society as a whole Consumer activists achieved many victories from making cars safer to highlighting the dangers of using baby formula instead of breast milk in countries with no access to clean water The 1980s saw a reversal in the consumer movement's fortunes thanks in large part to the rise of an antiregulatory agenda both in the United States and internationally In the process the definition of consumerism changed focusing more on choice than on access As Hilton shows this change reflects more broadly on the dilemmas we all face as consumers Do we want more stuff and more prosperity for ourselves or do we want others less fortunate to be able to enjoy the same opportunities and standard of living that we do Prosperity for All makes clear that by abandoning a more idealistic vision for consumer society we reduce consumers to little more than shoppers and we deny the vast majority of the world's population the fruits of affluence [The Georgetown Law Journal](#), 1976

Small Property versus Big Government Clarence Y. H. Lo,2024-06-21 Clarence Lo s investigation of California s Proposition 13 and other tax reduction bills is both a tribute and a warning to people who get mad as hell and try to do something about being pushed around by government Homeowners in California faced with impossible property tax bills in the 1970s got mad and pushed back starting an avalanche that swept tax limitation measures into state after state What we learn is that although the property tax was slashed two thirds of the benefits went to business owners rather than homeowners How did a crusade launched by homeowners seeking tax relief end up as a pro business supply side political program To trace the transformation Lo uses the firsthand recollections of 120 activists in the movement going back to the 1950s He shows how their protests were ignored until a suburban alliance of upper middle class property owners and business owners took charge It was the program of that latter group not the plight of the moderate income homeowner that inspired tax revolts across the nation and shaped the economic policies of the Reagan administration This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1990 **The Nonprofit Sector** Walter W. Powell,Richard Steinberg,2006-01-01 Provides a multi disciplinary survey of nonprofit organizations and their role and function in society This book also examines the nature of philanthropic behaviours and an array of organizations international issues social science theories and insight **Driving Forces** James A.

Dunn,2010-12-01 To its critics the automobile is a voracious consumer of irreplaceable energy resources a leading polluter of the environment and a destroyer of cohesive communities The most outspoken opponents call for greater regulations and restrictions to ultimately replace the automobile as the country s primary means of transportation But their proposals all ignore one simple fact Americans love their cars Millions of citizens have made the automobile the most successful method of mass transportation ever developed and they are not about to give up the personal mobility it offers This book presents the controversial view that for the vast majority of Americans the automobile is not the problem but the solution to transportation needs While acknowledging the automobile s significant drawbacks the author refutes much of the shrill rhetoric and doomsday predictions of its opponents He takes a skeptical look at the major policy initiatives to tax regulate and provide alternatives to the automobile pointing out that any policies designed to remove Americans from their cars without offering them a superior means of mobility are worse than useless and doomed to failure The book offers suggestions and guidelines for politically realistic initiatives that preserve the benefits of the automobile while building public support for policies that will reduce its negative effects on energy use and the environment **Ralph Nader** Mary M. Tolan,1991 A biography of the consumer advocate who devotes his life to crusading for citizens rights such as safer cars cleaner food and truthful advertising
