Reekies Architectural Drawing:

Reekie's Architectural Drawing Fraser Reekie, Tony McCarthy, 1995-07-17 Reekie's Architectural Drawing is the new title chosen for the latest revision of the author's classic text *Draughtmanship Architectural and Building Graphics*. The book remains faithful to its original aim of introducing beginners to a wide range of traditional techniques. Text and illustrations have been updated throughout and a new section on the application of computer graphics is included. Widely used and respected for many years, this is a handy compendium of techniques for students in construction related courses in further or higher education. *Reekie's Architectural Drawing* Fraser Reekie, 1999-01-01 **Reekie's Architectural Drawing** Fraser Reekie, Tony McCarthy, 2016-05-11 Reekie's Architectural Drawing is the new title chosen for the latest revision of the author's classic text *Draughtmanship Architectural and Building Graphics*. The book remains faithful to its original aim of introducing beginners to a wide range of traditional techniques. Text and illustrations have been updated throughout and a new section on the application of computer graphics is included. Widely used and respected for many years, this is a handy compendium of techniques for students in construction related courses in further or higher education. *Reekie's Architectural Drawing* Elsevier Science & Technology Books, 1995-06-01 *Basics Architecture 01: Representational Techniques* Lorraine Farrelly, 2008-01-08 *Basics Architecture 01: Representational Techniques* by Lorraine Farrelly explores the concepts and techniques used to represent architecture. It describes a broad array of methodologies for developing architectural ideas ranging from two and three dimensional conceptual sketches through to the working drawings required for the construction of buildings and offers a range of practical drawing methods showing how to present and plan layouts, make conceptual sketches, work with scale, use collage and photomontage to create contemporary images, along with techniques to prepare and plan design portfolios. The book also deals with a variety of media from those used in freehand sketching through to cutting edge computer modeling and drawing techniques. Using examples from leading international architects and designers along with more experimental student work, a broad range of interpretations, possibilities and applications are demonstrated. Students and practitioners will find this a useful and clear companion to a vital aspect of architectural design. *Artists' Impressions in Architectural Design* Bob Giddings, Margaret Horne, 2003-09-02 This book analyses the ways in which architects have presented their designs for clients and the public both historically and contemporarily. **Cut and Paste Urban Landscape** Mira Engler, 2015-08-11 During the post-war era, the emerging consumer economy radically changed both the discourse and practice of architecture. It was a time where architecture became a mainstream commodity whose products sold through mass media, a time in which Thomas Gordon Cullen came to be one of Britain's best-known twentieth-century architectural draftsmen. Despite Cullen's wide acclaim, there has been little research into his life and work, particularly his printed images and his methods of operation. This book examines Cullen's drawings and book design and also looks into his process of image-making to help explain his considerable popularity and

influence which continues to this day It presents the lessons Cullen had to offer in today s design culture and practice and looks into the post war consumerist design strategies that are still used today **Draughtsmanship** Ronald Fraser Reekie,1957 **Architectural Drawing** David Dernie,2010-10-04 This book focuses on the exciting possibilities for representing the built environment with all the techniques both ancient and modern that are now available It teaches students the following skills how to draw using a range of media the basic rules of making effective spatial images how to read a drawing and how to express ideas through appropriate media and forms of communication Following a brief introduction the book is divided into three sections Media Types and Places Each section is illustrated with exemplary drawings and accompanying commentaries Step by step sequences and practical tips will further help students to make the most of their newly acquired skills This book is an indispensable practical and inspirational resource in architectural schools and practices alike *Managing the Building Design Process* Gavin Tunstall,2006 This volume explains the designer s role in the creation of new buildings from the development of the plan through to completion It expands on the first edition including sections on CAD and sustainability incorporating updates to legislation and adding new illustrations and discussion points **Measurement and Recording of Historic Buildings** Peter Swallow,Ross Dallas,Sophie Jackson,David Watt,2016-04-01 Now in its second edition this book provides a practical guide to measured building surveys with special emphasis on recording the fabric of historic buildings It includes two new chapters dealing with modern survey practice using instruments and photographic techniques as well as a chapter examining recording methods as used on a specific project case study undertaken by the Museum of London Archaeology Service Measured surveys for producing accurate scaled drawings of buildings and their immediate surroundings may be undertaken for a variety of reasons The principal ones are to provide a historic record and to form the base drawings upon which a proposed programme of works involving repairs alterations adaptations or extensions can be prepared This book provides a practical guide to preparing measured surveys of historic buildings with special emphasis on recording the fabric The text assumes little previous knowledge of surveying and begins by describing basic measuring techniques before introducing elementary surveying and levelling From these principles the practices and techniques used to measure and record existing buildings are developed in a detailed step by step approach covering sketching measuring plotting and drawing presentation For this new edition the text on hand survey methods has been revised to note where new techniques and equipment can be incorporated as well as explaining where more advanced survey methods may be best used to advantage Information on locating early maps and plans aerial photography and its uses documentary research procurement of surveys and conventional photography has been incorporated at various points as appropriate In addition Ross Dallas provides two new chapters dealing with modern survey practice using instruments and photographic techniques Also the opportunity has been taken to present a wider view of building recording projects by including a new chapter from the Museum of London Archaeological Service MoLAS building
