Rediscovery Of Inner Experience:

The Rediscovery of Inner Experience Lucy Bregman, 1982 *Pitirim A. Sorokin: Rediscovering a Master of Sociology* Emiliana Mangone, 2023-09-12 Pitirim A Sorokin is a controversial figure in the history of sociology of which he remains one of the masters Those who read Sorokin today must however frame the historical reality experienced by the scholar his Russian and American experiences because the evolution of his thought had several phases that correspond to his personal family and professional lives he founded and directed the Department of Sociology at Harvard University for many years This Russian American sociologist argued that socio cultural phenomena must be studied following their dynamism in space and time since the constituent elements personality society and culture are constantly changing and cannot be studied separately Reviving his thought is not a form of celebration but a moment to reflect on how some sociology classics still have their relevance and how all too often they are forgotten This is why this book takes up his main conceptualizations by anchoring them to contemporary society whose transformations are often difficult to read and above all to highlight how the role of sociology as a science has in part lost sight of its ontological foundation as a service to humanity or public service The theoretical paths taken by Sorokin range from Social and Cultural Dynamics to Social Mobility and to many other topics such as man and society in calamities or love and altruism one of Sorokin's latest topics All these topics can revive the idea of a sociology that holds together the micro meso and macro dimensions and allows us to predict changes in society

respect for the history of science Shipley shows the profound limits of linear mechanistic and naively reductionistic accounts of the mind and proposes instead a sensory rationalist position which builds on the principles of emergent evolution Combining several diverse perspectives from the physiological optics of Helmholtz the perceptual science of Kohler the visual electrophysiology of Hubel Wiesel to the theories of Dewey Polanyi Cassirer Chomsky and Piaget Intersensory Origin of Mind is an ambitious synthesis of sensory science It will need to be read by anyone with an interest in philosophical psychology the nature of human consciousness and the origin of mind Rediscovered Catherine Asta,2025-02-21 Misunderstood your whole life ashamed lost lonely and struggling to cope Exhausted from trying but never quite managing to fit in Welcome to the Late Discovered Club home to thousands of late discovered autistic women Late discovery can be life changing a lifetime of mysteries finally making sense But there can also be a deep accompanying sense of grief This is a book about coming home to yourself Catherine s empathetic guidance will help you advocate for yourself with a greater degree of self awareness With chapters on everything from masking mental health meltdowns and menopause to burnout sensory processing emotions relationships and work this will help you to nurture your strengths as an autistic woman You are not alone **Rediscover Your Heart** Fred Matser,Mikhail Gorbachev,2010-09 Born into modest circumstances in the Netherlands Fred Matser went on to make millions heading one of the largest real estate development companies in Europe Following an extraordinary transcendental experience Matser set himself on a journey of personal discovery His global travels opened his heart and mind to the needs of humanity and he has since spent his life founding charities and supporting existing organizations dedicated to improving the fields of health awareness social change and the environment Weaving humorous anecdotes with heartrending tales of personal transformation and hope this is an inspirational tale of one man s efforts to right the world s wrongs Ecopsychology, Phenomenology, and the Environment Douglas A. Vakoch,Fernando Castrillón,2014-02-17 This book seeks to confront an apparent contradiction that while we are constantly attending to environmental issues we seem to be woefully out of touch with nature The goal of Ecopsychology Phenomenology and the Environment is to foster an enhanced awareness of nature that can lead us to new ways of relating to the environment ultimately yielding more sustainable patterns of living This volume is different from other books in the rapidly growing field of ecopsychology in its emphasis on phenomenological approaches building on the work of phenomenological psychologists such as Maurice Merleau Ponty This focus on phenomenological methodologies for articulating our direct experience of nature serves as a critical complement to the usual methodologies of environmental and conservation psychologists who have emphasized quantitative research Moreover Ecopsychology Phenomenology and the Environment is distinctive insofar as chapters by phenomenologically sophisticated ecopsychologists are complemented by chapters written by phenomenological researchers of environmental issues with backgrounds in philosophy and geology providing a breadth and depth of perspective not found in other works written exclusively by psychologists
