Seven Types of Ambiguity Elliot Perlman, 2004-12-16 Seven Types of Ambiguity is a psychological thriller and a literary adventure of breathtaking scope Celebrated as a novelist in the tradition of Jonathan Franzen and Philip Roth Elliot Perlman writes of impulse and paralysis empty marriages lovers gambling and the stock market of adult children and their parents of poetry and prostitution psychiatry and the law Comic poetic and full of satiric insight Seven Types of Ambiguity is above all a deeply romantic novel that speaks with unforgettable force about the redemptive power of love The story is told in seven parts by six different narrators whose lives are entangled in unexpected ways Following years of unrequited love an out of work schoolteacher decides to take matters into his own hands triggering a chain of events that neither he nor his psychiatrist could have anticipated Brimming with emotional intellectual and moral dilemmas this novel reminiscent of the richest fiction of the nineteenth century in its labyrinthine complexity unfolds at a rapid fire pace to reveal the full extent to which these people have been affected by one another and by the insecure and uncertain times in which they live Our times now

Third edition. (Revised, reprinted.).* William Empson, 1963 Radical Empiricists Helen Thaventhiran, 2015-08-13 Radical Empiricists presents a new history of criticism in the first half of the twentieth century against the backdrop of the modernist crisis of meaning Our received idea of modernist criticism is that its novelty lay in being very empirical critics believed in looking closely at words on the page Such close reading has since been easy to ridicule but my book seeks to consider whether this is fair have we in the rush either to dismiss or even to defend the idea of close reading often failed to look closely at what it involves in practice Against this oversight Radical Empiricists turns close reading back on itself proposing some innovative readings of the prose of five major modernist poet critics I A Richards T S Eliot William Empson R P Blackmur and Marianne Moore The book is divided into two parts preceded by an introduction that explores what these five writers share a radical self consciousness about the key critical concept meaning Part I How to read considers the prose techniques of Eliot Richards and Empson as they push at the boundaries of verbal analysis in other

disciplines experimental psychology and anthropology classical commentary and textual criticism Part II introduces Blackmur and Moore alongside Empson and takes a more polemical look at how their critical styles defy various modernist orthodoxies about how not to read for example that paraphrase always destroys poetic meaning Many of these orthodoxies remain current re visiting their history and attending to the rich detail of critical prose styles can allow us to lift some old unreflective constraints on our ways of knowing about poems

Uncertainty C. Namwali Serpell,2014-04-30 Literature is uncertain Literature is good for us These two ideas are often taken for granted But what is the relationship between literature s capacity to perplex and its ethical value Seven Modes of Uncertainty contends that literary uncertainty is crucial to ethics because it pushes us beyond the limits of our experience

Time Matters Andrew Abbott,2001-07-15 What do variables really tell us When exactly do inventions occur Why do we always miss turning points as they transpire When does what doesn t happen mean as much if not more than what does Andrew Abbott considers these fascinating questions in Time Matters a diverse series of essays that constitutes the most extensive analysis of temporality in social science today Ranging from abstract theoretical reflection to pointed methodological critique Abbott demonstrates the inevitably theoretical character of any methodology Time Matters focuses particularly on questions of time events and causality Abbott grounds each essay in straightforward examinations of actual social scientific analyses Throughout he demonstrates the crucial assumptions we make about causes and events about actors and interaction and about time and meaning every time we employ methods of social analysis whether in academic disciplines market research public opinion polling or even evaluation research Turning current assumptions on their heads Abbott not only outlines the theoretical orthodoxies of empirical social science he sketches new alternatives laying down foundations for a new body of social theory Seven Types of Ambiguity William Empson,1949 *Philosophy and*

Literature in Times of Crisis Michael Mack,2014-02-27 Highlighting literature and philosophy s potential impact on economics health care bioethics public policy and theology this book analyses the heuristic value of fiction It alerts us to how we risk succumbing to the deceptions of fiction in our everyday lives because fictional representations constantly feign to be of the real and claim a reality of their own Philosophy and literature disclose how the substantive sphere of social economic and medical practice is sometimes driven and shaped by the affect ridden and subjective Analysing a wide range of literature from Augustine Shakespeare Spinoza and Deleuze to Kafka Sylvia Plath Philip Roth W G Sebald and Jonathan Littell Michael Mack rethinks ethical attitudes towards the long or eternal life In so doing he shows how philosophy and literature turn

representation against itself to expose the hollowness of theologically grand concepts that govern our secular approach towards ethics economics and medicine Philosophy and literature help us resist our current infatuation with numbers and the numerical and contribute towards a future politics that is at once singular and diverse

The Birth of New Criticism Donald J. Childs, 2013-12-01 Amid competing claims about who first developed the theories and practices that became known as New Criticism the critical method that rose alongside Modernism literary historians have generally given the lion's share of credit to William Empson and I A Richards In The Birth of New Criticism Donald Childs challenges this consensus and provides a new and authoritative narrative of the movement's origins At the centre stand Robert Graves and Laura Riding two poet critics who have been written out of the history of New Criticism Childs brings to light the long forgotten early criticism of Graves to detail the ways in which his interpretive methods and ideas evolved into the practice of close reading demonstrating that Graves played such a fundamental part in forming both Empson's and Richards's critical thinking that the story of twentieth century literary criticism must be re-evaluated and re-told Childs also examines the important influence that Riding's work had on Graves Empson and Richards establishing the importance of this long neglected thinker and critic A provocative and cogently argued work The Birth of New Criticism is both an important intellectual history of the movement and a sharply observed account of the cultural politics of its beginnings and legacy

Language, Truth, and Literature Richard Gaskin, 2013-04-18 According to the literary humanist works of imaginative literature have an objective meaning which is fixed at the time of their production and which is the same for all readers then and thereafter not subject to the vagaries of individual readers' responses Such works refer to the real world and make statements about that world which are of cognitive as well as aesthetic value the two kinds of value are indeed intimately connected Richard Gaskin offers a defence of literary humanism so understood against assault from two directions On the one hand some analytic aestheticians have argued that works of literature do not bear referentially on the world and do not make true statements about it others hold that such works do not make a contribution to knowledge others again allow that works of literature may have cognitive value but deny that this depends on their having truth or reference On the other hand reception theorists and deconstructionists have rejected the humanist's objectivist conception of literary meaning and typically take a pragmatist and anti-realist approach to truth and meaning This latter poststructuralist treatment of literature has often been accompanied by a radical politicization of its study In defending literary humanism against these various forms of attack Gaskin shows that the reading and appreciation of literature is a cognitive activity fully on a par with scientific investigation and that we can and should engage in it disinterestedly for the sake of what can be learnt about the world and our place in it
