✓ Exclusively available on IvyPanda

Several approaches to studying religion will be discussed: exclusivism, inclusivism, pluralism, and empathetic interest in other people. Exclusivism is the belief that only one religion is true and all the others are false (Wood, 2021). Exclusivism aims to exclude foreign and alien elements that invade it from its religion to preserve certain principles of its faith in purity. Inclusivism is the reverse of exclusivism, which is the ability of one religious tradition to include and adapt foreign myths, cults, and even deities of other religions (Wood, 2021). Pluralism is a state of the religious situation in society in which there is a coexistence of many religious associations of different faiths, independent of each other, separated from the state, and equal before the law. Empathy implies understanding and emotional insight into the shape of another person (Wood, 2021). Empathic interest in other people in religion includes a tolerant attitude towards other faiths.

In everyday life, I use the approach of empathic interest because I believe that there is no main religion in the world and that everyone has the right to believe in what they want. Each religion is good in its way, so it is necessary to treat different faiths with respect and tolerance. Every religion has its unique history that needs to be preserved and multiplied, so I treat any religion from the point of view of empathy.

I have a friend who uses an exclusivist approach when it comes to religion. Given our different methods, I would treat his point of view with understanding and patience since he has the right to such an approach. I believe that the academic study of religion should not require me to adjust my approach if I attend college classes on religious traditions. I can study various methods for the academic study of religion and find something interesting for myself in each of them. Still, I should not change my beliefs because of this.

Reflections And Conversations Essays In The Academic Study Of Religion:

The Craft of Religious Studies NA NA,2016-04-30 Unlike other humanistic disciplines the academic study of religion must contend with a phenomenon that touches every dimension of human experience For scholars so engaged the study of religion often becomes a cross cultural as well as a necessarily interdisciplinary endeavor In this collection of original essays Jon R Stone has brought together the intellectual autobiographies of fourteen senior scholars all with national or international reputations in their respective fields each of whom reflects upon his or her own theoretical assumptions and methodological approaches to the study of religion Taken together these essays represent the variety of research methods and interpretive rigor mature scholars bring to the task of examining religious phenomena religious actions religious movements and religious ideas

Religious Studies and Rabbis Elizabeth Alexander,Beth Berkowitz,2017-09-08 Religious Studies and Rabbis have overlapping yet distinct interests subject matter and methods Religious Studies is committed to the study of religion writ large It develops theories and methods intended to apply across religious traditions Rabbis by contrast is dedicated to a defined set of texts produced by the rabbinic movement of late antiquity Religious Studies and Rabbis represents the first sustained effort to create a conversation between these two academic fields In one trajectory of argument the book shows what is gained when each field sees how the other engages the same questions When did the concept of religion arise How should a scholar's normative commitments interact with their scholarship The book argues that if scholars from Religious Studies and Rabbis do not realize they are addressing the same problems they will not benefit from each other's solutions A second line of argument brings research

methods theoretical claims and data associated with one field into contact with those of the other When Religious Studies categories such as ritual or the sacred are applied to data from Rabbinics and conversely when text reading strategies distinctive to Rabbinics are employed for texts from other traditions both Religious Studies and Rabbinics enlarge their scope The chapters range across such themes as ritual failure rabbinic conceptions of scripture ethics food time and everyday life problems of definition and normativity in the study of religion J Z Smith s writings and the preaching of the African American Christian evangelical social justice activist John Perkins With chapters written by world class theorists of Religious Studies and prominent text scholars of Rabbinics the book provides a unique opportunity to expand the conceptual reach and scholarly audience of both Religious Studies and Jewish Studies The Routledge Companion to the Study of Religion John R.
