California Riparian Systems Richard E. Warner,Kathleen M. Hendrix,2023-11-15 In California's semi arid environment the narrow lush strips of riparian habitats that border watercourses springs and seeps are critical ecosystems supporting a remarkable abundance of plant and animal life These rich environments once thrived across the state from the Central Valley to the deserts of the Great Basin providing essential habitats for wildlife and acting as vibrant corridors in otherwise dry landscapes However over time the expansion of agriculture and development has drastically altered these ecosystems Today less than 10 percent of the original riparian vegetation remains with much of it degraded through logging grazing and water diversion This volume explores the unique ecological importance of California's riparian systems discussing the delicate balance between productive land use and the conservation of these critical habitats California Riparian Systems brings together the latest research and insights from experts in ecology conservation and land management to provide a comprehensive look at the challenges facing these fragile ecosystems The book highlights the essential role riparian systems play in supporting diverse wildlife from the Yellow billed Cuckoo and Bell's Vireo which nest exclusively in riparian thickets to aquatic mammals reptiles amphibians and fish that depend on the shelter and food provided by streamside vegetation With growing public awareness and appreciation of the beauty and value of these areas this volume serves as both a call to action and a guide for sustainable management offering strategies to preserve and protect California's riparian systems while balancing agricultural and economic needs This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1984 Lower California and Its Natural Resources, by Edward W.
