

REFLECTIVE TEACHING

DEFINITION

Reflective teaching is a process where teachers reflect on their own teaching practices and learn from their own experiences.

EXAMPLES

Examples of reflective teaching include:

- Observing other teachers and comparing their practice to your own.
- Taking notes on your own teaching practice and thinking about ways to improve.
- Asking for feedback from your students to achieve self-improvement.

Pamela J. Farris, Patricia L. Rieman

Reflective Thoughts Two:

Reflective Thoughts Two Regina B. Lovejoy, 1990-12 Thinking Skills and Creativity in Second Language Education Li Li, 2019-06-26 Across the world education is being restructured to include greater focus on developing critical and creative skills. In second language education research suggests that cognition and language development are closely related. Yet despite increasing interest in the teaching of thinking skills, critical thinking has not been widely integrated into language teaching. *Thinking Skills and Creativity in Second Language Education* presents a range of investigations exploring the relationship between thinking skills and creativity and second language education. Focusing on cognitive, affective, social, and emotional perspectives, this book highlights current research and raises questions that will set the direction for future research. Its aims are as follows: Provide an in-depth understanding of the link between second language development and thinking skills; Consider approaches to developing thinking skills in second language instruction; Examine practices in implementing thinking skills in second language learning; Offer an updated list of sources of information on thinking skills in second language education. A new addition to the Research on Teaching Thinking and Creativity series, this book is relevant to researchers in the field of educational psychology, to Masters degree and PhD students in this field, and to anyone interested in developing thinking skills.

Teaching, Bearing the Torch Pamela J. Farris, Patricia L. Rieman, 2013-12-12 Teachers are torchbearers, leaders who impart knowledge, truth, or inspiration to others. Pamela Farris joined by Patricia Rieman in the latest edition of this exceptional foundations text clearly demonstrates how teachers bear the torch. The authors' well-researched approach provides both positive and negative aspects of education trends. Their generous use of examples shows how teaching and schooling fit into the broader context of U.S. society and how they match up with other societies throughout the world. Farris and Rieman's lively writing style instills teacher education candidates with a lucid understanding of such topics as philosophy and history of education, national trends, requirements of becoming a teacher, teachers' salaries, how schools are governed and funded, demographic changes and expectations for the future, differences in rural and urban schools, and use of technology. Detailed lists of a variety of websites provide additional resources. Anecdotes of professionals in the field, authentic voice narratives with frank insights into real-world teaching experiences punctuate the text. Boxed scenarios concentrate on important issues and educators energize readers' interest and stimulate proactive thinking. Other outstanding features are the book's affordability and versatility. Instructors can easily assign all or a portion of the chapters to fit course needs.
