

LOWER MIDDLE-CLASS

DEFINITION

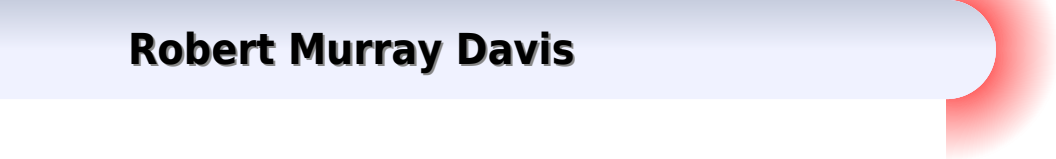

Lower middle class refers to a socio-economic group that falls between the working class and the middle class. This group typically has some level of post-secondary education or vocational training but might still face financial challenges or lack job security. They often have a standard of living above poverty level, but might struggle to maintain consistent financial stability.

EXAMPLES

- **Modest Housing:** Often live in smaller homes that are functional and may be located in more densely populated neighborhoods.
- **Limited Savings:** While they might have some financial buffer, it's often insufficient for long-term security, making them more vulnerable to economic downturns.

Middle Class Pentecostalism in Argentina Jens Köhrsen, 2016-04-08 In *Middle Class Pentecostalism in Argentina* Inappropriate Spirits Jens Köhrsen offers an intriguing account of how the middle class relates to Latin America's most vibrant religious movement Based on pervasive field research this study suggests that Pentecostalism stands in tension with the social imaginary of the middle class and is perceived as an inappropriate lower class practice As such middle class Pentecostals negotiate the appropriateness of their religious belonging by demonstrating distinctive tastes and styles of Pentecostalism Abstaining from the expressiveness emotionality and strong spiritual practice that have marked the movement they create a milder and socially more acceptable form of Pentecostalism Increasingly turning into a middle class movement this style has the potential to embody the future shape of Pentecostalism

Education and Social Justice in the Era

of Globalisation Marie Lall, Geetha B. Nambissan, 2020-11-29 The book discusses the implications of globalization on education from the perspective of social justice. It looks at two countries, India and the UK, to look at how global economic and cultural processes are mediated through nation states, institutional structures, and the aspirations of different social groups. It seeks to resituate the debates around education and social justice in policy research and public discourse by highlighting the need for a more nuanced understanding of globalization and education. It also demonstrates the effects of economic dimensions, the politics of neoliberalism, and how this has shifted the understanding of state responsibilities and marginalized issues pertaining to the agenda of social justice. **The Middle Class in World Society** Christian Suter, S.

Madheswaran, B.P. Vani, 2020-05-21 This volume delves into the study of the world's emerging middle class. With essays on Europe, the United States, Africa, Latin America, and Asia, the book studies recent trends and developments in middle class evolution at the global, regional, national, and local levels. It reconsiders the conceptualization of the middle class with a focus on the diversity of middle class formation in different regions and zones of world society. It also explores middle class lifestyles and everyday experiences, including experiences of social mobility, feelings of insecurity and anxiety, and even middle class engagement with social activism. Drawing on extensive fieldwork and in-depth interviews, the book provides a sophisticated analysis of this new and rapidly expanding socioeconomic group and puts forth some provocative ideas for intellectual and policy debates. It will be of importance to students and researchers of sociology, economics, development studies, political studies, Latin American studies, and Asian Studies.
