Setting The Record Straight Responses To Misconceptions About Public Education In The United States:

Setting the Record Straight Gerald Watkins Bracey, 1997 Responds to eighteen common criticisms of public schools and discusses why some of the most common accusations about public schools are wrong *Setting the Record Straight* Gerald Watkins Bracey, 2004 The author goes toe to toe with the opponents of quality public education [Why America's Public Schools Are the Best Place for Kids](#) Dave F. Brown, 2012 Despite measured success of American public schools the media politicians and big business attack public schools and their teachers with inaccuracies that threaten the equal opportunities provided by public education Research indicates that No Child Left Behind charter schools and vouchers do not improve students learning or help educators teach better The book provide reasons to support American public schools and educators Provided by publisher [The SAGE Guide to Educational Leadership and Management](#) Fenwick W. English, 2015-01-29 The SAGE Guide to Educational Leadership and Management allows readers to gain knowledge of educational management in practice while providing insights into challenges facing educational leaders and the strategies skills and techniques needed to enhance administrative performance This guide emphasizes the important skills that effective leaders must develop and refine including communication developing teams coaching and motivating and managing time and priorities While being brief simply written and a highly practical overview for individuals who are new to this field this reference guide will combine practice and research indicate current issues and directions and choices that need to be made Features Benefits 30 brief signed chapters are organized in 10 thematic parts in one volume available in a choice of electronic or print formats designed to enable quick access to basic information Selective boxes enrich and support the narrative chapters with case examples of effective leadership in action Chapters conclude with bibliographic endnotes and references to further readings to guide students to more in depth presentations in other published sources Back matter includes an annotated listing of organizations associations and journals focused on educational leadership and administration and a detailed index This reference guide will serve as a vital source of knowledge to any students pursuing an education degree as well as for individuals interested in the subject matter that do not have a strong foundation of the topic *Knowledge and Power in the Global Economy* David Gabbard, 2017-07-05 Advancing a three fold political agenda this volume illuminates how the meanings assigned to a whole vocabulary of words and phrases frequently used to discuss the role and reform of U S public schools reflect an essentially economic view of the world contends that education or educational reform conducted under an economized worldview will only intensify the effects of the colonial relations of political and economic domination that it breeds at home and abroad and offers a set of alternative concepts and meanings for reformulating the role of U S public schools and for considering the implications of such a reformulation more generally for the underlying premises of all human relationships and activities Toward these ends the authors in Part I critically examine many of the most commonly used terms within the rhetoric of educational reform since the early 1980s and before Part II links today s economized worldview to

curricular and instructional issues These essays are especially important for comprehending how the organization of school curriculum privileges those disciplines deemed most central to market expansion math and science and how the political centrality of the economic sphere influences the nature of the knowledge presented in specific content areas Given that language constrains as well as advances human thought the twin tasks of de economizing education and decolonizing society will require a vocabulary that transcends the familiar terminologies addressed in Parts I and II The entries in Part III cultivate the beginnings of such a vocabulary as the authors elucidate innovative concepts which they view as central to the creation of truly alternative educational visions and practices

Social Context Reform Paul Thomas,Brad J. Porfilio,Julie Gorlewski,Paul R. Carr,2014-06-20 Currently both the status quo of public education and the No Excuses Reform policies are identical The reform offers a popular and compelling narrative based on the meritocracy and rugged individualism myths that are supposed to define American idealism This volume will refute this ideology by proposing Social Context Reform a term coined by Paul Thomas which argues for educational change within a larger plan to reform social inequity such as access to health care food higher employment better wages and job security Since the accountability era in the early 1980s policy public discourse media coverage and scholarly works have focused primarily on reforming schools themselves Here the evidence that school only reform does not work is combined with a bold argument to expand the discourse and policy surrounding education reform to include how social school and classroom reform must work in unison to achieve goals of democracy equity and opportunity both in and through public education This volume will include a wide variety of essays from leading critical scholars addressing the complex elements of social context reform all of which address the need to re conceptualize accountability and to seek equity and opportunity in social and education reform

