Every project has its own unique features and requires particular problems to be identified and tackled in an appropriate way. Often the solutions developed on labour based projects are innovative and are of potential benefit to many people outside and inside the project area if appropriate and used or adapted with sensitivity to the circumstances of the new application. It is with these factors in mind that it was decided to document the particular standards, designs, methods and procedures of the Flores Road Project in this Workbook.

Potent Landscapes Catherine Allerton, 2013-04-10. The Manggarai people of eastern Indonesia believe their land can talk; that its appetite demands sacrificial ritual and that its energy can kill as well as nurture. They tell their children to avoid certain streams and fields and view unusual environmental events as omens of misfortune. Yet far from being preoccupied with the dangers of this animate landscape, Manggarai people strive to make places and pathways lively re-traveling routes between houses and villages and highlighting the advantages of mobility. Through everyday and ritual activities that emphasize liveliness, the land gains a further potency: the power to evoke memories of birth, death and marriage to influence human health and fertility. *Potent Landscapes* is an ethnographic investigation of the power of the landscape and the implications of that power for human needs, behavior and emotions. Based on two years of fieldwork in rural Flores, the book situates Manggarai place making and mobility within the larger contexts of diverse human environment interactions as well as adat revival in postcolonial Indonesia. Although it focuses on social life in one region of eastern Indonesia, the work engages with broader theoretical discussions of landscape, travel, materiality, cultural politics, kinship and animism. Written in a clear and accessible style, *Potent Landscapes* will appeal to students and specialists of Southeast Asia as well as to those interested in the comparative anthropological study of place and environment. The analysis moves out from rooms and houses in a series of concentric circles, outlining at each successive point the broader implications of Manggarai place and path making. This gradual expansion of scale allows the work to build a subtle, cumulative picture of the potent landscapes within which Manggarai people raise families, forge alliances, plant crops, build houses and engage with local state actors. Landscapes are significant, the author argues, not only as sacred or mythic realms or as contexts for the imposition of colonial space; they are also significant as vernacular contexts shaped by daily practices.

The book analyzes the power of a collective landscape shaped both by the Indonesian state s development policies and by responses to religious change Rural Investment Climate Assessment: Roads in Manggarai District, East Nusa Tenggara ,2006 **The British National Bibliography** Arthur James Wells,2003 **Asia and Pacific Bibliography** ,2001
