*Massage and Aromatherapy* Andrew Vickers, Caroline Stevensen, Steve Van Toller, 2013-11-11 This book aims to give

health professionals a balanced and independent overview of massage and aromatherapy I have written it because despite growing interest there is a dearth of professional literature on this subject This book aims to cover a number of topics which are under represented in existing publications These include scientific research in massage and aromatherapy the use of the therapies in medical settings the knowledge base of massage and aromatherapy professional and managerial issues safety Understanding of these subjects is essential for any reasoned evaluation of massage and aromatherapy Yet this book is probably the first to provide information suitable for this task At the current time of writing almost all books on massage and aromatherapy have been written with the lay public in mind The texts recommended to students and practitioners by the foremost schools and institutions are exactly the same as those available in health food shops as general introductions for prospective patients Not surprisingly such books generally fail to include in depth discussions of professional issues *Total Reflexology* Martine Faure-Alderson, 2008-11-26 The first complete book of reflexology to incorporate acupuncture naturopathy homeopathy and the chakra system Remaps the entire foot to fine tune the pressure points Explains how to work with the emotional reactions that may be released when physical conditions are treated Full color detailed diagrams provide precise illustrations of pressure points In this groundbreaking work Dr Martine Faure Alderson takes reflexology to a new level by integrating acupuncture naturopathy homeopathy and other holistic healing modalities into the practice From her background as a physician she brings a scientific precision to using the foot as a map of the body and all of its systems She then uses her training in alternative therapies to integrate the mental and psychological issues that may accompany physical conditions providing the first complete holistic approach to using reflexology for physical emotional and mental health *Total Reflexology* presents each of the major body systems in turn from the digestive system to the human energetic system using 25 full color newly mapped foot diagrams that provide precise indications of pressure points and their correspondences to all areas of the body The author also includes her latest work using craniosacral therapy and the role of the cerebrospinal fluid in reflexology as well as how to integrate use of the chakra system She shows how finely tuned reflexology stimulates the body's self healing abilities making this an indispensable resource for the layman and professional alike **Total**

**Reflexology of the Hand** Martine Faure-Alderson, 2016-05-17 How to apply the precise treatment techniques of *Total Reflexology* which combines craniosacral therapy and foot reflexology to the hands Explains the special relationship between the hand and the brain making hand reflexology ideal for treatment of neurological mental and emotional disorders Details how to use the occipital zones of craniosacral therapy to pinpoint which zones and points on the hands to treat Includes full color detailed maps of the pressure points and zones of the hands One of the most defining physical characteristics of humanity the hands contain reflex zones and pressure points related to the systems and organs of the body just like the feet The reflex zones and points of the hands present the most effective means of treating psychological and neurological disorders due to their sophisticated relationship with the brain Applying her ground breaking combination of reflexology and

craniosacral therapy to the hands Dr Martine Faure Alderson explains how to use hand reflexology to treat the brain and each of the body's systems from the digestive system to the human energetic system She provides precise full color mapped hand diagrams illustrating the exact placement of the points according to the bones of the hands the result of more than 40 years of research and clinical practice She explains how to use the occipital zones of craniosacral therapy to pinpoint which zones and points on the hands to treat Examining the psychological level of brain hand interactions the author reveals how neurological dysfunctions and mental disorders respond more readily to hand reflexology than to other forms of therapies She explains how many physical ailments have a psychological component and how reflexology automatically triggers the release of endorphins by working directly on the autonomic nervous system The author explores the role of nutritional supplements including Omega 3s as a support to reflexology therapy and shows how finely tuned reflexology stimulates the body's self healing abilities and cellular regeneration making this an indispensable resource for holistic health practitioners and for home self care