World Yearbook of Education 2011 Lyn Yates,Madeleine Grumet,2011-02-01 How do curriculum conceptions of knowledge and the schooling experiences of young people engage the great issues of this tumultuous time Curriculum is always influenced by the events that shape our world but when testing and bench marking preoccupy us we can forget the world that is both the foundation and the object of curriculum This edited volume brings together international contributors to analyze and reflect on the way the events of the last decade have influenced the curriculum in their countries As they address nationalism in the face of economic globalisation the international financial crisis immigration and the culture of diaspora they ask how national loyalties are balanced with international relationships and interests They ask how the rights of women and of ethnic and racial groups are represented They ask what has changed about history and civics post 9 11 and they ask how countries that have experienced profound political and economic changes have addressed them in curriculum These interactions and changes are a subject of particular interest for an international yearbook in that they are almost always permeated by global movements and influenced by multinational bodies and practices And as these essays show in curriculum global and international issues are explicitly or implicitly also about local and national interests and about how citizens engage their

rights and responsibilities This volume brings together a new approach to perspectives on curriculum today and a new collection of insights into the changes from different parts of the world which discuss How is the world represented in curriculum How do responses to world events shape the stories we tell students about who they are and can be This book will be of great benefit to educational researchers and policy makers as well as undergraduate and postgraduate students

Examining Comprehensive School Reform Daniel K. Aladjem, Kathryn M. Borman, 2006 Urban school reformers for decades have tried to improve educational outcomes for underserved and disadvantaged students with the assistance of constantly evolving federal and state policies In recent years education policies have shifted from targeting individual students to developing universal standards for teaching and learning and comprehensive school reform CSR has emerged as an effective key model The federal CSR program seeks to support the implementation of comprehensive school reform especially in high poverty schools and to improve efforts to help all children meet challenging academic standards Schools that receive federal CSR funds must adopt approaches that comply with the No Child Left Behind Act NCLB This book provides a series of studies and reflections on CSR by leading experts in the field

The Phenomenon of Obama and the Agenda for Education Brad J. Porfilio, Paul R. Carr, 2011-05-01 Who should read this book Anyone who is touched by public education teachers administrators teacher educators students parents politicians pundits and citizens ought to read this book It will speak to educators policymakers and citizens who are concerned about the future of education and its relation to a robust participatory democracy The perspectives offered by a wonderfully diverse collection of contributors provide a glimpse into the complex multilayered factors that shape and are shaped by institutions of schooling today The analyses presented in this text are critical of how globalization and neoliberalism exert increasing levels of control over the public institutions meant to support the common good Readers of this book will be well prepared to participate in the dialogue that will influence the future of public education in this nation a dialogue that must seek the kind of change that represents hope for all students As for the question contained in the title of the book Can hope audaciously trump neoliberalism Carr and Porfilio develop a framework that integrates the work of the contributors including Christine Sleeter and Dennis Carlson who wrote the forward and afterword respectively that problematizes how the Obama administration has presented an extremely constrained conservative notion of change in and through education The rhetoric has not been matched by meaningful tangible transformative proposals policies and programs aimed at transformative change There are many reasons for this and according to the contributors to this book it is clear that neoliberalism is a major obstacle to stimulating the hope that so many have been hoping for Addressing systemic inequities embedded within neoliberalism Carr and Porfilio argue is key to achieving the hope so brilliantly presented by Obama during the campaign that brought him to the presidency

