene era The essays gathered here map posthumanism both as theoretical posthumanism which primarily seeks to develop new knowledge and as practical posthumanism which emphasizes socio political economic and technological changes Posthumanism which explores how one can address the question of what means to be human today is a burgeoning area of interest among universities across the globe Written in accessible yet scholarly language this volume introduces posthumanism in its diverse ramifications and explicates the subject through various literary and filmic texts in order to cater to the needs of researchers and students in the humanities

The Future of Bioethics Akira

Akabayashi,2014-01-09 Akira Akabayashi presents the first book to explore the conversation on bioethics that is taking place between scholars and practitioners from the East and West the first book in the discipline of bioethics for the globalized world of the future An international team of experts address emerging issues in bioethics focus on new developments and their potential for change and set the agenda for the future Most studies in bioethics advocating East West dialogue have either attempted cross cultural comparisons or have proposed Eastern philosophical paradigms to counter Western ideas The tacit premise of previous work on the East West dialogue is therefore a strain of relativism Simply maintaining a respectful distance from other cultures is no longer sufficient in this era of globalization The time has come for active engagement among different cultural perspectives The Future of Bioethics initiates discussion on bioethical issues that arise from new medical technologies such as regenerative medicine enhancement research ethics and synthetic biology and goes on to address challenging dilemmas that result from the globalization of social change such as transplantation tourism public health ethics care in the aging society and professionalism The volume presents original work by leading researchers in the field alongside that of promising new scholars as such it establishes not only a cross cultural dialogue but dialogue between researchers of different generations The book is divided into two parts the first on the progress of biomedical technologies and ethics and the second on globalization and bioethics Each part contains four sections on different topics which feature a lead essay followed by a set of commentaries and further discussion

Transhumanism and Transcendence

Ronald Cole-Turner,2011-09-29 The timeless human desire to be more beautiful intelligent healthy athletic or young has given rise in our time to technologies of human enhancement Athletes use drugs to increase their strength or stamina cosmetic surgery is widely used to improve physical appearance millions of men take drugs like Viagra to enhance sexual performance And today researchers are exploring technologies such as cell regeneration and implantable devices that interact directly with the brain Some condemn these developments as a new kind of cheating not just in sports but in life itself promising rewards without effort and depriving us most of all of what it means to be authentic human beings Transhumanists on the other hand reject what they see as a rationalizing of human limits as if being human means being content forever with underachieving bodies and brains To be human they insist is to be restless with possibilities always eager to transcend biological limits As the debate grows in urgency how should theology respond Christian theologians recognize truth on both sides of the argument pointing out how the yearnings of the transhumanists if not their technological methods find deep affinities in Christian belief In this volume Ronald Cole Turner has joined seasoned scholars and younger emerging voices together to bring fresh insight into the technologies that are already reshaping the future of Christian life and hope

Addiction Neuroethics Adrian Carter,Wayne Hall,2011-11-17 Addiction is a significant health and social problem and one of the largest preventable causes of disease globally Neuroscience promises to revolutionise our ability to treat addiction lead to recognition of addiction as a real disorder in need of medical treatment and thereby reduce stigma and discrimination However neuroscience raises

numerous social and ethical challenges If addicted individuals are suffering from a brain disease that drives them to drug use should we mandate treatment Does addiction impair an individual s ability to consent to research or treatment How will neuroscience affect social policies towards drug use Addiction Neuroethics addresses these challenges by examining ethical implications of emerging neurobiological treatments including novel psychopharmacology neurosurgery drug vaccines to prevent relapse and genetic screening to identify individuals who are vulnerable to addiction Essential reading for academics clinicians researchers and policy makers in the fields of addiction mental health and public policy **Gothic Science**

