De Ferranti, 2004-01-01 Latin America and the Caribbean has been one of the regions of the world with the greatest inequality This book explores why the region suffers from such persistent inequality identifies how it hampers development and suggests ways to achieve greater equity in the distribution of wealth incomes and opportunities The study draws on data from 20 countries based on household surveys covering 36 million people and reviews extensive economic sociological and political science studies on inequality in Latin America Four broad areas for action by governments and civil

society groups to break the destructive pattern are outlined 1 build more open political and social institutions that allow the poor and historically subordinate groups to gain a greater share of agency voice and power in society 2 ensure that economic institutions and policies seek greater equity through sound macroeconomic management and equitable efficient crisis resolution institutions that avoid the large regressive redistributions that occur during crises and that allow for saving in good times to enhance access by the poor to social safety nets in bad times 3 increase access by the poor to high quality public services especially education health water and electricity as well as access to farmland and the rural services and protect and enforce the property rights of the urban poor 4 reform income transfer programmes so that they reach the poorest families

The Making and Unmaking of Democracy Theodore K. Rabb, Ezra N. Suleiman, 2013-11-26 For every citizen of the world there is no more urgent issue than the spread of democracy Democracy is what the WTO protestors are calling for it's the main concern of human rights advocates and it's only long term way to end terrorism But how does democracy spread What can be done to encourage and support This remarkable new collection brings together some of the best minds in variety of fields to discuss the conditions that promote and sustain or undermine and extinguish democratic institutions and ideas Spanning political thought from ancient Athens to contemporary sub Saharan Africa the contributors develop an outline of how democracy develops Several key factors emerge Democratic

transitions are always heavily shaped by the ideas and practices of past regimes like tribal traditions in Africa international political and economic pressure to liberalize as in Asia and current economic conditions The quality of democracy is almost always improved by the elimination of religion as the center of the state by the move from democracy as protection of the individual from the state to democracy as enhancer of rights and by the progression from a focus on the individual to a focus on the community Expansive in its coverage and fundamental in its significance The Making and Unmaking of Democracy is a volume to learn from argue against and expand upon *Private Politics and Peasant Mobilization* Maria-Therese Gustafsson, 2017-09-13 This book explores how different corporate governance strategies affect community mobilization and the scope for influence when an area's population is faced with the arrival of the extraction industry Drawing on ethnographic research into Peruvian mining localities the author analyses a series of relationships which are characterized by confrontations clientelism demobilization and strategic collaboration By presenting a detailed account of micro practices and showing how these processes are interpreted by different groups Gustafsson offers a refined understanding of the multiple layers and informal workings of power between transnational corporations and local communities

Argentine Democracy Steven Levitsky, Maria Victoria Murillo, 2005 During the 1990s Argentina was the only country in Latin America to combine radical economic reform and full democracy In 2001 however the country fell into a deep political and economic crisis and was widely seen as a basket case This book explores both developments examining the links between the real and apparent successes of the 1990s and the 2001 collapse Specific topics include economic policymaking and reform executive legislative relations the judiciary federalism political parties and the party system and new patterns of social protest Beyond its empirical analysis the book contributes to several theoretical debates in comparative politics Contemporary studies of political institutions focus almost exclusively on institutional design neglecting issues of enforcement and stability Yet a major problem in much of Latin America is that institutions of diverse types have often failed to take root Besides examining the effects of institutional weakness the book also uses the Argentine case to shed light on four other areas of current debate tensions between radical economic reform and democracy political parties and contemporary crises of representation links between subnational and national politics and the transformation of state society relations in the post corporatist era Besides the editors the contributors are Javier Auyero Ernesto Calvo Kent Eaton Sebastian Etchemendy Gretchen Helmke Wonjae Hwang Mark Jones Enrique Peruzzotti Pablo T Spiller Mariano Tommasi and Juan Carlos Torre

What impact do political parties have on women s political representation and on state gender policies Does this vary at national and local levels This study looks at the National Women s Ministry in Chile a country of ideological conflict strong parties and centralized government and the leftwing Brazilian Workers Party characterised by clientelism weak parties and decentralization Accumulation in Post-Colonial Capitalism Iman Kumar Mitra,Ranabir Samaddar,Samita Sen,2016-07-29