News

Media and the Neoliberal Privatization of Education Zane C. Wubbena, Derek R. Ford, Brad J. Porfilio, 2016-03-01 This edited volume contributes to a burgeoning field of critical scholarship on the news media and education. This scholarship is based on an understanding that the news media has increasingly applied a neoliberal template that mediates knowledge and action about education. This book calls into question what the public knows about education, how the public is informed, and whose interests are represented and ultimately served through the production and distribution of information by the news media about education. The chapters comprising this volume serve to enlighten and call to action parents, students, educators, academics, and scholars, activists, and policymakers for social, political, and economic transformation. Moreover, as the neoliberal agenda in North America intensifies, the chapters in this book help to deepen our understanding of the logics and processes of the neoliberal privatization of education and the accompanying social discourses that facilitate the reduction of social relations to a transaction in the marketplace. The chapters examine the news media and the reproduction of neoliberal educational reforms: A Nation at Risk, Teach For America, charter schools, think tanks, and PISA, and resistance to neoliberal educational reforms, online activism, and radical Black press, while also broadening our conceptual understanding of the marketization and mediatization of educational discourses. Overall, the book provides an in-depth understanding of the neoliberal privatization of education by extending critical examinations to this underrepresented field of cultural production: the news media coverage of education. The contribution of this edited volume therefore helps to build an understanding of the contemporary dynamics of capital accumulation to inform public resistance for social transformation.

The State of Education Policy Research Susan H. Fuhrman, David K. Cohen, Fritz Mosher, 2020-11-25 The State of Education Policy Research is a comprehensive, insightful evaluation of the strengths and weaknesses of education policy research in the U.S. today. Editors Susan Fuhrman, David Cohen, and Fritz Mosher examine key issues facing policymakers and researchers, including race, education equity, teacher quality, early education, privatization, and the politics of education policy. Collectively, the chapters present a complex mosaic of education policy research that integrates the views of policy experts from education, economics, and related disciplines. Important topics discussed in this influential new text include: Politics of education; Covers research on key political groups including teachers unions, business roundtables, parent and/or religious advocates, as well as state and federal lawmakers; Race: Discusses race as an issue, as well as a non-issue, and includes a discussion of the testing gap; State policies: Provides an overview of state policies directed at improving teacher quality and discusses the reality of a teacher shortage; National Trends: Analyzes current trends toward centralization and standardization and the growing influence of federal and state mandates. This book is appropriate for advanced courses in education administration, politics, and policy. The Struggle for Public Education Donald Parkerson, Jo Ann Parkerson, 2017-11-09 The great pendulum of educational reform recently

has begun its inexorable swing toward a new understanding of education The thirty year dominance of the authoritarian approach complete with standardized assessments distended bureaucracies and school consolidation based on the business model appears to be over Capped by the recent departure of the No Child Left behind Act and replaced with a new congressional authorization the Every Child Achieves Act we are witnessing a distinct move toward a more democratic model of education This book places the tension between these two broadly defined archetypes in the context of the central themes of American education These include the structure and organization of American schools the struggle for diversity curriculum and instruction classroom discipline moral education testing and assessment and the rights and responsibilities of teachers and students By organizing these themes into a more understandable and relevant thematic context readers will be able to appreciate the changes in the field of education over the years as well as the cacophonous bickering over education policy today and yesterday

Jones, William F. Wright, 2017-09-25 Many new approaches to school improvement are being proposed in the current climate of assessment and school accountability This book explores one of these approaches a new model of leadership training known as Learner Centered Leadership LCL It is built around the fundamental idea that learning and learning communities are natural processes that when properly harnessed can lead to the highest levels of professional engagement and problem solving Key features of this exciting new approach to school leadership include the following Broad based and Generative The book s narratives vividly illustrate the extraordinary ability of LCL to generate new approaches to leadership development For example encouraging and assisting school leaders to reflect on their own leadership attributes relative to the implementation of the school mission to ensure high teacher efficacy and student learning In this respect the volume contributes significantly to the field of school leadership and professional development by extending above and beyond a narrow focus on instructional leadership Practice Oriented By creating communities that encourage conversation and analysis the new data driven models of school improvement are more likely to be successfully implemented Without analytical discourse the process of interpreting school data and transforming it into practice would be largely lost Conceptually Appropriate The realization that everyone within a school students teachers administrators belongs to the same learning community minimizes status differences and encourages teamwork The LCL administrator is much less likely to be authoritarian and power oriented and much more likely to be transformative and student outcome focused This book is appropriate for master s level courses and certification seminars and for inservice workshops dealing with school leadership
