not an appropriate sole treatment for cancer contagious skin diseases or sexually transmitted diseases but in conjunction with proper medical attention however gentle acupressure can help soothe and relieve a patient's distress and diseases. Acupressure's effects can be subtle and while you may often experience immediate relief from stress and pain sometimes it may take you a few weeks to notice a big change in your overall condition. Acupressure is an ancient healing art that uses the fingers to press key points on the surface of the skin to stimulate the body's natural self-curative abilities. When these points are pressed they release muscular tension and promote the circulation of blood and the body's life force to aid healing. Acupressure uses the gentle but firm pressure of hands and even feet. Acupressure is the most effective method for self-treatment of tension-related ailments by using the power and sensitivity of the human hand.

The Ascent of Humanity Charles Eisenstein, 2013-02-05. The author of *The More Beautiful World Our Hearts Know Is Possible* explores the history and potential future of civilization, tracing the converging crises of our age to the illusion of the separate self. Our disconnection from one another and the natural world has mislaid the foundations of science, religion,

money technology economics medicine and education as we know them It has fired our near pathological pursuit of technological Utopias even as we push ourselves and our planet to the brink of collapse Fortunately an Age of Reunion is emerging out of the birth pangs of an earth in crisis Our journey of separation hasn t been a terrible mistake but an evolutionary process and an adventure in self discovery Even in our darkest hour Eisenstein sees the possibility of a more beautiful world not through the extension of millennia old methods of management and control but by fundamentally reimagining ourselves and our systems We must shift away from our Babelian efforts to build ever higher towers to heaven and instead turn out attention to creating a new kind of civilization one designed for beauty rather than height