Fiction 1980-2010 Sara Wasson,Emily Alder,2011-01-01 Gothic fiction s focus on the irrational and supernatural would seem to conflict with science fiction s rational foundations However as this novel collection demonstrates the two categories often intersect in rich and revealing ways Analyzing a range of works including literature film graphic novels and trading card games from the past three decades through the lens of this hybrid genre this volume examines their engagement with the era s dramatic changes in communication technology medical science and personal and global politics **A Moral Theory of Sports** Richard J. Severson,2019-06-12 The breadth of our moral experience is more extensive than has been believed over the past several millennia There is more to morality than being honest and good or aspiring to universal principles In fact in many ways the morality of our distant ancestors bears a remarkable resemblance to the moral experiences of modern athletes In A Moral Theory of Sports ethicist Richard J Severson brings together stories from today s sports world and the moral practices of hunter gatherers to shed new light on both sports and morality Guided by anthropologists biologists neuroscientists and others Severson discusses what the moral life actually looked like for hunter gatherer bands in the late Pleistocene epoch and argues that the championing of group success that was the epitome of their morality is the epitome of modern sports as well With fascinating analogies and anecdotes from football basketball tennis cycling and more A Moral Theory of Sports offers a unique interpretation of human nature and our love affair with sports

Representations of Masculinity in Literature and Film Sara Martín,2020-09-11 How are men represented on the printed page the stage and the screen What do these representations say about masculinity in the past the present and the future The twelve essays in this volume explore the different ways in which men and masculinity have been represented from the plays of William Shakespeare to the science fiction of Richard K Morgan passing through classic fiction by Emily Bront and Charles Dickens and popular favourites by Terry Pratchett and Isaac Asimov without forgetting the Star Wars saga Collectively these essays argue that although much has been written about men it has been done from a perspective that does not see masculinity as a specific feature in need of critical appraisal Men need to be made aware of how they are represented in order to alter the toxic patriarchal models handed down to them and even break the extant binary gender models For that it is important that men distinguish patriarchy from masculinity as is done here and form anti patriarchal alliances with each other and with women This book is then an invitation to men s liberation from patriarchy by raising an

awareness of its crippling constraints The Myths We Live By Mary Midgley,2011-04 Mary Midgley argues in this powerful book that far from being the opposite of science myth is a central part of it *Words Made Flesh* Elaine Graham,2013-01-25 Words Made Flesh draws together a number of Elaine Graham s shorter writings and essays and thereby maps out the work of a pioneer theological thinker and the development of pastoral and practical theology in the last twenty years Elaine Graham considers the theological significance of topics as diverse as nativity plays science fiction gender consumerism cyberspace and urban regeneration They all share a concern with the way the sources and norms of the Christian tradition can enter into a creative and critical conversation with contemporary experience in order to generate the practical wisdom by which the life of the Church can be directed They reflect Elaine Graham s fundamental conviction that theology as talk about God in the world is always practical and public and that it begins and ends in the complexities of the human condition where words become flesh **Playing for Time** Geraldine Cousin,2013-03-31 Playing for time explores connections between theatre time the historical moment and fictional time Geraldine Cousin persuasively argues that a crucial characteristic of contemporary British theatre is its preoccupation with instability and danger and traces images of catastrophe and loss in a wide range of recent plays and productions The diversity of the texts that are examined is a major strength of the book In addition to plays by contemporary dramatists Cousin analyses staged adaptations of novels and productions of plays by Euripides Strindberg and Priestley A key focus is Stephen Daldry s award winning revival of Priestley s *An Inspector Calls* which is discussed in relation both to other Priestley time plays and to Caryl Churchill s apocalyptic *Far Away* Lost children are a recurring motif Bryony Lavery s *Frozen* for example is explored in the context of the Soham murders which took place while the play was in production at the National Theatre whilst three virtually simultaneous productions of Euripides *Hecuba* are interpreted with regard to the Beslan massacre of schoolchildren *Contours of Ableism* F. Campbell,2009-09-16 Challenging notions of what constitutes normal and pathological bodies this ambitious agenda setting study theoretically reinvigorates disability studies by reconceptualising it as studies of ableism focusing on the practices and formations of able bodiedness to uncover what it means to be able rather than disabled
