Make a Quantum Leap in Your Consciousness on the Road To Ascension Dr. Richard A. Huntoon, 2011-11-10

Why have you chosen this book Was the title intriguing to you Have you like many of us been searching for answers Have you been given a difficult set of circumstances that are currently causing you to re evaluate your life Are you looking for causes that might explain your difficulties Is it simply time for you to evolve consciously Perhaps you are discovering your true life purpose and wish to make a contribution to humanity Whatever your reason I am glad you have chosen to read this book Let's be clear your life is 100 % about you period That is a bold statement and perhaps it sounds like a selfish one to you Of course there are others involved in your life The things we do and do not do will certainly have an effect on others just as what they do or do not do will have an effect on each of us And still your life is 100 % about you If you are tired of repeating the same life patterns over and over again this book will help you unlock your unconscious mind and allow you to move forward in your life consciously

Creating Consilience Edward Slingerland, Mark Collard, 2012-01-19

Calls for a consilient or vertically integrated approach to the study of human mind and culture have for the most part been received by scholars in the humanities with either indifference or hostility One reason for this is that consilience has often been framed as bringing the study of humanistic issues into line with the study of non human phenomena rather than as something to which humanists and scientists contribute equally The other major reason that consilience has yet to catch on in the humanities is a dearth of compelling examples of the benefits of adopting a consilient approach Creating Consilience is the product of a workshop that brought together internationally renowned scholars from a variety of fields to address both of these issues It

includes representative pieces from workshop speakers and participants that examine how adopting such a consilient stance informed by cognitive science and grounded in evolutionary theory would concretely impact specific topics in the humanities examining each topic in a manner that not only cuts across the humanities natural science divide but also across individual humanistic disciplines By taking seriously the fact that science humanities integration is a two way exchange this volume takes a new approach to bridging the cultures of science and the humanities The editors and contributors formulate how to develop a new shared framework of consilience beyond mere interdisciplinarity in a way that both sides can accept

How can the left be credible when it can't decide what a woman is How can antiracists fight for equality if they promote fictions about race If identity politics is the answer why are so many Western left organizations being damaged by it As the culture wars rage this compelling book examines why much of the Western political left has foundered because of identity politics Identity issues have mired many good organizations in intractable conflicts and deflected them from their purpose In ignoring poverty and inequality the Western left has lost its way Meanwhile powerful social movements from the past black women's gay and lesbian are reduced to corporate slogans Attuned to the needs of activists and academics this book offers intelligent explanations for how we got here It examines serious problems with antiracism transgender rights activism and the work of LGBTQ groups In showing how identities are outcomes of social and institutional forces it argues that technofinancial capitalism uses identity politics to mould new labour processes for the Western middle class while accelerating economic inequality Clearing a path through the vagaries of identity politics the book offers arguments the Western left must face amidst formidable far right and right wing authoritarianism climate emergency and severe inequalities
