Evaluating, Improving, and Judging Faculty Performance in Two-Year Colleges Charles Finley, Richard I. Miller, Candace S. Vancko, 2000-03-30 With nearly 48 percent of all U S undergraduates attending community and technical colleges the two year sector is an integral part of our nation s higher education system and a vital part of our nation s future The need for effective faculty evaluation and professional development within two year colleges stems partly from the size of this sector and also from the diversity of its program offerings and its student body Miller and his co authors bring timely authoritative and practical material to two audiences in this rapidly growing field of education first teachers who have permanent appointments but could use professional development and improvement and second the already large and still growing number of part time instructors who could use more evaluating and improving This book is intended to be a direct assistance for these groups as well as to administrators who must make personal decisions This professional book is for human resource managers and staff development officers of two year colleges A greater emphasis needs to be placed on human resource management according to Miller and his co authors that will result in better personnel decision making

Faculty Misconduct in Collegiate Teaching John M. Braxton, Alan E. Bayer, 2003-04-30 In *Faculty Misconduct in Collegiate Teaching* higher education researchers John Braxton and Alan Bayer address issues of impropriety and misconduct in the

teaching role at the postsecondary level Braxton and Bayer define and examine norms of teaching behavior what they are how they come to exist and how transgressions are detected and addressed Do faculty members across various collegiate settings for example share views about appropriate and inappropriate teaching behaviors as they share expectations regarding actions related to research And what mechanisms are utilized to correct inappropriate behavior on the part of college and university teachers The authors work is based on survey results obtained from faculty members at research universities liberal arts colleges and two year community junior and technical colleges Braxton and Bayer s focus is on undergraduate teaching in four disciplines biology history mathematics and psychology In their analyses the authors examine how individual disciplinary and institutional differences influence professorial behavior In contrast to the more explicitly understood and enforced rules of conduct in research the authors find that teaching norms are informally defined and observed They argue that a formal code of ethics for undergraduate teaching would serve the dual purpose of improving undergraduate education and elevating the status of college teaching A groundbreaking study of contemporary academe Faculty Misconduct in Collegiate Teaching is required reading for all university and college instructors and administrators

National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Recognizing, Evaluating, Rewarding, and Developing Excellence in Teaching of Undergraduate Science, Mathematics, Engineering, and Technology, 2003-01-19 Economic academic and social forces are causing undergraduate schools to start a fresh examination of teaching effectiveness Administrators face the complex task of developing equitable predictable ways to evaluate encourage and reward good teaching in science math engineering and technology Evaluating and Improving Undergraduate Teaching in Science Technology Engineering and Mathematics offers a vision for systematic evaluation of teaching practices and academic programs with recommendations to the various stakeholders in higher education about how to achieve change What is good undergraduate teaching This book discusses how to evaluate undergraduate teaching of science mathematics engineering and technology and what characterizes effective teaching in these fields Why has it been difficult for colleges and universities to address the question of teaching effectiveness The committee explores the implications of differences between the research and teaching cultures and how practices in rewarding researchers could be transferred to the teaching enterprise How should administrators approach the evaluation of individual faculty members And how should evaluation results be used The committee discusses methodologies offers practical guidelines and points out pitfalls Evaluating and Improving Undergraduate Teaching in Science Technology Engineering and Mathematics provides a blueprint for institutions ready to build effective evaluation programs for teaching in science fields **Developing Faculty Learning Communities at Two-Year Colleges** Susan Sipple, Robin Lightner, 2023-07-03 This book introduces community college faculty and faculty developers to the use of faculty learning communities FLCs as a means for faculty themselves to

investigate and surmount student learning problems they encounter in their classrooms and as an effective and low cost strategy for faculty developers working with few resources to stimulate innovative teaching that leads to student persistence and improved learning outcomes Two year college instructors face the unique challenge of teaching a mix of learners from the developmental to high achievers that requires using a variety of instructional strategies and techniques Even the most experienced teachers can find this diversity demanding Faculty developers at many two year colleges still rely solely on the one day workshop model that while useful rarely results in sustained student centered changes in pedagogy or the curriculum and may not be practicable for the growing cohort of part time faculty members By linking work in the classroom with scholarship and reflection FLCs provide participants with a sense of renewed engagement and stimulate collegial exploration of ways to achieve educational excellence FLCs are usually faculty instigated and cross disciplinary and comprise groups of six to fifteen faculty that work collaboratively through regular meetings over an extended period of time to promote research and an exchange of experiences foster community and develop the scholarship of teaching FLCs alleviate burnout and isolation promote the development testing and peer review of new classroom strategies or technologies and lead to the reenergizing and professionalization of teachers This book introduces the reader to FLCs and to the Scholarship of Teaching and Learning offering examples of application in two year colleges Individual chapters describe among others an FLC set up to support course redesign an Adjunct Connectivity FLC to integrate part time faculty within a department and collaborate on the curriculum a cross disciplinary FLC to promote student self regulated learning and improve academic performance and persistence a critical thinking FLC that sought to define critical thinking in separate disciplines examine interdisciplinary cross over of critical thinking and measure critical thinking more accurately an FLC that researched the transfer of learning and developed strategies to promote students application of their learning across courses and beyond the classroom Each chapter describes the formation of its FLC the processes it engaged in what worked and did not and the outcomes achieved Just as when college faculty fail to remain current in their fields the failure to engage in continuing development of teaching skills will equally lead teaching and learning to suffer When two year college administrators restrain scholarship and reflection as inappropriate for the real work of the institution they are in fact hindering the professionalization of their teaching force that is essential to institutional mission and student success When FLCs are supported by leaders and administrators and faculty learn that collaboration and peer review are valued and even expected as part of being a teaching professional they become intrinsically motivated and committed to collaboratively solving problems setting the institution on a path to becoming a learning organization that is proactive and adept at navigating change