This volume looks at how accumulation in postcolonial capitalism blurs the boundaries of space institutions forms financial regimes labour processes and economic segments on one hand and creates zones and corridors on the other It draws our attention to the peculiar but structurally necessary coexistence of both primitive and virtual modes of accumulation in the postcolony From these two major inquiries it develops a new understanding of postcolonial capitalism The case studies in this volume discuss the production of urban spaces of capital extraction institutionalization of postcolonial finance capital gendering of work forms establishment of new forms of labour formation of and changes in caste and racial identities and networks and securitization and thereby confirm that no study of contemporary capitalism is complete without thoroughly addressing the postcolonial condition By challenging the established dualities between citizenship based civil society and welfare based political society exploring critically the question of colonial and postcolonial difference and foregrounding the material processes of accumulation against the culturalism of postcolonial studies this volume redefines postcolonial studies in South Asia and beyond It is invaluable reading for students and scholars of South Asian studies sociology cultural and critical anthropology critical and praxis studies and political science The Politics of Labor in a Global Age Christopher Candland,Rudra Sil,2001-09-20 The Politics of Labor in a Global Age is one of the first works to analyse and compare recent shifts in patterns of industrial relations across late industrializing and post socialist economies The volume features original and timely essays on labor relations at national local and workplace levels as economic and political actors cope with the similar challenges associated with economic adjustment measures and the impact of globalization The authors reveal that while globalization has threatened the position of organized labor and prompted business and state elites to accommodate greater labor market flexibility the legacies of past institutions remain evident in distinctive trends in labor politics within and across late industrializing and post socialist settings The comparisons suggest that globalization is best understood not as a source of convergence but as a set of common pressures that are mediated by specific historical inheritances that spur varied responses on the part of industrial relations actors and that facilitate quite diverse institutional outcomes

Unravelling Gramsci Adam David Morton,2007-02-20 Powerful and clarifying The book s combination of careful argument and cogent illustration will make this a landmark volume in Gramscian studies John Agnew University of California Los Angeles and author of Hegemony The New Shape of Global Power Morton draws upon an impressive knowledge of

Gramsci's writings to provide new insights into key processes in today's world order Anne Showstack Sassoon Emeritus Professor Kingston University and Visiting Professor Birkbeck College University of London Unravelling Gramsci makes extensive use of Antonio Gramsci's writings including his much overlooked pre prison journalism prison letters as well as his prison notebooks to provide a fresh approach to understanding his contemporary relevance in the current neoliberal world order Adam Morton examines in detail the themes of hegemony passive revolution and uneven development to provide a useful way of analysing the contemporary global political economy the project of neoliberalism processes of state formation and practices of resistance The book explores the theoretical and practical limitations of how Gramsci's ideas can be used today offering a broad insight into state formation and the international factors shaping hegemony within a capitalist framework Social Movements, Indigenous Politics and Democratisation in Guatemala Roderick Leslie Brett, 2008 Drawing on social movement theory this book presents a comprehensive analysis of the evolution of collective action during Guatemala's democratic transition 1985-1996 and the accompanying impact of social movements on democratisation focusing on three indigenous peoples' social movement organisations *Social Movements, Indigenous Politics and Democratisation in Guatemala, 1985-1996* Mark G. Brett, 2008-02-28 This book analyses patterns of collective action that emerged during Guatemala's democratic transition between 1985 and 1996 focusing in particular on the role of indigenous actors in the political processes undergirding and shaping democratisation and the respective impact of the transition upon indigenous social movements Comparatively little has been written about collective action in Guatemala within the discipline of political science despite the mobilisation of a wide range of social movements in response to the brutal armed conflict rather literature has focused principally on the role of elite actors in democratisation This study presents a fresh perspective presenting an analysis of the political evolution of three social movements and their human rights platforms through the framework of social movement theory Clientelism, Social Policy, and the Quality of Democracy Diego Abente Brun, Larry Diamond, 2014-03 Abente Brun and Diamond invited some of the best social scientists in the field to systematically explore how political clientelism works and evolves in the context of modern developing democracies with particular reference to social policies aimed at reducing poverty Clientelism Social Policy and the Quality of Democracy is balanced between a section devoted to understanding clientelism's infamous effects and history in Latin America and a section that draws out implications for other regions specifically Africa Southeast Asia and Eastern and Central Europe
