Watson,Robert B. Potter,2001 The Barbados Tenantries Programme provides an example of what can take place when the state elects to intervene in low income housing This work offers an empirical study of the plantation tenantries since the upgrading programme began in the 1980s examining different aspects of 150 tenantries

Low-cost Housing in Developing Countries A.G. Sheppard Fidler and Associates,1976 **Low-cost Housing Technology** Louis J. Goodman,1979 *Contemporary Issues in Construction in Developing Countries* George Ofori,2012-06-26 Economic growth and socio economic development are particularly important for developing countries and the construction industry plays a central role in driving both of these Traditionally the issues faced have been assumed to be merely offshoots of those encountered in industrialised nations and are usually discussed only in this context In addition research in construction management and economics has generally failed to take proper account of the unique or highly emphasised characteristics of the industries in developing countries or their economic and social environment This volume challenges underlying assumptions and focuses on the distinct characteristics of construction in developing countries In so doing it considers the issues from the perspective of the developing countries themselves to present a strong contemporary picture for researchers It forms a companion volume to *New Perspectives on Construction in Developing Countries* which provides an update on the generic subjects relating to the construction industry in developing countries and covers new concepts and issues **A Compendium of Information on Selected Low-cost Building Materials** United Nations Centre for Human Settlements,1988 *Sustainable Cities in Developing Countries* Cedric Pugh,2013-12-16 This text addresses the difficulties of balancing the imperatives of sustainability with the pressing challenges facing some of the world s most underdeveloped areas Various perspectives are brought to bear on issues from economics and theories of health through to the foundations of sustainability All the key contemporary developments are dealt with the growth in international law and agreements on controlling greenhouse gases the effect of reforms in finance governance and methods of appraisal on the areas of waste management and the theoretical advances in the community development aspects of health and the neighbourhood environment guided by the experiences of the World Bank WHO and UNEP The text is intended as a guidebook for those responsible for re shaping cities in the 21st century
